SOME STRAIGHT SHOULDER HITS

Delivered In the Preacher's Most Vigorous Style.

NEW YORK, Jan. 1.-Rev. Dr. Charles H. Parkhurst last night gave out a state ment which had been read before the exacutive committee of the Society for the Prevention of Crime, and officially endorsed by that body. It started off by acknowledging the splendid work that has been done by the senate committee and its counsel, stating that there has been created through their instrumentality an epoch in the history of New York, and there has been secured at the polls a municipal revolution that would have been impossible except through an investigation. The members of the committee are warmly thanked for their faithful and thorough work, and the executive com-mit ee of the Society for the Prevention of

Crime came in for a large share of praise. The statement goes on to say, however, that the committee plainly withheld their support from efforts made to show that there was something that could be proved against Superintendent Byrnes, and continues: "We are justified in saying tha while the committee stood up to the rack magnificently through A the earlier portions of the investigation, they flinched at the crisis. They stumbled just at the completion of their work. The chairman o the committee will not dare to deny that i was 'policy' (I have used that word advisedly; he will recognize what I refer to that controlled him in his handling o Mr. Byrnes and not a desire to act in view of all the probable or ascertainable facts

"In Rot Thirty-one Years."

"Now the presumption is on the side o he superintendent being as criminal as any other member of the force; so that hesitancy to handle him as Williams wa handled could not proceed from any prior conviction of his innocence. Wherever they have stuck in their fork, they have found rot; and whether Byrnes be rotter or not, he has been in rot for 31 years, and has been the executive head of rot for the last two years. The presumption there

"There are two ways in which Mr. Byrnes has put the committee under ob-

"The second way in which the committee put themselves under obligations to him was by taking him into their confidence and allowing him to become a confederate with them in breaking down the force. To the degree in which they obtained help from Mr. Byrnes, they put put themselves practically under obliga-tions to protect him Now, I know the language that Byrnes used touching this point, and when I heard it I knew that everything was 'up' as far as a square in-vestigation of him was concerned.

Committee Blundered. "We are not charging the committee or its counsel with a dishonest intent, but they blundered and they blundered badly. Whether there was any such stipulation or not, the acceptance of his assistance practically involved the deals, and a com mittee that came down from Albany wi'l the express purpose of investigating deals ought to have been punctiliously careful to avoid even the appearance of having a susceptible side for the very sort of offense that they were designated to detect and

"It has seemed to our committee strange that the senators, knowing the earnestness and the sincere character of our work, and knowing to what extent we regard Mr. Byrnes as that element in the force that was the hardest to reach, and from whom we felt that most was to be feared, have not taken more pains to faniliarize themselves with the points of view which we have been brought to occupy in respect to him.

We of the executive committee feel that our fight during the past three years has been permanently a contest with Mr. Byrnes. He has known perfectly wel that our only intention has been to secu the enforcement of law in this city, an yet he has dogged our steps from first to ast, and has omitted no efforts to discredit us in the estimation of the com

Persecuted by Byrnes.

"Byrnes hated us and tried to make us contemptible in public esteem by showing that our agent was levying blackmail, which, as shown by the Lexow committee, was precisely what his agents were doing and precisely what we are obliged to presume he knew his agents were doing.

"Within three days of the above attack,

he struck our society another blow by trying to discredit its president. Unless all the newspapers of that date lied, he called together reporters, and, in terms of unrestrained bitterness, published to the world a mass of blackguardism concerning the motives of my work, the base impulses that inspired it—all of which was solid and contemptible falsehood. "I am writing this without animosity,

"I am aware that many of our friends will take exception to this statement, but we are here for a principle, and we are here to stay. We are not crawling for promotion nor burning for popularity; but the Society for the Prevention of Crime was here before the senate com mittee came down, and will be here after the senate committee has gone back, and the uncompromising line that we have followed in the past will be the line that we shall just as studiously and unswerv

Nobly Respond to Suffering Nebraska Appeal For Necessaries of Life.

ATLANTA, Jan. 1 .- Ex-Governor Norther is heading a movement for a shipment of corn to some of the starving people of Ne braska and is meeting with assurances of success. On Jan. 15 a long freight train will pull out of Atlanta laden with grain, a New Year's present from the overflowing bins of Georgia to the empty ones of suffering Nebraska. Governor Northen has kept the wire warm with telegrams to the mayors of all of the cities and towns in Georgia asking them to give out of their abundance to the stricken families of Ne-

He has also sent dispatches to the rail-road officials of the leading roads of Georgia, asking them to help the good work by granting free transportation to such corn as shipped over their roads for the sufferers. In response to the request he has received assurances from President Hoffman of the Seaboard Air line, and from the Western and Atlantic, offering their freight facilities free and such other assistance as may be in their power.

Governor Brown of Carrollton answer the appeal as follows: "Your telegram re ceived this morning, and the appeal went straight to my heart. While money is scarce, what you ask for God has bountifully blessed our country with. I had the telegram announced at each church, and the pastor of the Baptist church appointed a committee to solicit for the sufferers. I will appoint committees in each district it the state for the

GOOD PLACES DIFFICULT TO FIND.

A Young Country Girl Tells a Pathet

Story In a Police Court. Before a police justice on the North Side a slim, pale girl was brought. She wore no hat, her hair was tangled, and clinging to it were fragments of dead leaves. Her gown, doubtless once a flimsy piece of finery carried through the country by a peddler, was faded and torn, and her toes showed through holes in her shoes. She had not the appearance of a hardened sinner. Her mouth did not bespeak a long career of vice, and her eyes, though red, had not the dull blur of continued dissipation. The justice looked sharply at her.

"You have not been here before," he said, half as a declaration and half as a question. "No, sir." Shame and grief were in

her voice. "What is the charge against her?" the justice asked. "She was found drunk and asleep in

Lincoln park," an officer answered. The justice looked at her. She looked down. "How old are you?" he asked. "Twenty-two," she answered. "Where is your home?"

"My home was near Mukwonago, in

Wisconsin. I haven't been here very long. I came here expecting to find office work, but failed. I didn't know where to go. I wandered about and finally got work in a cheap restaurant, and I worked there a few days for nothing and the thing failed. I don't hardly know how I lived after that, but I know that last night I was wandering about the streets. The air was cool, and I was hungry. There was no place open for me, and I went into a saloon. I knew it was wrong to go into the place, but was I to go? I know that there are places for girls to go, where food and beds are provided for them, but they are always far off, while the saloon is always at hand. You have to hunt to

find the good places, but the bad ones stand always in front of you. I don't know why this should be so, but it is. A number of men were in the saloon drinking, and one of them, sitting at a table, told me to sit down and have a drink. I told him that I wanted nothing to drink, but that I should like to have something to eat. He ordered something, and I ate it, and then he insisted until I drank a glass of beer. I don't know how many glasses I drank, but I know that it must have been a good many, for I recollect trying to dance. I sang old fashioned country songs, and they made me drink more. I don't know when I left them. The

next thing I knew I was shaken by a

"You don't want to be a bad woman, do you?" he asked.

She looked up at him with a swift, surprised glance, and tears were in her eyes. "No, sir," she said. "What I have seen of bad life makes me hate it. I know that I'm not very smart, but I can work if I have the chance." "And you shall have the chance,"

the justice answered. "Sit down over "Are you going to send me to jail?" "No, I'm going to send you out to my house, and I hope that hereafter

FOR PARTIAL RELIEF.

Political Leaders Desire Immediate Financial Legislation.

NO ASSURANCE GIVEN CARLISLE

That Democratic Senators Will Endorse His Measure.

WASHINGTON, Jan. 1.-There has been considerable talk about the probability of an extra session of the Fifty-fourth congress. This discussion has a speculative basis, but is indicative of the apprehension prevailing in the public mind of the inability of the present congress to supply legislation that will restore confidence, revive trade and strengthen the treasury.

So far as the leaders of the two political parties in congress are concerned, they do not want an extra session, and it is certainly not desired by the president. But if nothing should be done within the next two months to enact some legislation for the remedy of existing evils, the calling of the Fifty-fourth congress in extraordinary session may become an imperative neces-

with leaders of the two parties hostile to an extra session, for Monday evening, nizing the urgent necessationed as it legislation relating to the current nary business sagacity, freed from partial maneuvering, ought to result in an agreement on some measure which would re-ceive the support of a majority of the nembership of the house.

It is evident that the contemplation of an extra session of the Fifty-fourth congress is discomforting to Republicans. They do not desire that the responsibility for financial legislation should be suddenly thrust upon them. If it could be postponed until the time for the regular assembling in December, 1895, the Republicans would be better prepared to assume responsibility at that time. With this feeling prevalent among Republican leaders, and with Democrats averse to an extra session on many accounts, rests the hope that something may be evolved which will bring partial relief.

How Carlisle Feels About It. Secretary Carlisle thinks that some kind of currency reform measure will pass the house. The amendments to his bill contained in the substitute proposition, he thinks, have strengthened the measure very much on the Democratic side.

The Democratic leaders, including Speaker Crisp, Representatives Catchings and Wilson, chairman of the ways and means committee, and other prominent influential Democrats, are doing their utmost to accomplish some financial legislation in order that the party may have that much, at least, to its credit when congress adjourns.

Secretary Carlisle remarked yesterday that he did not feel very sanguine of se-curing satisfactory currency reform or financial legislation in the senate. Thus far he had been unable to get any assurance whatever. The Democratic members of the finance committee and their associates in the senate informed him that they desired to wait the action of the house on the currency bill now pending in that

If it were a measure that would enlarge the currency and give all the states uniform banking facilities, the Democratic leaders, including members of the finance committee, were inclined to believe that it would pass the senate, but that no halfway measure providing for two kinds of currency, a national and state bank sys tem, would meet the approval of the Dem ocrats in that body.

The Democratic senators who blocked the passage of the Wilson tariff bill, namely, Gorman, Brice, Smith and Camden, and who defeated that measure, have already intimated that no currency measure will be passed by this congress. If these senators stand by their declarations, no financial legislation can pass that body.

Struck Bad Weather.

TARPAULIN COVE, Mass., Jan. 1.-The schooner Belle O'Neil, Captain Dunton, from Pascagoula for Fall River, had to put to sea three times on account of the sever weather, and will now tow to her desti nation. Schooner Moss Rose had to put to sea twice, and besides losing sails her crew suffered considerably with the cold.

Dr. Simpson Dead. WORCESTER, Mass., Jan. 1.-Dr. Henry Y. Simpson, member-elect of the house representatives, died yesterday, aged 51 years. He was a member of the house of 1894. He was first elected in 1893 to fill a vacancy caused by the death of a Worces

ter member. In the house of 1894 he was chairman of the committee on finance.

Marine Band Wanted.

Boston, Jan. 1 .- Governor Greenhalge has written a letter to President Clev land asking that the United States Marine band be detained to visit Boston on the occasion of the testimonial to Rev. Dr. Samuel F. Smith, author of the national hymn, "America," which is to take place here in February.

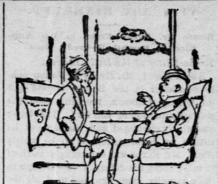

Judge Hoar Very Sick. CONCORD, Mass., Jan. 1.—Judge E. R. Hoar is again very low. Until Sunday he had been comfortable, but never has rallied from his previous attack of several weeks ago, which makes his condition critical, and his death is liable to occur at

any moment. Two Children Cremated. NEWARK, N. J., Jan. 1 .- Captain John Glover, of a canal boat, and his wife, left the boat last evening, locking two children in the cabin. Soon after a lamp exploded.

After the flames were extinguished, the charred remains of the little ones were Lost With All on Board. HAMBURG, Jan. 1.—It is regarded as certain that the collier Napoli and the fishing steamer Nordsee foundered during the recent gale. There were 25 persons on

board both vessels, and there is hardly a doubt that all of them were drowned. PARIS, Jan. 1.-Severe snowstorms have prevailed in parts of France. Snow is so deep at Pontarlier that railroad traffic has been completely stopped. Numbers of fishing boxes, belonging to Cherbourg,

have been lost. Father Went Crazy. ALMONTE, Ont., Jan. 1.-Miss Belle Armstrong, a wealthy young lady, jumped from a moving train yesterday and broke her neck. Her father witnessed the accident, and the shock drove him insane.

Cincinnati Judge Feels That He Is Bound CINCINNATI, Jan. 1.-Judge Buchwalter vesterday refused to surrender Rev. A. H. Hampton, a colored minister, to Deputy Sheriff Perrin of Lebanon, Ky., until he had assurance that the man would be protected from any mob. Hampton was formerly a teacher at Whitewood, Ky., and had some words with J. C. Durham, a farmer, in June, 1898, because the pupils were stealing the latter's fruit. Hampton shot Durham, but not fatally, and fled. Deputy Sheriff Perrin, a relative of Durham, arrested Hampton Sunday night while preaching at Avondale. After an exciting time, he was yesterday brought before Judge Buchwalter on extradition papers. Hampton said he was willing to go back if assured a fair trial, He had received letters warning him his life was

be strung up by a mob if taken back by Deputy Sheriff Perrin. "I have sent two men back lately," said Judge Buchwalter, "one to Georgia and one to Kentucky. Although the offense of the latter was only shooting at some body, he was lynched by a mob. I determined then I would never send anothe prisoner south unless I had assurance he would be protected from a mob and given a fair trial. I must have a letter from Governor Brown and the sheriff of your county to that effect."

Police Investigating. FALL RIVER, Mass., Jan. 1 .- Catherine Sullivan, aged 45, died last night. Her husband, James Sullivan, is held by the police pending further investigation. Ac-cording to Sullivan and his 10-year-old son, Mrs. Sullivan tried to go downstairs about 10:30 o'clock to get some beer. They were both in bed, but were aroused by the noise of some one falling downstairs. Sullivan says he got up and brought his wife back to the kitchen. She was then unconscious and. bleeding freely at the back of the head. Dr. Kelly was unable to bring the woman back to consciousness, and she died in convulsions. Sullivan is very well known. People acquainted with him say he is a very peaceable man.

MORTON TAKES OATH OF OFFICE.

Gotham City Hall Bids Goodbye to Tammany Tigers.

ALBANY, Jan. 2.-Hon. Levi P. Morton was inaugurated governor of the state of New York yesterday for the ensuing two rears. He is the first Republican to asume the duties of this office since 1879. Although the inaugural ceremonies were set for 11 o'clock, the assembly champer was filled an hour before that time overnor Flower reached the executive hamber at 10:30 o'clock, escorted by his staff in uniform. Governor Morton's staff met him at the executive mansion and they were escorted to the Capitol in carrihand. The Albany Republican league, in rarriages, formed a portion of the escort. The outgoing and incoming executives and their staffs met at 10:50 o'clock, and shortly afterward proceeded to the as-

was congratulated on the favorable auspices under which he assumed office, and, in conclusion. Mr. Flower, as a private citizen, offered "the cordial support of a loyal New Yorker." Mr. Morton then took the constitutions oath of office, after which he thanked Mr. Flower for his cordial welcome and kindly words, saying that his predecessor would carry with him into private life the good wishes of the people. Mr. Morton said he would strive to discharge his duties for the best interests of the whole people. And he invoked therefore the earnest support of all those who are in authority, in behalf of an economical administration of gov-ernment, for the promotion of the true

prosperity of fellow citizens and the glory of the state and nation.

The exercises were closed with the benediction by Bishop Donne.

NEW YORK, Jan. 2.-A new city admingoverned by a Republican mayor. William L. Strong was inaugurated at 12 o'clock yesterday with brief and simple ceremony. He will be mayor for three years, and in as many months there will probably be a clean sweep in all of the city

Mayor Strong came down to the hall peror. shortly before noon, accompanied by his secretary, Job E. Hedges, and a friends. He was met by retiring Mayor Gilroy, and the party retired to the private room of the mayor's office. There was a crowd present at the main office, and politicians of high and low degree swarmed in the corridors outside.

At 12 o'clock Strong and Gilroy entered the main office arm in arm and made their way through the crowd over to the mayor's desk in the southwest corner of the room. There was some applause, and the face of the new mayor flushed slightly with pleas-

THAT CAMPAIGN BEER.

Faxon's Investigation of Charges Agai Republicans and their Candidates To Editor Daily Ledger:

When I accepted Mr. Moxon's \$200 in

rust, to be delivered to the person who would prove to my satisfaction that the Republican candidate for Mayor was in any degree responsible for the furnishing of intoxicating liquors at the late election, I began a careful investigation of the matter, and up to this time have not found a scintilla of evidence to connect Mr. Moxon or any other Republican, either directly o have learned that the unfortunate occu rences which have caused such widespread criticism were chiefly due to Democratic first term he reorganized the fire depart- ever shown. still in the hall. The fearful calamity has prostrated the whole county. Every house going to such a locality as "Dublin" to in the village is a hospital, and people going to such a locality as "Dublin" to have come over 100 miles to minister to make converts to the Republican party. The section of Ward Two where the liquors were dispensed was long ago named Dublin because of the uncertain character who was wounded in a duel last Sunday, of many of its inhabitants. It has always been a stronghold of Democracy, and I sault. Reigel's wife says her husband is have no doubt that such convivial gatherinordinately jealous, and that Bebler's ings as were held there on the night before actions, while he was a guest at their election strengthened and increased the house, could not possibly be construed in Democratic vote, for whiskey and beer rallies seldom tend to swell the Republican ranks. While I do not wish to be understood as interpreting the word Republican to mean something angelic, I emphatically declare that a man whose vote is influenced many will have to energetically defend by any kind of intoxicating liquor belongs her title to this group, as the British to, and is bound by, the Democratic party. As thorough an investigation as possible has satisfied me that the election whiskey and ale were Democratic property; that they were sold, purchased, carted, received, distributed and drunk by Democrats; that

crats; that a certain Democratic Warden was so intoxicated on election day that it was decided to take him to his home in a Boston, Jan. 2.—The 10th annual report carriage; and that the innumerable lies regressors. I challenge them to prove tha the \$25 which I contributed to the campaign fund, or any other money furnished by Republicans, was used to debauch the not be done.

Why This Sudden Spasm of Virtue among this class, and why, if sincere, did LYNN, Mass., Jan. 2. - Mrs. Mattie they not come to me with definite informa-Oakes, 41 years old, died at the Lynn city tion about the half barrels of ale in Wards hospital last night from burns received at her home. She accidently overturned an secured possession of the ligners under a secured possession of the liquors under a search warrant, and thus have saved the city from the disgraceful scenes which were reported as having been enacted. It was the most contemptible rumor that was good, warm Cap? ever circulated by one party to defeat another, and I am convinced that the pro moters of the scheme worked on bor rowed political-corruption capital. Brother Green's paper heralded the affair as a Republican trick. Who doubts that any party or newspaper which employs such means to increase its power will soon end

its existence? It is strange that the Advertiser, which has always advocated sink-drain politics, flavored with beer, (a characteristic of the Democratic party), should turn up its nose at the small quantity of the liquid dispensed at the last election.

This Muddy Organ

has often lied about me, but I have treated the matter as an instructive joke. I am charitably disposed toward the gentleman, and I do not believed that Bro. Green ever instigated that post-election editorial, although he has intimated and said many things which I regard as contemptible. The chapter on election scandal, which

we have been reviewing, illustrates somewhat the corrupting influences of party politics, but words are powerless in describing the debasing practices which are resorted to by a certain class of politicians in nearly all our municipal campaigns. In the language which concluded a pungent article written about Marshal Tukey, whom many rascals will long remember as a former head of the Boston police force: "Tukey, we would say wor things of you if we could."

Editorial Comment.

MR. FAXON takes his innings today with a tirade against our Democratic friends, but they had received "a tip' and in a communication in yesterday's DAILY LEDGER did much to weaken the blow. "A Reader," we regret that he did not sign his name, clearly showed that the city was not bankrupt, or it could not have borrowed money at such an extremely low rate of interest. The LEDGER, however, has a little bone to pick with the writer, for he said, "I have looked in vain in the LEDGER and PATRIOT for some criticism," and then later finds in the LEDGER the very thing he wanted and which doubtless prompted the communication. The LED-GER does not attempt to answer all statements of its writers, particularly at election time, and it should be a well understood fact that the editor does not necessarily endorse the sentiments.

Raised In Behalf of the Shoe Workers of Strike at Haverhill.

HAVERHILL, Mass., Jan. 2.—The demo stration of the strikers of this city last night was by far the largest of its kind ever held here. Five or 6000 strikers and their sympathizers paraded the principal streets, almost every parader carrying either an American, French or Italian flag or a transparency. Fireworks and decorations greeted the men as they marched and the sidewalks were crowded with interested spectators.

The procession made its way to the city hall, where a grand mass meeting was held, addressed by J. M. Cary, prominent labor leader of this city; Miss Frances E Willard, Lady Henry Somerset, Mrs. Henry Hicks of London and others. Several overflow meetings were held at the same time in various places.

J. M. Cary presided at the city hall meeting. He reviewed the situation and said that the greetings which had been given the strikers earlier in the evening showed that the sympathy of the citizen is with theme in spite of the positive assertions of the manufacturers to the con-

She expressed sympathy with the working people and advised them in their struggle for their rights to maintain the respect of their fellow men, which could be accomplished in no better way than by the absolute refusal to have anything to do with intoxicants.

Lady Somerset said that while she wa unable to discuss the local aspect of this matter, she knew that the strikers were hood, and urged them to stand out persistently against the greatest tyrant the world has ever known-the modern capitalist. NOT CENSURED.

Rev. William Steele Has a Few Words About the Vote of Presbytery. Editors of the Daily Ledger:

You published today an item of news referring to me which demands immediate attention. You say I was censured by the Boston Presbytery. That is incorrect, as the motion you published shows. A Presbytery can censure no minister until it has proven an offence against him. The Presbytery of Boston has not put me on trial for any offence nor attempted to do so. Time enough therefore to attend to that when occasion demands. Your article

misleads because fragmentary. What are the facts? By request I supply the Independent Presbyterian society The church letters of those attending thes services are unlawfully withheld by the South Quincy church in an attempt to compel their return. On Dec. 31 the Presbytery appointed a committee to confer with both parties. That committee me deputations from the Independent and South Quincy church on Dec. 21. Clifton Soap and Manufacturing Company, Cincinnati, O. mending that the whole matter be lessed to the solution of the sealer of the solution committee reported last Monday in Boston mending that the whole matter be let alone until the Spring for developments as they were satisfied the Independen Presbyterian church had a field of its own. This was adopted, after considerable op position by Rev. Scott F. Hershey and E. M. McPherson, the recognized champions of the South Quincy church, elders in this

disgraceful affair. Smarting under what seemed a victory for myself and those who worship in Wilson's hall, E. M. McPherson and Rev. Hershey brought forward a copy of the LEDGER of Dec. 6:h, containing the letter published by me with the facts in the case. Unable to question the truthfulness of the same, they pushed through the notice referred to at the close of the meeting when only a few members were present, from pure spite and prejudice. May say its value is not worth the paper it is written upon, and inconsistent with the report

adopted. REV. WM. STEELE. P. S. Rev. Moore reminded Presbytery that he had preached in Wilson's hall the other Sunday and would do so again. Other members of Presbytery declared their willingness to do the same. Why did not Presbytery disapprove of their conduct? Quincy, Jan. 1, 1895.

The idea of an electric light which fed by a current from a dynamo actuated by a 40 horsepower engine and giv ing 7,000 candle power, can have its illuminating power intensified 35,000 times is not easy to grasp. It means the projection of a stream of light of about 250,000,000 candle power, and it is no wonder that the announcement that such a light is about to be used in this country has been received with some incredulity in Europe. Yet this is the efficiency of the light which will be shortly erected at Fire island for the O'NEILL, Neb., Jan. 2.—The defaulting illumination of the adjacent coast and reasurer of Holt county, Barrett Scott, the protection of the fleet of ships en-

Often Use Scales. The dealers in live stock who buy and sell the thousands of cattle, hogs and heep which are daily handled at the Bourbon stockyards must be expert in messing the weight of a live animal at a glance. In conversation with a well

known stockman a few days ago he ex-

plained why this is necessary: "It would be impossible to weigh the cattle in many cases because of the imnense labor involved and the length of ime it would take, while the market price, which is subject to constant flucmations, might easily vary from its highest to its lowest limit while we were weighing the animals in one of routes pleasant weather; stormy weather which has been the biggest day of the once an hour. year thus far, there have been received at On Sundayson the Weymouth route the Bourbon yards over 2,400 head of cars will leave East Weymouth at quarter leattle and about 6,000 hogs. Dainty Strazini.

Strazini is the name of a wonder in Leipsic. Strazini astonishes his audiences by first eating a soup which consists of sawdust plentifully mixed with coal oil. The mess is set afire, and after the flames have been extinguished Strazini eats the peculiar mixture, ladling it out with a spoon. He follows this up with biting piece after piece from the lamp chimney, crushing the glass between his teeth and swallowing it. He washes it down with a little water. For dessert he munches pieces of hard coal, peat, washing soap, tallow tandles and pieces of plaster. - Leipsic

SERVICES ABOARD THE BLENHEIM.

Sir John Thompson's Body Lying In State at Halifax.

HALIFAX, Jan. 2.-H. M. S. Blenheim, conveying the remains of Sir John Thompson from Portsmouth, Eng., was signalled off the mouth of the harbor at 10:45 yesterday morning, and the signal, a British ensign with white pennant above a blue ball in the center, was run ATLANTIC-Brancheid's News Agency up on the citadel staff. When the big cruiser arrived off Fort York redoubt, the outermost fortification of the harbor, the cannon, high upon the rocky caverns of stern sentinel, boomed forth a salute of minute guns.

Hardly had they ceased when the salute was taken up by the forts on McNab's island and next by Fort Georges on Georges island, in the center of the har-bor. The Blenheim steamed silently to anchorage off the ordnance wharf, where a large number of official people had gathered. There was a heavy fall of rain all day, and the situation for those watching the arrival of the funeral warship was as unpleasant as could well be imagined.

The moment the warship came to standstill, the imperial army transport with Colonel North, adjutant general of the imperial forces in North America, ac companied by Rev. Dr. Murphy and Father Moriarity, steamed out from the ordnance wharf. The Dominion government steamer Argus left about the same time from Queen's wharf.

The anchor of the Blenheim went splashing into the water at 12 o'clock. Rev. Dr. Murphy and Father Moriarity immediately repaired to the mortuary chamber, where the libera and accompany ing prayers were recited. The sons of the late premier were the only others present. On Board the Blenheim.

The draping of the Blenheim's mortuary chamber was very plain, black and silver trimmings. On the foot of the coffin was Teeth her majesty's wreath, with a card in her own handwriting. In addition to the electric lights in the cabin, were four Nor candles burning, two at each side near the ends of the casket. At the head there was a crucifix standing two or three feet above

After consultation with the warship's officers, Colonel North issued an order that the remains would not be removed till 2 o'clock, instead of 12 noon, as first intended. The thousands who thronged the wharves in the drenching rain soon dispersed, and gathered again in full force at the appointed hour.

Sharp at 2 o'clock 10 sailors bore the coffin up the companion way. The bugle sounded the assembly, and all hands mustered on deck as the casket was borne out. The Blenheim's band commenced the Dead March in Saul, and the first gun of a royal salute boomed out. At the same time the marines of the Lily presented arms, and every head on the Blenheim was bared.

On arriving at the ordnance wharf the same 10 sailors placed the coffin on the sion to the provincial parliament building was commenced. On arriving at the parliament building to the lying-in state chamber by 10 noncommissioned officers of the imperial forces.

Bandits Blundered.

CAMDEN, Ark., Jan. 2.-Six masked mer made an effort to rob a train at a tank 10 miles from here. Their object was to se cure the express money. The train stopped as usual to take water, and the negro porter was ordered to uncouple the cars. The engineer was made to run the car up from the train, a distance of half a mile. The bandits then discovered that they had taken the baggage car instead of the express car. The leader told the engineer that he had the laugh on them, but he would see him again.

The many trials and the hard conditions prevailing during the greater part to \$3,775,548.14. of the past year have been borne with a courage, endurance and patience worthy of the best traditions of the commonwealth. Above all, even in the darkest hour of tribulation, a fervent and changeless loyalty to the commonwealth and to the country, a deep and abiding confidence in the principle and framework of our free government, were almost universally manifested. The appeals of demagogues, the efforts of designing agitators, eager to sow discontent, were met by the people in a spirit of cold incredulity or good-natured contempt. It is alleged that many inequalities and defects are to be found in the system of taxation as it now exists in this commonwealth. To tax and to please is a consummation never yet vouchsafed to men; yet to establish a system of taxation in which shall be represented the maximum of justice and equality with the minimum of partiality and oppression is a legitimate and rational object of legislative ambition: and I trust that the matter may receive at your hands the just consideration which its importance demands. The teaching of the teacher, in the opinion of the legislature. was an important factor in any great scheme of education. But I do not believe that the board of education ever desired to be charged with the duty of building these or any other normal schools. The board consider that their proper work is the management of the schools when built and they consider it much more important to furnish the existing normal schools with adequate provision than to build new schools without such provision. Again, the salaries of teachers in these schools are below the level established in many cities and towns of the commonwealth. The laboratories in these schools should suitably equipped; the libraries must be kept up to a high standard; and if new structures are to be built, let the appropriations be sufficient for a few rather than insufficient for many buildings. - A wise liberality is often the wisest econ-

HAVERHILL, Mass., Jan. 3.-The outlook in the strike situation is very hopeful for a speedy settlement. The action of W. W. If Mr. Spaulding does this, the other manufacturers will only be a few days in following his example, thereby ending the strike and the hated contract system. Editorial Comment.

THE LITTLE poems of Mr. Dunn are more effective than a long petition, in behalf of the Old Colony officials in Plymouth jail, and may yet change public opinion in favor of their release.

THE LEDGER is up to date today with the message in full of Governor Greenhalge, delivered this afternoon. It is of more than usual interest and worthy of perusal. His Excellency notes a change for the better in the business world, asks for changes in election laws, reminds taxpayers of contemplated changes in taxation laws, is outspoken for education, touches on the management of institutions, notes an advance for temperance, speaks of the work and progress of commissions, has a few words on the State prison, reviews the rapid transit movement, congratulate the State on its saving institutions and condition of militia, and touches upon many subjects under the heading "In General."

LABOR AND CAPITAL

The Topic Discussed by John Burns Be-

had to be turned away. Mr. Burns said: great as theirs. Ours is not a battle of race, color or creed, but we are asking and demanding for a better condition of things, not only for the 70,000,000 in America, but for every man and woman in the entire Boston, Washington, New York and Chicago can each supply the same premonitory symptoms of vice, crime, present degradation; men willing to work, but unable to get it; vagrants robbed and produced by the Vanderbilts.

"With these condition of affairs we must come together, we must combine, so that this present condition must be stopped. We have been told that the money question is one of the features of this problem which will help solve the labor question, but I tell you, friends, that either under a golden kingdom or a silver republic the workingman can be bitten by a gold bug

or his blood sucked by a silver flea. "The curse of the American labor movement is jealousy, and you must remember that when you are killing each other in a hell of jealousy that the monopolist is only hugging himself with joy because your fighting will make it all the longer before you will come to your senses and get your just demand.

"Speculation and monopoly are going on more in America than anywhere else, and I can see also the premonitory symptoms, which if not properly guided in the proper channels by the trades unions, of a storm in this land, before which the French revolution will be a nightmare and the

GUTHRIE, O. T., Jan. 3 .- Two desperadoes, who have infested this territory for a long time, have been run to the ground the English labor advocate, and hundreds and made to bite the dust. Before they did they fought their would-be captors a hard battle. The outlaws are Bob Moore and George Fast, both of whom are suspected of having been implicated in the Canadian (Tex.) express robbery and the killing of Sheriff McGee.

Deputy Marshal Williams and a strong detachment of deputies had been chasing the outlaws for several days. They had traced them from place to place, but had not got within fighting distance until yes terday. Although the sides were unequa half a dozen or more deputies to two out laws, the latter were armed to the teeth, and their natural desperateness, strength ened by the position in which the deputies had put them, made them no easy mark. They were rounded up in a desolate val ley in Washita county about noon, and when commanded to surrender took a stand and began using their Winchesters. Their aim was good, for in the first vol-

ley one of the posse fell, seriously wounded by a ball in the side. The next instant, however, both lay stretched on the ground dead, with bullets from the deputies' guns in their hearts. The outlaws were a veritable walking arsenal, and had they not been killed so soon would doubtless have laid some of the deputies at rest. They are both old offenders.

hind Expectations.

WASHINGTON, Jan. 3 .- President Cleveland Secretary Carlisle and the leading Democrats of both houses who were in strumental in securing the passage of the as the bill was fairly in operation it would penditures of the government.

Nearly all of the provisions of the bill have been in operation three months, and Instead of an increase of receipts from

customs and internal revenue, there has

been from the beginning of its operations principal sources where it was expected there would be a large increase. From the three items which it was expectedscarcely received any revenue whatever. In the treasury forecast of probable revenue for the next five or six months a large amount was expected from the sugar was imported in advance of the passage of the new law is by no means exhausted, and it is believed it will furnish the re-QUINCY FIRE ALARM BOXES finers an abundant store for severa months yet, so that the government is not

> likely for some time yet to get very much evenue from that source. Very little revenue is expected during the next six months by treasury experts from distilled spirits, owing to the large amount of withdrawals of whisky from bond when the 90-cent tax was still in ef-

> The government, therefore, is practically receiving no revenue from distilled spirits. The commissioner of internal revenue confirms this, and remarked yeserday that he was certain that any revenue from that source could not reason ably be expected for nearly a year. There was, he added, no present indication that any of the spirits put into bond under the new tariff law will be withdrawn for early consumption. The receipts from the income tax, if that shall not be declared unconstitutional before it can go into effect, are entirely problematical.

> What Shall Be Done? The important question, therefore, is be ing agitated already in administration circles as to what, under the circum stances, should be done to increase the revenue and put a stop at as early day as possible to the constant shrinkage of the gold reserve, which is daily being used to

meet the current expenses of the governnent. Secretary Carlisle does not hesitate to say that as things are now going it seems very probable that another sale of bonds will be necessary to again replenish the gold reserve, unless congress shall enact the desired remedial legislation. No one here, not even Secretary Carlisle, is willing to admit that the adoption of proposed currency legislation is likely to relieve the

mbarrassed condition of the treasury. Even if congress should pass the measure that the secretary desires, he admitted before the banking and currency committee that it would be several years before the government would realize any marked

enefit from it. Both the president and Secretary Car lisle are now of the opinion that more revenue must be provided by the present congress unless the government is to rely upon repeated sales of bonds for current expenditures. This fact has been privately communicated by these two high officials o some of their intimate political friends. It is not unlikely, therefore, that Secretary Carlisle may ask congress to immediately furnish him with additional rev-

Treasury officials are convinced that the new tariff bill, even if the income tax is collectible, and shall prove to be effective, will not yield adequate revenue. The sit-

nation, therefore, is becoming critical. The attitude of the Democrats of both ouses, that Secretary Carlisle has no right or authority to issue bonds, and to use the proceeds for the current expenditures of the government, renders the sit. uation very embarrassing to the adminis-

The noble building in which you are asembled attests the intelligent labors of the commission on state house extension. There are upwards of 300 epileptics in Massachusetts,—scattered about in the various state institutions. The public safety as well as the promptings of in-telligent humanity suggest that a separate hospital should be provided for these un-fortunates, where they can have the ad-vantage of proper and special treatment. If in your judgment the office of super-intendent of prison industries is to be continued, that official should be placed under the supervision of the Prison Com-mission. Under a temporary arrange-ment, the secretary of the commission is at present performing the duties of both offices for one salary, and you may decide after due consideration to make this arsafety as well as the promptings of in after due consideration to make this ar-

rangement permanent.

I hold to the views expressed in the message of last year as to the extension of nunicipal suffrage to women.

I think, too, that the time is ripe for a thorough anddecisive consideration of the great question of inaugurating biennial elections in this commonwealth.

It will be well to consider whether more stringent legislation is not needed to check the brutality of the prize fight and the sparring bout.

Thus I have endeavored briefly and rapidly to enumerate most of the various agencies by which the executive function

of the commonwealth are performed. It is of the greatest importance that the governor and council should keep a close watch over all these agencies, and I can testify most emphatically to the diligent, faithful and intelligent service of the executive council in this direction and executive council in this direction, and speaking generally a commendable zeal and activity seems to be manifested in all A larger life would seem to be opening before this active, intelligent and aspiring commonwealth. Charity, gracious but inexorable, demands from you the magnanimous response which Massachusetts has never failed to give. Education lays its imperial tax upon the treasury with an autocratic power readily acknowledged and obeyed by the intelligence and conscience of the people. Justice insists that her temple shall be kept pure; that the ermine of ou judiciary continue to be spotless; that the profession of the law shall be the practice of exalted principles developed by the wis-dom of ages; and that juries shall be

SPECULATORS' HOWLS

Will Not Induce the President to Part With Carlisle.

APPROVES OF SECRETARY'S BILL

Financial System.

WASHINGTON, Jan. 4. - Secretary Carlisle is well aware of the fact that there are certain influences in Wall street that do not like him, nor do they approve of the financial policy which he is pursuing. He made this discovery on the visits made by him in arranging for the bond loans.

Some of these influences control the columns of one or two of the newspapers in New York, and hence every two or three weeks an attack is made on the secretary, containing demands for his immediate removal, and recommending the president finances in accordance with the ideas of Wall street speculators.

Thus far these vicious attacks have nade no impression on Mr. Cleveland, in whose behalf they were made, in the hope that friction might be created between the president and his secretary. If Secretary Carlisle had yielded in the first instance, or even now would yield to these Wall street speculators and allow them to run the department, these attacks would cease. It is not very pleasant or agreeable to the president to have these unjust, unfair and malicious assaults made upon his financial secretary. They exert no influ ence here whatever, and if they have any effect in money centers, it can only be to injure the credit of the government.

No Special Message. President Cleveland has not yet deter mined to send a special message to congress on the currency question. This was definitely ascertained yesterday by the leaders of the house who had heard that a special message was contemplated.

It was learned that Secretary Carlisle had mentioned the matter to the president and it had been discussed in a general way. There had been no conclusion reached, however, and up to the present time the president has not framed such a nessage, or in fact determined to send

The president has thrown off his usual eserve in discussing the pending currency bill with members of congress. Chair man Springer of the currency committee Representative Culberson and severa other house leaders have called at the

In these talks Mr. Cleveland had urged at collar and elbow. the great need of passing some form of currency legislation. He has pointed out that the Carlisle bill was not a reform over existing evils of the financial system, any more than the tariff bill was a complete realization of the hopes of tariff reorm. Yet in the judgment of the presi dent, the Carlisle bill was a step in the right direction, and with that accomplished, there was hope of progressing un til the financial system was perfected at

Mr. Cleveland expressed his approval of the Carlisle bill as a whole and in detail. He did not point out to his callers any thing that he regarded as a single flaw in it. He expressed the hope that it would receive favorable and speedy action.

Congressional Doings. The resolution heretofore introduced by Mr. Allen (Pop., Neb.) relating to the occupation of rooms in the basement of the senate wing of the Capitol for restaurant purposes gave rise to an interesting de-bate during the morning hour of the senate. Mr. Allen severely criticised the practice of furnishing the proprietor of the restaurant, free, his furniture, ice, etc., and asserted that it was a violation of the statutes and constituted larceny of the publicfunds. Messrs. Hale and Manderson replied to the observations of Mr. Allen and defended the existing practice. No action was taken on the resolution.

The remainder of the day was taken up by Mr. Morgan (Dem., Ala.) in a speech on the Nicaraguan canal bill, in which he replied in detail to the arguments advanced by Mr. Turpie (Dem., Ind.) in opposition to the bill.

The proceedings of the house lacked marked incidents of any kind. The debate on the currency bill continued all day, but was generally spiritless, and the attendance, which was large at the beginning, dwindled to almost nothing. The speakers were Black (Ga.), McCreary and Buckner (Ky.) in favor of the bill, and Haugen (Wis.) and Adams (Pa.) in opposition to it. No other business was trans

THE CAPTAIN'S STORY

Of the Awful Peril In Which the Steam ship Sarnia Was Placed.

PASSENGERS WERE IN A PANIC.

Many Thought That the End Had Surely Come.

BELBAST, Jan. 4.-Captain Barnard of the Dominion line steamship Sarnia, which has had such a rough experience in crossing the Atlantic on her way from Anchoria and Norwegian after she lost her rudder, has described the voyage in a

interview. He said that all went well until Dec. 21, Hose, Jackets, Mittens, Gloves, Gaiters, Flannels, when, owing to a fresh gale from the northwest, the rudder broke. The gale continued all day Dec. 21 and 22, and after the rudder broke the crew succeeded in rigging a jury rudder, but it had to be cut

drift, as it was useless. The Sarnia was then drifting about, and there was much consternation among the passengers, especially among the womer and children. This state of affairs continued until Dec. 23, when at about 8 a. m the Anchor line steamship Anchoria wa signalled and bore down upon the disabled steamer. At about noon the Anchoria passed two hawsers to the Sarni

and took her in tow. At 5 a. m. on Dec. 25 the wind freshened and increased in force until a strong gale was blowing, and eventually the hawsers snapped one after another, again

Leaving the Sarnia Helpless. As a heavy sea was running, she rolled heavily and a great many sheep were washed overboard and several head of cat tle were killed.

When the gale again moderated, on Dec 26, the Anchoria made another attempt to take the Sarnia in tow, but all efforts in that direction were unavailing up to the morning of Dec. 27, when the Hibernian bore down upon the two steamers. But said that while on the way home from the society meeting he was knocked down and robbed by two men. He now says the story is false, and that he is a defaulter.

Dore down upon the two steamers. But as the Anchoria was still trying to take the Sarnia in tow, the Hibernian bore away, and soon after she had gone away the Anchoria signalled the Sarnia the own rudder was disabled, and that she would be unable to render any further as sistance to the disabled Dominion liner.

The wind freshened at about 8 p. m. of Dec. 27, and it increased in force until hard gale was blowing. This state of affairs lasted all night and up to late in the morning of Dec. 28, when a heavy sea was running. At noon on over the Sarnia, and she shipped an im mense quantity of water, while rolling so fearfully that it was

Impossible to Go on Deck. 6 p. m. to midnight, the gale was at its height. The sky was frequently illumi-nated with the most vivid flashes of lightning, and several meteoric fire balls burst with loud reports around the ship In addition, Elmo's fire was observed about the masts. The passengers were naturally greatly excited; but the steam ship's officers succeeded in calming them

as much as possible.

The wind at midnight veered to the north, and this kicked up a terrible sea. All the hatches were battened down and every precaution possible was taken to keep out the seas. At 8 o'clock in the evening a great sea struck the ship with such force that those on board thought the

The Sarnia trembled from stem to stern like a stricken animal, and quite a time elapsed before she righted herself and threw off the many tons of water which had poured on board of her. Women and children fainted, and several persons were injured by being severely knocked about. Toward midnight, to make matters worse, the stokehole pump became choked, but the firemen, by working desperately, succeeded in getting the stokehole clear of water, although at one time it looked as if the fires would be put out.

A Bitter Disappointment. When the storm moderated, the crew were employed in shifting cargo in order to trim the vessel, which still rolled heavily. To the great delight of all on board, on Dec. 30 an Allan steamship was sighted, and the Sarnia signalled that she was disabled and needed assistance. But. to the bitter disappointment of the passengers of the distressed vessel, the Allan liner either did not heed or else did not notice the signals of the Sarnia, and it was not until the next day, when the Norwegian, another Allan line steamer, was

The Norwegian, as soon as she made ou the signals of distress, slowed down and headed for the Sarnia. After a few hours' work, the Norwegian succeeded in passing hawsers aboard the disabled steamer, and soon afterward started with her in tow. From that time all went well until the eventful trip of the Dominion liner ended in Belfast lough, where she put in with the aid of tugs, after having been dropped by the Norwegian, which vessel continue on her journey to New York. To publish the extra Thursday evening necessitated the opening of the office, rallying the employes, getting up steam, the writing and composition of the sketch, proof reading, the making up of two forms which were run separately, but the hardest job of all was the search for newsboys. Councilman Holden Expires at Meeting of City Council.

For Four Years He Had Been a Member of the City Council

The last session of the City Council of 1894 will go down in history as the saddest of any in the history of Quincy, for almost with the last act of business came the by the Ladies' Schubert Quartette, and death of one of the oldest members as well as one the best known citizen of Quincy, Mr. John O. Councilman Federhen had been introluced and had begun to deliver an original pcem, when Councilman Holden was seen to fall back in his seat. In an instant all was commotion. His

ed to the telephone to call physicians. Dr. Gordon soon arrived, but before he had entered the hall Mr. Holden had passed to the other shore where sorrow is no more.

Meanwhile a friend had summoned Mr. Holden's son, and his grief upon beholding his father with whom he had parted a short time before was heartrendering.

Kind hands led Mrs. Holden and her son away, and Undertaker Hall who had now arrived removed the body. President Bass informed the audience that there would be no exercises, and after

the majority had departed a brief session of the Council was held. John O. Holden was a well known jeweler of the Centre. The business was established by his father in 1840, and the

Washington, Jan. 4.—The president gave the annual state dinner to his cabinet last night. The Marine band was in attendance, and played national airs throughout the evening. Fifty-four guests

were present.

When the list of names of guests at the dinner to the cabinet was given out, the appearance among them of that of Senator Hill of New York was received with some incredulity. There had been no in-timation that the New York senator was to be present, and when it became known about town that Mr. Hill was the guest of the president the fact was at once the sub-

ject of the greatest speculation.

There had been rumors that an understanding had been reached between the president and Mr. Hill, but the presence of the latter at the White House last night was the first tangible evidence that the rumors were probably authentic.

But once during this administration has Mr. Hill before been within the portals of the executive mansion. That time was just after the arrival of Senator Murphy, and the two New York senators appeared at the White House together, but the best information is that they did not see the

The president and Mr. Hill met in the general assemblage before the dinner be-gan, and their meeting was to every appearance one of extreme cordiality. They remained together for some minutes in a close conversation. Mr. Hill escorted Mrs. Hearst to the dining hall.

Senator Hill declined to discuss his presence at the White House, saying it was purely a social visit and had no political significance, and consequently he did not feel at liberty to talk on the subject. Nevertheless his attendance will be a mark for political gossip for some days to come. It is understood that Mr. Hill was invited to the previous cabinet dinner, but declined

in Egyptian Alchemist's Laboratory In the Sixth or Seventh Century B. C.

Long before chemistry became a science many of its processes and apparatus were in common use. Professor H. Carniuseum, and that siphons also were manufactures of ordered furniture in 1870, The sleigh was demolished and the horse used in the fifteenth century B. C.

The earliest chemical laboratories

now known were those of the Egyptian temples, in which the priests prepared the incense, oils, etc. used in the temis plainly described by Jeremiah, metallurgical operations by Job, Ezekiel and others, and bellows by Jeremiah. Geber, the Arabian physician of the eighth century, wrote minutely of chemical processes. He described solution filtration, crystallization, fusion, sublimation, distillation, cupellation and various kinds of furnaces and apparatus.

Perhaps the earliest drawings of strictly chemical apparatus are the figures of distilling apparatus in a Greek papyrus of the eleventh century. An alchemist's laboratory of the sixth or seventh century was uncovered in Egypt in 1885, and its contents included a bronze furnace, about 50 bronze vases with beaks and some conical vessels resembling sand baths.

The balance as an instrument of precision reached a high development under the Arabians as early as the twelfth century, when very accurate specific gravity determinations were described.

A Unique Manufacture. An industrial journal notes the curi-

Badger opposite each other, the steam will pass. When not opposite, the passage of the steam is stopped.

Thus when one of the disks revolves the steam passes in a series of puffs, and if these puffs succeed each other with sufficient frequency a note is produced, rising in pitch with the rapidity of revolution and increasing in power that is lower than the 77 per cent. of Chicago and the 71 of Brooklyn. A CANVASBACK DUDE.

He Startled the London West Enders, but Won His Wager.

Considerable sensation was created in the west end of London recently by a newspaper vender, attired in a most extraordinary suit of canvas held together entirely by safety pins, who frequented the most important the oughfares for the greater part of the day. A close scrittiny revealed a glimpse of a snowy shirt front not altogether concealed by the strange canvas suit and fingers loaded with handsome rings not usually found on the general run of news venders, while he delivered the contents of his bill with a most aristocratic drawl.

It appears that a party of "Johnnies" were assembled together in the Cafe Monico a few days since, and a discussion arose between them as to the sale of papers in the streets, one gilded youth asserting that he would, for a wager of £50, sell a certain number of papers in a certain time under certain conditions, which was immediately snapped up by one of his companions, with the result that the youth appeared in the streets under the circumstances related

He was closely attended wherever he went by a large crowd and was the subject of numerous irreverent remarks from the legitimate paper sellers, who could not make it out at all. The affair caused much amusement, especially when this most extraordinary news vender adjourned to the Cafe Monico for refreshment, his entry causing a great diversion among all assembled in that establishment. The wager was completed and won at 9:30 in the evening. - London Cor. Chicago Post.

New Means of Coast Defense.

Uncle Sam possesses one cannon the outside of which is believed to be more formidable than the inside. It is a 12 incl. gun mounted on the ramparts of the fort at Willet's Point, N. Y., but around it has been wound 13 miles of one-half inch insulated telegraph cable. By means of this coil and a dynamo the big gun has been transformed into the most powerful electro-magnet in the world. This unique instrument was born of a mere experiment whim of Colonel W. R. King of the United States engineer corps, but an astonishing new feature in our coast defense seems about to be evolved from this re markable combination. This magnetized gun, it has been discovered, will de range a ship's compass at a distance of New York, New Haven six miles from the fort. Future developments of this chance born principle may vet evolve a valuable adjunct to the coast forts in the perfection of an electro-magnet which shall eventually prevent the possibility of a naval surprise under the cover of fog or of darkness. - Philadelphia Record.

The prevailing European estimate of De Lesseps, whose death is widely discussed by the press, is probably accurately summarized by the concluding sentences in the London Times:

"Public opinion, which has alternately regarded him as an impostor or TRUE as a brilliant engineer, as a consummate financier or as a heartless swindler, will probably finally settle down to this appreciation of the originator of the Suez canal. He was neither a financier nor an engineer, neither an impostor nor a swindler. Frederic T. Greenhalge Is Inaugurated as Governor of Massachusetts.

CLEAVES RETAINS HIS OFFICE.

Busiel Takes the Gubernatorial Reins In New Hampshire.

Boston, Jan. 4.-Yesterday was inauguration day on Beacon Hill, an occasion rendered exceptionably notable this year by the occurrence in the new representatives' chamber in the state house extension of the ceremonies attending the induction of the new state government.

The two branches of the legislature assembled at 11 o'clock, the senate in its old chamber and the house in its new quarters in the state house extension, and in each

ceremonies of inauguration was dispatched. Shortly before 12 o'clock the two branches went into a joint session in the representatives' chamber, President Butler of the senate presiding, and a committee was appointed to wait upon the governor and lieutenant governor elect and inform them that the senate and house as sembled in convention were in readiness to administer the oaths of office prescribed by the constitution and the laws of the

the customary business preliminary to the

United States and of the commonwealth. In a few minutes the justices of the supreme and superior courts, under escort of Sheriff O'Brien, entered the chamber, foilowed shortly afterward by Governor-elect Greenhalge and Lieutenant Governorelect Wolcott, the military staff of the commander-in-chief of the militia and the members of the new and the old executive council. Then came the invited guests, many of whom have held high positions in the commonwealth.

The oaths of office were administered to the governor-elect by President Butler. The lieutenant governor-elect was then sworn in and the oaths were administered, and proclamation was made by William M. Olin, secretary of the commonwealth Governor Greenhalge was then presented by President Butler, and at 12:25 he began the reading of his inaugural address.

During the reading of the address, the chamber was full to overflowing on the floor and in the galleries, a large number of ladies being present. The governor was frequently interrupted by applause, and upon closing his recommendations and suggestions received a hearty and prolonged endorsement from the hands of his hearers.

The governor then left the chamber, to gether with the lieutenant governor, the staff, the two councils and the guests generally. The senate also withdrew to its own chamber. A second convention was held later for the qualification of the councillors-elect. Upon retiring for the house of representatives. Governor Greenhalge held an informal reception in the council chamber.

Sworn Into Office.

CONCORD, N. H., Jan. 4.-Hon. Charles A. Busiel of Laconia was inducted into the office of governor in the presence of both houses of the legislature, about 100 invited guests and an audience which overcrowded the galleries of representative hall. At 11:30 o'clock the guests, with the ladies under escort of staff and military officers in uniform, proceeded to the executive chamber. Fifteen minutes later the Amoskeag veterans, drawn up in line in front of the Eagle hotel, received with military honors the official procession, led by Governor Smith and Governor-elect Busiel. The march to the state house was quickly made, and after a short wait in the executive chamber the offi cial party ascended to representative hall where the guests had preceded them and taken seats assigned in the space reserved in the front part of the hall. Both houses were in convention, and upon their entrance Governor Smith and Governorelect Busiel were received with the customary legislative honors. The usual formality of presentation of the governorelect to the legislature was performed, after which the oath of office was administered to the new executive by President of the Senate Frank W. Rollins Governor Busiel then delivered his inaugural address.

In the Event of the Failure of the Carlisle Currency Bill.

THE TROUBLESOME SUGAR DUTY

Likely to Draw Austria Into the Tariff Squabble.

WASHINGTON, Jan. 5.-Representative Sperry of Connecticut, a Democratic colleague of Mr. Springer on the banking and currency committee, has proposed another substitute to the Carlisle currency

It strikes out all after the enacting clause, and provides for an issue of bonds sufficient to retire outstanding treasury notes under the Sherman act.

The bonds are to bear 3 per cent interes are to be redeemed in gold and are to be in denominations from \$10 to \$10,000. They are to run for 30 years, with the right to redeem them after 10 years. The secretary of the treasury is empowered to keep the gold reserve up to a minimum of \$100,000,-000 by selling these bonds.

Provision is made for the steady retire ment of the greenbacks, both from the proceeds of the bonds and from the surplus in the treasury. Mr. Sperry's substitute is understood to have executive approval in case the Carlisle bill cannot pass. Austria Has a Grievance.

The tariff war between the United States and Europe had an acute phase yesterday. The very first official act of Mr. Hengelmuller, the new Austrian WALKER & COLPITTS, minister, was the lodgment of a protest against that paragraph of the sugar schedule of the tariff act which imposes an additional duty of 1-10th of 1 per cent on sugar coming to the United States from countries which pay an export

This action was taken yesterday, and the ground taken by the minister was similar to that which formed the basis of the protest of Germany, that an additional duty is a discrimination against Austria, and is consequently a violation of the treaty of commerce with that nation. So far no threat of retaliation accompanied the protest, but in this Mr. Hengelmuller is but following the example set by the German minister, and To Every Customer Purchasing Goods to the next step will undoubtedly be in the same direction, namely, the imposition of some restriction upon an American prod-

> Austria. ply, outside of the small proportion con-tributed by Louisiana, are Cuba, Germany, France and Austria. With three of these countries we are already at odds over the sugar duty, and in the case of France there are already indications of the adoption of a retaliatory policy in their imposition of restrictions upon our meat trade and the importation of American wheat and flour.

uct that is imported in quantities into

Discussed by the Cabinet, This whole subject was under discus sion by the cabinet yesterday, and as far as can be gathered the outcome was that if congress fails to come to the relief of the executive by the removal of the duty which is supposed to cause the trouble, then resort must be had to retaliation

which will either open European coun-

tries or close our own ports to all European products. The position occupied by our govern-ment just at this moment is rather difficult. By a decision of the president, Minister Taylor has threatened the Spanish government with retaliation for its discrimination against American ports, yet to carry out this threat, had the same been consistent, similar action with

respect to Germany and Belgium and other offending European countries would have to follow The pressure from our beef trade to prevent such retaliation and secure our ends | ciation. by a repeal of the sugar bounties duties is so great that the president is reluctant to enter upon a tariff war until congress has signified its desire in the matter, and as a result of yesterday's discussion it may be that the attention of that body may be

again drawn to this subject. Call For a Caucus, Representative Holman, chairman o the Democratic caucus committee of the house, issued a call late yesterday afternoon for a Democratic caucus to be held

at 3 p. m., Monday, Jan. 7.

The call states that important measure will be considered. It was issued after a conference between Mr. Holman, Mr. Springer and Speaker Crisp. The pencipal subject to be considered is the currency bill. The question of a bond issue will also be considered.

Speaker Crisp was the first to sign the call. Messrs. Springer, Outhwaite, Cul-berson and McMillin also affixed their signatures, and thereafter the signing be came general. Charles Crisp, son of the speaker, circulated the call. But few embers failed to sign, 55 signatures more secured before adjournment.

He alleges that the city violated the contract by issuing licenses to several other garbage collectors.

Wanted For Embezzlement. Boston, Jan. 5.-Henry B. Spalding is wanted for the alleged embezzlement of \$15,000 in cash from the firm of Wheeler, Blodgett & Co., of 110 Kingston street. An indictment warrant for his arrest has been issued. Spalding was formerly the confidential bookkeeper of this wellknown firm, and made his disappearance from Boston in September last.

BUFFALO, Jan. 9.-Dr. Dunnigan died of diphtheria yesterday, despite the use o antitoxine. After the first injection the patient's condition continued to grow gradually worse until the end came. Phy sicians are of the general opinion that the case had hardly been a fair test of the curative powers of antitoxine, as its administration had come too late.

Destitution Faces Them. DUBOIS, Pa., Jan. 5 .- All miners at this place and Reynoldsville struck yesterday on account of wholesale discharges. The companies claim that the mines are over- courts of the propoganda, but will be crowded, while the miners aver that it is a blow at their organization. Three thousand men are idle. The miners have been barely able to keep their families while

Pope Leo Sympathizes With Institutions Not Hostile to Christianity.

SATOLLI'S POWER IS ENLARGED.

Will Do Away With Jealous Prevalent at Rome.

ROME, Jan. 5.- The expected encyclical from Pope Leo, addressed to the archbish ops and bishops of the United States, is now ready and will be transmitted throughout the usual channels in a few days. It treats principally with the au thority and powers of Apostolic Delegate Satolli, who is confirmed and strengthened

in his position. The letter is certain to create a profound In sensation in ecclesiastical circles in the United States, similar to that excited las year in France by Leo's recommendation to the Catholic leaders of that country, i which he urged them to loyally accept th republic, and no longer waste their efforts and their forces by standing aloof and striving for the impossible, that is, the restoration of the royalists to power.

MGR. SATOLLI.

In the present important encyclical Pope Leo confirms the friendly disposit tion previously manifested toward a re publican form of government, deinstitutions not inherently hos

Christian principles.

In detail the encylical enlarges to the fullest extent the power of the apostolic delegate, thus conferring on Mgr. Satolli almost plenary authority. All matters o internal and local controversy affecting the church in the United States shall no longer be under the jurisdiction of th

An American Ecclesiastical Court. This is a further and most importan recognition of home rule in the church and will go far to do away with the jeal ousy of Rome and Roman influence which has hitherto prevailed in certa quarters within and without the church. The encyclical, in language and spirit breathes an ardent affection for the people and institutions of the United States and is not sparing in expressions of respect and admiration for the popular form and democratic spirit of our government.

From this forecast of the encyclical it i easy to see that it will be received with unusual favor in the United States by all classes, adding a new and important testimony to the title of 'Leo XIII, the pop of the people."

The encyclical concludes by expressing the warmest confidence in and giving the fullest approval of the course of Mgr. Satolli and his liberal policies.

Right to the Point. LONDON, Jan. 5.—The Chronicle, com-menting upon Newfoundland's demand for the appointment of a royal commission, says that the commissioners must b nominees of the British government and entirely removed from local influences Newfoundland's ways for years past have been nothing short of disgraceful. It is time we knew exactly what has been done with the money obtained from British in vestors by fair promises and under the

protection of the British flag. Cold Weather Abroad. BERLIN, Jan. 5.—A snowfall which lasted 24 hours has seriously impeded traffic in this city. The snowfall in the mountains has been heavy. In the Rhoen mountains it snowed for three days. Snow lies to the depth of several feet in Tolousav, Viettora, Burges and Avilla, in Spain. The river Arga has

flooded the adjacent country, and dwell-ing houses have been abandoned. Zekki Is a Scoundrel. ATHENS, Jan. 5.—Zekki Pasha, who was in command of the troops who committed the recent atrocities upon the Armenians, was for several years president of the military court at Yanina, and instigated a

NEW CITY GOVERNMENT.

It Will be Inaugurated on Monday with the Usual Programme

No special arrangements have been made for the inauguration of the new city government on next Monday.

The new Council will assemble at 12 o'clock when Mayor Hodges will be sworn to the faithful performance of the duties of the office of Mayor, by City Clerk Keith, who will also perform the same function to the members of the Council.

Mayor Hodges will then deliver his inaugural address after which the Council will organize and choose its president, clerk, messenger, auditor and two trustees of the City Hospital.

The members of the Council will also draw their seats; rules will be adopted and an order offered to borrow a certain sum, probably \$75,000 in anticipation of taxes, which will doubtless conclude all of the business at this session.

THE FIRE RECORD.

some Interesting Figures, Facts and Comments for Year 1894.

According to the record kept by the LEDGER, the total number of bell alarms of fire during the year 1894 was 53, an increase of 2 over the preceding year

When it is taken into consideration, however, that in one case a box was pulled twice for the same fire, and in another case, three times for the same fire, it will be seen that the actual number of bel alarms was less than in 1893

The number of false alarms, including those when a box was pulled needlessly more than once for the same fire, was 9. Subscription Price, \$6.00 per Year. which is an increase of 6 over the year

STEVENSON'S WORTH

Proclaimed In Speeches by Men Who Knew and Loved Him

NEW YORK, Jan. 5 .- A large audience attended the memorial meeting in Carnegle hall last night to do honor to the memory of Robert Louis Stevenson, poet the latter part of the month. and novelist. The meeting was held un-First church, Thursday, for the Kansas der the auspices of the Uncut Leaves society, whose president, Edmund Clarence Stedman, paid a tribute to the literary genius of Stevenson

EDMUND (LARENCE STEDMAN.

"He belonged to no country," he said. "His was great art, and great art is absosolute and belongs to the world. We come here tonight to honor this man of genius, because art and song and letters are the essential ground of our daily life. It is a gen us prevented from bearing its most perfect fruit. But the promise was great-great enough to insure him immortality. His works show a ceaseless play of fancy, a vivid and illuminating imagination. They are full of heroic action, old dramatic beauty which made the enduring fame of the Waverly novels. His Milton Sunday trains and additional week death at this period of his career is as if Sir Walter Scott had died when just be-

ginning those novels.".

Andrew Carnegie, the next speaker, said he was glad that the first words he memory of his countryman, Stevenson, whose birthplace was in sight of his own. "Before I honor Stevenson the writer," he said. "I honor Stevenson the man. He was one of the most lovable characters. His countrymen loved him as they have loved no one since Burns. Like Ruskin. Carlyle and Gladstone, he was true to an ideal of life. As a writer, I honor him most of all for his purity. There are no morbid modern pictures of women 'with past' in his works."

Mr. Carnegie was followed by Dr. Eggleston, a personal friend of Stevenson's. Dr. Christie Murray and George W. Cable were among the other speakers.

A Horrible Domestic Tragedy

SAVANNAH, Jan. 5 .- In a fit of jealous rage, George Jordan, who has borne an excellent reputation, shot and killed his 10-year-old son, shot his wife in the forehead and through the neck, shot his 3-year-old daughter in the chin and back of the head, and then shot himself twice this week to the Jonas Perkins school a he begged for poison, that he might be relieved of his pain. His wounds are fatal, and it is probable the entire family of four will be wiped out as a result of yesterday's work on the part of the father.

Burrows' Elevation Causing Comment. Burrows' elevation to the senate has occasioned much comment among his associates in the house, with whom he has served continuously for 18 years, save for one break of two years. His resignation from the house is expected as soon as the Michigan legislature confirms the action

of the Republican caucus. Two Were Laid Out. LITTLE ROCK, Jan. 5.-A battle between a posse of revenue officers and a gang of moonshiners occurred in Van Buren county. Bullets flew in every direction. Putnam, the leader of the moonshiners. was shot through the head and killed, and a boy of 17 was mortally wounded. Two moonshiners were captured. None of the Ladies' Cotton Underwear posse were injured.

Horse Thieves Lynched. KINGFISHER, O. T., Jan. 5.-Three horse thieves in the Cheyenne and Arapahoe country were hanged yesterday. The settlers have been the victims of marauding bands of horse and cattle thieves, and finding the authorities too slow in bringing

offenders to justice, vigilance committees

were organized, with the result stated Didn't Exercise Care. Uniontows, Pa., Jan. 5 .- An explosion of powder occurred at the Meyer works last evening. Six men were seriously injured and one was fatally hurt. The men

were carelessly handling a keg of powder, when it exploded. The building was torn to pieces and the bodies of the victims were blown in all directions. CHICAGO, Jan. 5 .- The police have arrested Jack Carey, Jack McGee and Billy Roach, who are accused of being the mur derers of Officer Duddles, who was killed

GLANCE AT THE INDUSTRIES

Shows That Output Has Far Exceeded Consumption.

NEW YORK, Jan. b. - R. G. 'Dun's weekly review of trade says: Failures for 1894 are fully reported this week, being 13,-885 in the United States, and 1856 in the Dominion of Canada. Liabilities in the United States were \$172,992,856, and in Canada \$17,616,215.

Neither the decrease of over half in this ountry, nor the increase of over 40 per cent in Canada, is surprising, but the White, pastor. Morning service at 10.30 statement shows that most of the decrease in the United States is in manufacturing liabilities, while the entire increase in Canada is in liabilities of trading con-

> A few states, including New York and Pennsylvania, show more failures than in 1893, and in a few southern states the amount of liabilities is larger, but in central and western states very much smalle The complete review of different branches of business given today places in a clear light the fact that prices of commodities are at the lowest level ever known. Eight years ago, in July, prices averaged only 73.69 per cent of the prices for the same articles and in the same markets Jan. 1, 4860, and this remained the lowest point ever touched until Aug. 10, 1893, when the average fell to 72.76, bu early this year prices dropped below all previous records and have never recovered the average Dec. 26 being only 68.73 per

cent of the prices in 1860.

Declines Were Unequal. The range was very little higher at the end of the year, and about as low Oct. 25. The fall since a year ago has been 51/2 per est medium will speak.

FIRST PRESBYTERIAN CHURCH, WATER branches. In iron and steel products 14 and cottons about 15 per cent. These changes contrast sharply with the declin of wages paid per hour's work, which, as was shown last week, average only 1/2 per cent less than a year ago.

During the greater part of the year business has been disturbed by monetary apprehensions, the gold reserve in the treasury having fallen dangerously low. Unquestionably large withdrawals of foreign capital, through sales of securities and otherwise, have caused the outgo of therefore, depends upon other than com ment to this center has been unprecedented

The Industrial World.

The condition of industries has been largely governed by the fall in prices, and while production is much greater than a year ago, the aggregate increase being fairly measured by the increase of 8.24 per cent in hours of work done in November, compared with the previous year, it has been the controlling feature in almost every important industry that consump

The woolen industry records a produc tion for the year about one-fourth less tha formerly, and for the last four month 28.47 per cent less than in 1892 in quantity of wool consumed, but in value of product the decrease was of course greater.

The cotton industry, with material close to the cheapest point ever known, keeps most of the mills at work, but by selling goods at prices quite unprecedented.

The output of boots and shoes has been the largest ever known in number of pairs, but besides a fall in prices below all records, there has been a general preference for the lower priced goods, and the attempted advance in price on account of the rise in leather causes marked decreas

in orders. Low Prices For Wheat and Cotton. The year has been especially note worthy for the lowest prices of wheat and cotton on record. Both suffer from wholly unprecedented accumulation of stocks, the crops being large. Outside this country wheat production has not increased enough to justify a price of 60 cents at New York, and the accumulation is largely due to false reports of yield in tended to frighten buyers and raise prices The same influence has been felt in cotton which is also affected by worldwide depression in business and decrease in con sumption of goods. In other produce markets the year has been relatively less

important.
Business In Canada. Bradstreet's review today says: A fairly good business is reported by Halifax job-bers, but they are not inclined to report the near future bright, and collections are

unusually slow. Some improvement in trade is reported from Montreal, although the fur business is disappointing. At Toronto business is quiet, and the prospects are thought not favorable, although stocks of merchandise generally are small. There are 33 business failures reported from the Dominion of Canada this week.

committee of Royalists from the Hawaiian Islands" were connected in some way with the departure of the American ships from that locality, the president said last night to a reporter: "Of course such an insinuation is very

absurd. Its propriety and the motive behind it, I am sure, can safely be left to the judgment of fair and right thinking American people.

"I am entirely willing that all our people should know everthing I know concerning the visit of the 'committee of Royalists.'

"Last year, in the latter part of July or early in August, three gentlemen from Hawaii arrived here, and asked through with me and present a message from the rush, and much uneasiness is felt through deposed Hawaiian queen. Though I could out this section over the result. not with propriety recognize them officially, I was not disposed to refuse them personally the courtesy of an audience. You ask me if there is any hope of my *doing anything for the restoration of the constitu-tional government of the Hawaiian Islands." I suppose that this question is largely prompted by the fact that soon after the overturning of the late government of Queen Liliuokalani, I investigated that transaction and was satisfied that there had been such an unjustifiable in-terference in aid of that movement on the part of the representatives of the government of the United States in its diplomatic and naval rectify what seemed to be a wrong to others, but also through that rectification to ward off what appeared to be

INAUGURAL ADDRESS.

Mayor Hodges Says a Sewerage System is nicipal financiering. The running ex- of many men, is a serious drawback to the a Necessity, and Now is the Time.

A Careful Statement of the Finances of the City-A Reduction in the Debt.

The inaugural address of Mayor Hodges delivered today is printed in full below, and should be carefully read by every taxpayer and voter of the city: GENTLEMEN OF THE CITY COUNCIL.

The opening of the new municipal year brings to us more vividly than any other ter service on a more economical basis, as be taught, and that in addition six other time a realizing sense of the responsibilities imposed upon us by our fellow citizens. Profiting by the experience of the six years during which Quincy has been a city, we must strive to reach a plane of intelligent, high-minded and unselfish administration of questing the Mayor to petition the Legisthe city's affairs that will not only meet the approval of the men of today, but will merit the commendation of the men of succeeding years. If, after mature and conscientious reflection, we are agreed that a certain line of policy, whether of expenditure The request will be carried out at the that in addition to the twenty-seven subor retreachment, is best for the city's interest, it should be adopted even though for the time being we are subject to criticism.

The City's Finances.

During the year last passed Quincy has had a new experience in its financial affairs. The executive and legislative branches of the City Government have agreed with the mass of citizens that economy must be practiced as well as preached. During the first five years as a city the debt increased year by year from nothing to a sum equal to almost ninety percent. of the debt limit allowed by law. It became perfectly plain that we were not cutting our garments to suit our cloth. We realized that we were yielding too willing to the wishes of men who always had schemes for spending but never had plans for saving. How the debt ran up is shown by the following table of figures taken from the annual reports of the City Auditor.

Dec. 31, 1889,		\$168,811.79
Dec. 31, 1890,		\$191,200.39 Increase 13 per cent.
Dec. 31, 1891,		\$262,386.89 Increase 37 per cent.

The taking on of the Water Plant in 1893 made a tremendous increase in the total indebtedness of the city. The above table shows the increase of the general debt, excluding the water debt, and the total debt year by year until 1894; also the decrease of the general and total debt in 1894. The increase by years was: In 1890, 13 per cent.; in 1891, 37 per cent.; in 1892, general, 9 per cent; total 23 per cent.; in 1893, general, 17 per cent.; total 241 per cent. THE CURRENCY BILL

Will Alone Occupy the Attention of the National House This Week.

MUCH-DISCUSSED NICARAGUA BILL

Still Has the Right of Way In the Senate.

WASHINGTON, Jan 7 -This week promises to be a most eventful one in the house of representatives. It will not only determine the fate of the Carlisle currency bill, so far as the lower branch of congress is concerned,' but in the event of the defeat of the measure it will have a farreaching effect on the currency question and on the policy of congress and the ad-The Democratic house caucus which

will convene this evening, unless postponed on account of the death of Representative Post, will be the first important step, as it is expected to test whether any bill can command a majority, and what form the bill is to be. The house adjourned immediately after assemblage today, out of respect for Mr. Post. A rule fixing the future course of debate will not be introduced until tomorrow, and its terms will depend largely on the events of

It had been hoped to get a final vote by tomorrow or next day, but Mr. Springer, who is in charge of the bill, says it may be necessary to let the debate run through the week.

There are evidences, however, that a coup d'etat will be put in execution tomorrow by those opposed to the bill. This will be a motion to strike out all after the enacting clause, which would be equivalent to a motion to kill the bill. It was by a stroke of this kind that the Morris tariff bill was summarily killed long before its friends had anticipated a final vote. The parliamentary leaders of the house have been consulted and have agreed that this move is regular and in accordance with the rules. They are expecting the move, although it is not known positively that it will be executed. If an early vote is thus precipitated, and all of the bill after the enacting clause struck out, it would do away with the five-minute debate and put a summary end to the strug-

If, however, the motion to strike out should fail to secure a majority, the five minute debate would proceed until the final vote was taken.

There is no program for the week be yond the currency bill, as this measure will exclude consideration of everything else until it is settled.

Senate Forecast. The senate adjourned today soon after the hour of meeting, as a mark of respect to Representative Post. Tomorrow the Nicaraguan canal bill will again be before the senate. The regular proceedings of the week will then begin with a speech in support of the measure by Senator Mitch-

ell of Oregon. The friends of the canal bill are hopeful that a vote may be reached some time during the week, but whether it will attain that important stage will depend upon the persistence of the opposition and the interference of the business of the com

The pension appropriation is the only bill before the senate, and it is not be-lieved that its consideration will consume much time, as there is a probability tha the urgent deficiency bill will be reported during the week, and in case it should. and an effort is made to call it up, it is to be the basis for numerous speeches on the appropriation for carrying the income tax

While the opponents of the income tax generally disavow any intention to defeat the appropriation, they openly confess their purpose of using it as a text for speeches on the general policy of imposing such a tax. The probabilities, however, are against any effort to revive considera tion of this bill during the week.

It is likely that two or three speeches will be made against the Nicaraguan bill during the week, and there are still others, so far unannounced, to be made in support. The advocates of the canal bill are beginning to grow somewhat anxious to receive a vote, as they suspect an effort to hold this off until it may be possible to displace the bill entirely with some other measure, or, if this be avoided and the bill passed, that it will reach the house too late to secure consideration during the present ses-

The general understanding now is that when the Nicaraguan bill shall be disposed of by the senate the bankruptcy bill will be taken up for consideration, and that after that the territorial admission

bills will receive attention. Probably Caused by a Leak. BALTIMORE, Jan. 7.—The fertilizer works of Griffith & Boyd, the acid works of G. H. & C. T. Davidson and the stable office and home trade warehouse in the yard of the Standard Oil company at Canton, were destroyed by fire last night. The total loss will run upwards of \$200,000. THE WAGES OF SIN. One Downfallen Woman Murdered by

Another of the Same Class. NEW YORK, Jan. 7 .- A quarrel between two dissolute women in a house on Mott street yesterday ended in one woman throwing a lighted lamp at the other, firing her clothing and literally cremating her in a short time.

The building is tenanted by Chinamen and white women and the attention of the police was attracted to a room on the fourth floor, where the crime was enacted, by cries of fire. The room was ablaze, and when the flames were extinguished a woman was found lying on the floor, her clothing burned completely from her body, which was badly burned. She was recognized by the police as Bridget Gor-man. She said that Lizzie Brown, known to the police as "Liz the Man," had thrown the lamp at her. She died in 10 minutes.

The murderess is one of the worst characters of that class who carry on their immoral traffic almost solely among the Chinese, and is known in police parlance as a "revolver." She no sooner serves one term of imprisonment on the island than she is arrested again, and always convicted. Numerous efforts to reclaim her have been made by the missionaries of the locality, but to no purpose, and she has long since been abandoned by them as incorrigible.

The police began a search at once, an two hours later she was captured while hiding in a Bowery lodging house. She was unconcerned when arrested and simply remarked: "She tried to do me, and I did her. It serves her right." She was committed to the Tombs.

"Deny the Sacraments."

Boston, Jan. 7.-The decision recently made at Rome with regard to the membership of Catholics in certain secret societies is now in force in the archdiocese of Bos ton, in all the churches of which the following communication from Archbishop Williams was read yesterday by the pastors: "Our holy father has forbidden all Catholics to join the societies of Odd Fellows, Knights of Pythias, or Sons of Temperance. As to those who have already joined any of these sociaties, they are to be admonished to withdraw from them, and if they refuse to do so they are to be denied the sacraments."

Boston, Jan. 7. - Christian scientists yesterday dedicated a beautiful edifice, which cost \$250,000. So great was the interest manifested in the proceedings that the services had to be repeated four times in order to accommodate the vast concourse of people that had come from every state in the Union to participate in the event. The building is of brown stone, of Romanesque style of architecture, and is superbly finished in light oak, while the windows are of stained glass, representing various dogma-held by the scientists. The new church is entirely free from debt.

Costly Fire at Toronto. TORONTO, Jan. 7.—Early yesterday morning fire was discovered in the base ment of The Globe building, and flames were soon pouring from every window from basement to attic. Chief Ardagh and five men of the fire brigade were badly hurt and one of the men subsequently died. The Globe building was soon a complete wreck. The flames crossed the street to Harry Webb's restaurant and that building was gutted. McKinnon & Co.'s new wholesale dry goods store was also wiped out of existence. The total

Four of the Crew of Pilot Boat D. J. Lawler Found a Watery Grave. Boston, Jan. 7.-Pilot boat D. J. Lawer of this city was sunk by the schooner Horace B. Parker, of Gloucester, off Minot's ledge, and four of the crew of the pilot boat perished. Rudolph Harrison, the steward of the Lawler, was the only man aboard of her to escape. The sailors who were drowned were: Albert Laurine, aged 35, leaves a widow and two children; Augustus Larsen, aged 26; Charles John

son, aged 29; Seaman Andrews, aged 29.

The schooner Horace B. Parker came up the harbor yesterday in a badly damaged condition and brought the first news of the disaster. Her captain, William H. Inspector Williams Says They Inaugurated the Bribery System.

SUGGESTS METHODS OF REFORM

In Dealing With Saloons and Disorderly Houses.

NEW YORK, Jan. 8.-Inspector Williams in an interview yesterday gave his views concerning the police department. He "The police are not responsible for the system of trickery that has grown up. This started in the mercantile districts down town. There the shopmen bribed the policemen to allow them to leave goods of their overcrowded shops on the sidewalks in violation of the corporation

"The system of bribery grew. Certain hours of the day should be fixed by or-dinance, during which merchants could have reasonable use of the sidewalks to load and unload goods. They must be made to understand that they may leave boxes on the sidewalk only during these

specified hours." The inspector then took up the discussion of the saloon problem. He was willing to guarantee that with three changes in the present law every saloon would be closed during prohibited hours, that the traffic would be properly regulated and that there would be no bribery or blackmail of saloon keepers by the police.

How He Would Have It. These changes were that the shades and green blinds be taken from the doors and windows of the saloons, thus leaving the bar so that it could be seen from the outside by the policeman on duty; that there be no liquor license issued to any indi vidual, but that the sale of liquor be licensed in certain houses, the owners of which to be responsible for the conduct of the place, and in case of violation of the law the license should be withdrawn for three years, and that there be Sunday hours for opening under proper restric-

To put down the evil of disorderly houses, it was necessary to "stop making criminals of these women by law, and to localize the evil as far as possible." They should be made to understand that in certain quarters they would be free from mo lestation, but that to venture outside would mean imprisonment.

statement that a single head to the police department was out of the question. Its business was too large for one man to manage. The department should always be in charge of a bi-partisan commission.

Keep Cruisers Busy.

WASHINGTON, Jan. 8.-In execution of his policy of keeping the cruisers in mo-tion and away from home, Secretary Herbert has instructed Admiral Beardslee, commanding the Pacific station, to cause the ships attached to the station now at Mare island and ready for service to go to sea. The exact cruise of each vessel has not been specified. Doubtless the Monterey and the Olympia are ready to cruise at once. Aside from these there will be available for cruising in the course of a few weeks, the Philadelphia, Boston, Marion, Mohican, Adams, Alert and

The P. P. A. "Cut Ice." TORONTO, Jan. 8.-Municipal elections were held throughout the province of Ontario yesterday. The Protestant Protective association, an organization similar to the A. P. A. in American politics, had several candidates in the field, who were elected. In other districts the P. P. A. cast its strength with the candidate whom they thought most favorable to their views. As between a Conservative and Liberal nominee the former generally secured the P. P. A. vote.

Mystery Explained.

PHILADELPHIA, Jan. 8.—The mystery attending the disappearance of the schooner Helen Kellar, from Pascagoula, Oct. 4, which has not been heard of since her de-parture, was partially cleared up yesterday. The hull of the vessel was found stranded about 40 miles north of Vera Cruz. It is feared that the crew were lost.

FAMISHED WORKMEN

Demand Work or Bread From the Newfoundland Legislature.

THREATENED TO RAID A WARSHIP

But the Captain Succeeded In Calming Them.

St. John's, N. F., Jan. 8.-A crowd of about 3000 workingmen, who were thrown out of employment by the financial collapse, gathered before the legislative chambers yesterday. Later they formed into procession and paraded the principal streets. At the head of the procession was borne a white flag, bearing the words 'Work or bread."

The movement created consternation At first the police prepared to disperse the crowd, but as their actions were peaceful nothing further in this direction was done. After hooting the government, the procession went to the dry dock, where the British ship Conrmaline is, which was sent here to help preserve order.

A committee of the unemployed boarded

the ship and represented to Captain Poore how they and their families were starving. They declared that they were willing to work, but if no work was available they insisted that the government should feed them. Then they threatened to take the necessaries of life from the stores.

Captain Poore intimated that such at-tempts would be repressed with a stern hand, his orders being to preserve the peace and to allow no interference with private property. He, however, expressed his willingness to help the workingmen as far as he could, and he promised to write to the government, presenting their case and urging that help be extended to them. He said that he would have an answer today to his letter, and would ommunicate it to them. With this assur ance the delegation withdrew.

An Appeal to the Government Starvation is becoming more genera daily. Several poor families were evicted yesterday. This adds to the misery of the situation. The government was waited on by a business committee of the clergy of the various churches. In reply, th government said the arrangements were making to provide employment for the re lief of the people. Lady O'Brien's committee started two soup kitchens yesterday. The government officials are happy, owing to the fact that gold is here with which to pay their salaries. The Opposi tion press made a point against them, de claring that they are securing their own salaries, while taxpayers are perishing.

the general or the water debt? Mayor Necessary for choice, Hodges' figures show that the maturing debt of 1895 is \$52,451.00, but he is committed to the "immediate construction of two new schoolhouses, the loans for which have not been authorized. He also says "now is the time to go to work in earnest" on a sewerage system. The maturing water debt is \$25,000. The Mayor says an additional supply is requisite and the water service must be extended. If any appropriation is made it will be at least \$30,000 and perhaps \$60,000 or \$90,-000, so the prospects are the water debt will be increased. The playground debt will be decreased \$1,000, but a large annual assement for State reservations will take its place. Although \$78,451 of the debt will be paid off this year, there will probably be no reduction in the general debt. The city, however, is very nearly \$100,000 within its debt limit.

There is a possibility of a slight reduction in the tax rate in the natural course of events, because the amount of debt maturing is smaller, and the net income of the water department should be larger, but the rate will not drop in 1895 as much as it increased in 1894.

An Unexpected Opposition to Reelection of President Bars.

WARD SIX AGAINST WARD ONE.

A Special Election for Ward Three Ordered for Feb 5.

Not a few were surprised Monday at the opposition among Republicans to the reelection of President Bass. He was the unanimous choice of the Republican caucus, and most people thought the matter settled, but for a day or two before inauguration there were forebodings of a storm, and Mr. Bass is said to have trembled over his chances. It is evident to anyone who has been in Atlantic since election that Ward Six feels bitter against bute it to President Bass, a resident of and report at the next meeting. ENDORSED BY DEMOCRATS. No Assurance, However, That the Carlisle

Currency Bill Will Pass. WASHINGTON, Jan. 8 .- By a vote of 81 to 59, the Democratic house caucus voted yesterday to endorse the Carlisle substitute currency bill now before the house. Speaker Crisp took the lead in presenting the resolution and in vigorously urging the necessity of its adoption.

The committee on rules was instructed

to bring in a rule at once to close the de-bate. Efforts to amend Mr. Crisp's resolution were voted down, one of the adverse votes showing only 13 members of the caucus favorable to an issue of bonds to retire the greenbacks.

The result of the caucus is accepted with considerable apprehension by friends of the bill, notwithstanding the passage of the resolution of endorsement. The 81 votes which the measure com-

manded in caucus are far short of the number necessary to pass it in the house. It is believed, however, that many of the 59 votes recorded against the resolution will the Woodward Fund and Property, which be changed, now that the Carlisle bill has the prestige of caucus endorsement. But there were several prominent leaders who asserted at the close of the caucus that the vote showed conclusively that the bill could not pass.

The senate adjourned shortly after 3 o'clock as a mark of respect to the memory of Representative Post of Illinois. A speech by Mr. Peffer in support of a service pension law for the benefit of soldiers and sailors of the late war, and another by Mr. Mitchell in behalf of the Nicaraguan canal bill, occupied most of the time of the session. AMESBURY, Mass., Jan. 8.—The controversy between Frank B. Sanborn, a Boston journalist; S. T. Pickard, Whittier's historian, and Dr. Quint, editor of The tier's ancestry, is attracting great attention here, where he lived for 50 years. A life-long friend of Poet Whittler states that Messrs. Quint and Sanborn were be the next Republican candidate for probably right in asserting that Whittier did not descend from Stephen Batchelder, a clergyman at Hampton, N. H., in 1633, the claim made by Pickard in the poet's genealogy.

Afraid of a Flood.

PITTSBURG, Jan. 8. -River men are thoroughly alarmed over the probability of a big flood at this point. The Monongahela came out with a rush yesterday, and with damage to boats began. Immense coal fleets are threatened with total destruction. The Allegheny is also full of ice and is running like a torrent. A great

The Business Prospects and the Situation Today of Granite Business.

McDonnell & Sons have put on men and show signs of a return to something like old time activity. They have on hand a monument to be erected to the memory of John Q. A. McDonnell who died in Buffalo, New York, last year. The design is of collosal dimensions and promises to be one of the largest memorials that has been cut in Quincy for a long time.

The grading of Liberty street has caused Wm. Spargo & Sons to raise the elevation of their sheds, and make other internal alterations. Throughout the whole business depression, this firm has been unusually fortunate in securing work.

According to many of the industrial prophets, the coming spring will usher in more prosperous conditions for the granite trade than it has realized for a considerable period. If these roseate predictions are realized it will be indeed fortunate for those engaged in any capacity in this line. One very remarkable feature of the situation this winter contrasted with that of last, is the absence of cases requiring public relief. It is doubtful if there are so many men employed at present as there were at the same time last year. It is admitted that the work during the season just closed, has been more precarious and unsteady than in the more immediate previous seasons, and yet there are not the same sad appeals for help nor does there seem to be such a hopeless spirit of depression, as was manifest last winter. An air G. An Italian Suggests That Latin Be Used Decidedly the question of a universal language of medicine is in the air. During the last few months we have

had occasion to refer to several proposals of the kind. Now comes another, this time from Italy. Dr. E. Vitali of Bari has addressed a long letter to the Italian minister of public instruction, Dr. Baccelli, inviting him as president of the international medical congress to propose to the organizing committee that Latin be recognized as one of the official languages at the next (Moscow) congress

and as the sole official language at all

future congresses, beginning with the

fourth from the one held this year in

Dr. Vitali's argument is, briefly, that while all medical men have some smattering of Latin comparatively few know any modern language but their own. Very few understand all the languages used at congresses, which hence serve to give an idea of the tower of Babel as far as confusion of tongues is con cerned. However bad may be the Latin spoken, it will always, Dr. Vitali maintains, be more intelligible than any one modern language to the largest number, and that, after all, is the main point, For any one really in earnest in the matter there need be no difficulty in acquiring sufficient fluency in Latin for

the purpose in view.

Dr. Baccelli has sent a diplomatic reply to Dr. Vitali's communication, in which he promises to give the subject proper consideration, etc. There, so far as we know, the matter rests, and there, we imagine, it is likely to rest. There would unquestionably be many advantages in the revival of Latin as the lingua franca of science, nor does the scheme involve any insuperable difficul-

In an interesting article in The Temple Bar it is stated that the celebrated Dr. Bozzi Granville, when he wished to enter the English navy, had some difficulty about his examination at Haslar, as none of the medical staff spoke any European language but his own. At the suggestion of the surgeon of the Raven, whose communications with his assistant had been carried on in Latin, that language was employed. The Italian doctor passed triumphantly.-British Medical Journal.

Tale of a Bad Little Boy.

There was once a pretty urchin-Hair and eyes as black as jet— But he squandered all his pennies On the nasty cigarette.

Yea, he smoked them by the dozen, And he smoked them by the score, Till his face was sadly altered,

And his father stormed and threatened And his mother pleaded, yet He just shook his head and fumbled

And his eyes grew dim and misty,

Tillat last he grew the color Of a walnut overripe, And his mother couldn't tell him

From a corncob pipe!

THE MODISTE. Cutaway jackets of velvet are much liked by young girls. The boa seems to be less in deman

than the cape or a very stylish collar. Sleeveless jackets of various materials with passementerie edgings are popular. A dress of cloth with a narrow moire

coming winter without other furs. Capes of moire are trimmed with for collars and lined with bright silk. One of the handsomest of these garments was recently made to order and lined with very stiff brocade.

Ermine, from becoming popular, has become a fad, and every woman who has noney to buy it wants ermine in some form or other. The only difficulty is its scarcity and extravagantly high price.— New York Ledger.

Change.

The changing seasons come and go, From summer's heat to winter's snow. When laughing, dancing June is here, We think her best of all the year.

But when we tire of dance and song. And summer days grow dull and long, We glad exchange her drowsy heat oming autumn's cool retreat.

We ever long for something new. Ambition climbs for broader view. So fain the boy a man would be, Then king or lord of high degree.

The summit gained, we look beyond. Our sun goes down while we despond, And darkness closes now the scene, The evening and the dawn between. -Stephen Marion Watson

Fireside Councils. Weman's present addiction to "resoluting" and to the platform consideration of abstruse questions of state, society and morality rather forces the quiet reflection that the home fireside is one of the best places on earth for woman to hold her councils. STEVENSON'S DEATH.

The Scenes During His Last Moments Described In Detail.

UNION JACK WAS HIS SHROUD.

Touching Evidence of Grief of Samoan Chiefs.

LONDON, Jan. 8. - The letter which Lloyd Osborne, the stepson of Robert Louis Stevenson, has written to Sidney Colvin, describing the last moments of the novelist, says: "When we returned from summoning the doctor it was dark, the lights were lit in the great room, and Louis was lying on a chair, breathing very laboredly. He was unconscious from the beginning, and for about an hour we waited about him seeing his life ebb away. He was dressed in his sailor's jumper and trousers, and kept his high color to the

"When he passed away we lowered the Union Jack we fly over the house, and covered the body with the flag he loved. "It is a cause of thankfulness that death me suddenly, finding him busy and

"It was just at sunset and time for din ner, and he and my mother were prepar-ing some little delicacy together, a salad for the evening meal. He got up a bottle of extra wine, too, for this little feast, some of the old Burgundy that he prized. My mother caught him as he suddenly seemed to turn faint and giddy and asked her: 'Do I look strange?' and she tried to reassure him. As she managed to get him into the great room and into the chair he showed her where the pain was in his head and this was his last consciousness.

Samoans Deeply Grieved. "There he lies now in the big room with the flag cast over him, his hands joined together across his breast, and our poor people showing the last signs of respect within their power by watching the night

out where he lies." The writer, under a later date, continues: "My previous letter was inter rupted by several of our truest Samoar chiefs, with their last presents for Louis, the fine mats that the body of a grea man must be wrapped in. All night they sat around his body, in company with every one of our people, in stolid silence "It was in vain that I attempted to get them away. 'This is the Samoan way, they said, and that ended the matter

They kissed his hand one by one as they came in. It was a most touching sight. You cannot realize what giving these mats mean. They are the Samoans' for tune. BAY STATE LEGISLATURE.

The State House Reconstruction Problem Examination of Teachers. Boston, Jan. 8. - The members of the

Massachusetts senate and house of representatives met at 2 o'clock yesterday, and began the regular business of the session

In the house, Representative Grover of Canton presided in the absence of Speaker Meyer, who was absent on ac count of sickness. After prayer by the house chaplain, the list of appointments to the various committees, prepared by Speaker Meyer, was read by Clerk Mc-Laughlin. Certain portions of the gov-ernor's inaugural address, calling for special legislation, were apportioned among the various committees having jurisdiction therein. The members then for seats.

The following representatives we placed on the various house committees by the speaker: Irwin of Northampton on judicary and rules; Bliss of West Spring field on probate and insolvency and elec tions; Warriner of Springfield on finance; Wakefield of Amherst on agriculture Mills of Fall River on cities; Phelps o North Adams on constitutional amendments; Penniman of Brockton on educa tion; Eddy of New Bedford on fisheries and game; Young of Springfield on insurance; Ross of New Bedford on labor; Grant of Chicopee on manufactures; Denham of New Bedford on prisons; Stanley of New Bedford on railroads; Perkins of Springfield and Jenks of North Adams on roads and bridges. In the senate, President Butler opened

the proceedings with a few pertinent re-marks relative to the business likely to be considered. About the only feature of the day's session was the reading of the com-mittee appointments, after which the members drew for seats and then adjourned.

The legislature will, in accordance with the act of congress to regulate the times and manner of holding elections for senators in congress, proceed to the choice of a successor to United States Senator George F. Hoar on the 15th inst., which is "the second Tuesday after the meeting and organization" of the general court. The Democrats will throw a compli

mentary vote fors Hon. John E. Russell, and the Republicans will probably al vote for Hon. George F. Hoar, who will thus succeed himself. There is likely to be a vigorous contest between those who want a new front folened. At the last session the committee having the matter in charge stood 6 to 5

in favor of a new building at an esti-

mated expense of \$1,500,000, the minority

preferring an expenditure of \$500,000 for repairs. Only five members of the committee are in this year's legislature. The vandal has already begun his work, and in the person of a member of the great and general court, whose name is plainly to be seen scratched upon one of the desks in the new representatives

The report of the secretary of the state board of education on state examination and certification of teachers, in accordance with the plan adopted in October last, has just appeared. The system is in no way compulsory either upon the towns or upon the teachers, but to both it offers a relief from the necessity of new examinations when teachers change positions, and it puts it into the power of towns to adopt higher standards in their examina

Congressman Sibley Sharply Attacks Administration.

WASHINGTON, Jan. 9. - Senators who have predicted rather freely heretofore that there would be ne currency legislation talked in a more favorable way yesterday and hinted at a possibility that some-thing might be done, though they did not know just how or what.

Senator Jones of Arkansas, a member of the finance committee, was asked if he was not of the opinion that there was no

"Possibility is a strong word," he an-

"Probability, then?" "Well, now," he said, "I will say that hits my views. I do not think there is any probability of legislation. It is possible however, that conditions may arise which will bring men of very diverse views together on common ground, and that legislation, without political or personal ad-vantage, purely patriotic in its nature, might be enacted. I do not think this is probable. For my part, I would sacrifice a great deal to get on that common

Democratic friends of the measure conand that some members who opposed it in caucus will vote for it in the house. Carlisle Is Hopeful.

Mr. Carlisle remained in Speaker Crisp's private office throughout yester-day afternoon, and saw those most active in support of the bill. No effort was made to conceal from him the doubt the house managers had as to the passage of the

Mr. Carlisle was apparently as hopeful as ever, however, and expressed the belief that the bill would pass. THE YOUNG city of Medford has a debt of over three quarters of a million, but Mayor Perry is not at all cast down. He believes in progress, and the city has water, sewers and playgrounds, and these are obtained on a small tax rate. The rates for four years have been: \$14.60, \$14.80, \$15.80 and \$14.80. - In his inaugural Mayor Perry said :

The funded debt has very largely increased, and must be still more largely increased for the undertakings already underway to say nothing of what sooner or later must be begun. But there is nothing in this that need create special anxiety. The expenses of the city must necessarily increase, for it is rapidly growing, and there must be anticipation and provision, as there already has been, for its greater future. BUTLL VICTIMS.

Eight Unfortunates Taken From the Cel-

lar of the Delavan Ruins ALBANY, Jan. 9. - The charred and lackened remains of eight victims of the Delavan House fire have been found in the ruins. Of the few remnants of bodies In the shape of fleshless bones and mangled trunks there were no possible means of identification were it not for the almost extraordinary fact that near the almost totally consumed fragments of human beings were found remnants of clothing that in two cases led to recognicontemplate taxing the salary per se or

Those so identified were the fragments of Simon Myers, the coffee man, identified by his vest which lay near the iron cot on which he had slept, and Agnes Wilson, a fluttering bit of whose brown and black dress served as a guide to the identity of the poor, mangled fragment that could hardly be called a body. Remnants of the eight bodies discovered are yet in the

Two of them were discovered on a mattress at the northwest corner of the excavation, but the upper part of them were pinned under some heavy beams on which rested a pile of bricks 30 feet high. The work of releasing them was not ac omplished when darkness compelled the men to desist from their labors. The other body was discovered when it was too dark

All the bodies were discovered within a space of about 12 feet square in the cellar amediately under the hotel kitchen and bakehouse and at the point where the rear staircase from the servants' attic terminated. The staircase, wide enough for only one person to pass another, was evidently as bad a flue as the elevator shaft. Escape was out of the question for either those in the attic or those in the cellar, and the fact that nearly all of the bodies have been found on beds leads to the supposition that they were suffocated while they slept.

In an investigation into the fire last night it was learned that it started in a pile of rubbish about 12 feet from the elevator shaft, and that an attempt was made to put it out, but it spread too quickly, and the engineer had to fly.

A Favorable Outlook HAVERHILL, Mass., Jan. 9.-The outlook in the strike situation seems more hopeful for a settlement. The state board of arbitration, it is understood, has made suggestions agreeable to both parties in the present controversy. Chick Bros. have taken steps to secure an injunction to restrain the strikers from engaging in further parades. The latter were expecting such a move, but they do not fear it, as they claim to have acted entirely within

Talked on Sugar Rates. NEW YORK, Jan. 9 .- The annual conference of the local appraisers of the United States was begun here yesterday. Ap- patch. praisers discussed the manner of examina tion and valuation of sugar. Some important crestions were considered as to the duty on tea, and also with reference to the administration of the several offices in the United States, so as to produce a uni-

Knotty Question Under Discussion by the Treasury Department Officials. A very knotty question has arisen in the preparation of the income tax regulations now under consideration by Sec. retary Carlisle and Commissioner Mil ler. It is at what point in the salary of United States official the income tax should be collected. Government dis-

the person who receives it? Only salaries above \$4,000 are taxa ble. A case has been put where if the ble. A case has been put where if the salary is, say, \$8,000 per year, and the drawer of it dies after six months, the government receives no income from it

this advertisement and other charges, by applying at the Ledger office for information. the difficulty is encountered that the drawer of the salary has not received over \$4,000, and therefore no income tax has accrued. If the drawer of an \$8,000 salary dies or resigns after receiving slightly less than half of the yearly salary, should the new appointee pay an income tax out of his little more than half of the \$8,000 or only on what

he himself draws? It does not seem to strike the treasury officials as fair that one man should pay an income tax on part of the salary drawn by another, and yet if such an amount were drawn \$3,900 by one and \$4,100 by another man by holding the latter responsible for the income tax on the salary he draws on the excess over the \$4,000 the government would receive only 2 per cent on \$100. Was this idea contemplated by the law? The same principle applies to all cases of salaries received by United States officials, mem bers of the cabinet, senators and men bers of congress and others who receive a salary in excess of \$4,000. - Washing ton Post.

flow the Prince of Wales Wet Blanketed HENRY L. a Proposed Demonstration.

The Prince of Wales, after four weeks' wandering, returned home from Russia looking, for him, very lean, but withal hale and fit, as is his customary appearance. There had been some preliminary talk of giving him a great popular welcome, such as that accorded to Lords Beaconsfield and Salisbury when they returned from the Berlin conference bringing with them, as the former dramatically declared, "Peace with honor." It was suggested that the prince performed a service to the country equally great by bringing about a good under: standing between England and Russia. Strange to say, the Tory newspapers, from the great Times downward, ap- from the district to other parts of the emplauded this silly idea, and clubland pire by the authorities.

The prince heard nothing of this until he reached Paris on the way home. Then he telegraphed to London expressing his annoyance at the scheme, which was not only indecorous in view of the sad duties from which he was returning, but imputed to him an interference with the ordinary course of diplomacy that was at variance with his inclinations and destructive of that position of neutrality as heir to the throne which he has always sought to maintain, like the tactful man of the world which he undoubtedly is. Word was therefore sent round, with the result that his wishes were respected as far as a demonstration within the railway station by the aristocracy was concerned.

There were plenty of notables present, but not more than a dozen persons were allowed on the reserved platform, and all contented themselves with bowing profoundly as the prince entered his closed carriage. A pretty big crowd, mainly bourgeoisie, had collected outside the station, and there was a good deal of cheering, but as a demonstration it was a failure, as it deserved to be. The Prince of Wales is too sensible a man to desire that sort of thing, for he knows it is calculated to provoke counter displays and make him an object of contention among rival parties and conflicting factions .-- London Cor. Ample Waisted Women. A noticeable feature of the recent

gathering of Sorosis at Sherry's was the large number of classically ample waists tion which was almost conspicuous to see a painfully compressed waist girth. Many women wore artistic gowns that were palpably fitted over health waists, and even those whose figures were corseted showed no evidence of being under any serious pressure. The assemblage was wonderfully well dressed and was therefore an excellent field for the study of the appearance of hygienic dress. It is through club women that may truly say. The style and elegance tated modistes would follow. So many women are insisting that their clothes shall be made on hygienic models that many dressmakers now systematically adapting the prevailing fashions so skillfully to the comfortable model that to the casual observer the customer appears dressed entirely in style. - New York Times.

The New Colors.

To be fashionable, brains are necessary this season. Even in the matter of the new colors it requires time and study to be able to talk intelligently and with graceful ease about a "coquelicot" waist, for instance, or a new stock of "pervenche." To the woman who is uneducated in the matter of fashion purchasing her winter wardrobe will indeed be a burden.

In order that she may know the new colors by name, here is a list of the latest, with their definitions: Neapolitan is a violet shade of the popular bluet, jacquiminot is the color of the rose after which it is named, highland heather is an exquisite shade of pinkish heliotrope, cravette is a delicate yellowish pink, ficelle is a thread color, coquelicot is a bright poppy red, pervenche is a light shade of mauve, tamarind pink looks much like orange, Lincoln green, serpent green is a brighter color. rouille is a rather light reddish brown and havana is a rich russet brown. These are the principal colors which the latest materials show. - Philadelphia Inquirer.

Making the Silk Gown.

The skirt will be bell shaped: the waist a round one, with leg of mutton sleeves, each containing four vards of material: round waist of cherry, bluet, yellow, green or mauve satin or grosgrain, with a crush collar of velvet of the same color; braces of jet only or of the black silk covered with jet; loose Fedora front dropping in French fashion over the front of the belt of black jetted gauze. Another style shows a yoke of tucked chiffon, black over cherry silk and a cherry velvet collar. Below the yoke is draped a jet corsage ornament finished with a fall of "rain" fringe. Others have a yoke or collar of jet vandykes with bead, spangle and nail head effects over a colored silk voke. as one of bluet chiffon, forming puffings between each point. A French model shows the upper part of the silk waist slashed to show a colored lining beeath and the slashes edged with nar row jet. In some cases the sleeves are slashed to correspond. Belts of silk velvet or ribbon are worn. -Ladies' Home

A Woman Parliamentarian

The adoption at the recent meeting of the New York state woman's clubs in this city of Mrs. H. R. Shattuck's 'Woman's Manual" as the authority of the newly formed state federation in all parliamentary matters was a compliment to all women and a deserved compliment to one in particular. Mrs. Shattuck understands official and legislative red tape as most women do chiffons, and it is quite right that her admirable brochure should supersede "Cushing's Manual," at least in all gatherings of women. The New Jersey state federation also adopted it a few days ago.

Boston's Woman Voters.

The prediction that the foreign born women would be the first to rush to the polls is one of the most frequent arguments against woman suffrage. Yet, after 15 years of school suffrage in Boston, the Boston Herald says, "It still remains a conspicuous fact that the registration of women voters in the wards where the great bulk of the foreign population of Boston resides is almost nil. On the other hand, about 10,000 native born women register every year and have practically controlled the election of the school board for years past.

College Women's Votes. The college communities in Kansas showed at the recent election that among intelligent people woman suffrage finds its strongest support. The Second (University) Ward at Lawrence and the Manhattan college precinct gave majorities for amendment. Lecompton, where Lane university is located, gave 46 majority. Baldwin, out of a population of

1,000, gave a majority of 195. Baker

WASHINGTON, Jan. 10 .- The Carlisle is complete. eurrency bill, which has been under debate in the house for about two weeks, was ditched yesterday. It had not strength enough to surmount the first parliamentary obstacle placed in its path.

The advocates of the bill were a very large trade. dumfounded when they discovered that they had been beaten in the preliminary skirmish, and the order was withdrawn. This was the first reverse the committee on rules had suffered in four years.

An analysis of the vote shows that all of the 124 votes in favor of the motion were cast by Democrats, while 82 Republicans, 39 Democrats and 8 Populists voted against it. Of the 39 Democratic votes against the motion, it was pointed out that 24 were cast by Democrats defeated

Will Let It Rest.

Now that the rule was defeated, Mr. Carlisle agreed with the house leaders that it was desirable to let the bill rest for a time. He did not suggest any new measure or any material changes from the present one. It appeared to be the idea, however, that efforts should be directed toward turning the objections of those Democrats who had voted against the rule, in order that these objections might be overcome if possible.

After the conference Mr. Springer said that while some concessions might be made in the interest of harmony, yet no ncession could be made on the basis of giving the silver men everything they wanted. "If Mr. Bland and his friends will not give us their assistance except on condition of silver at a ratio of 16 to 1 then they must shoulder the responsibility of the defeat of all legislation, as no shop at the navy yard were discharged such inconsistent compromise is possible."

Woman of Experience Says, "Mothers, Live Close to Your Little Children." It has always been a mystery to me how mothers could deceive their chilters and even church. I have seen mothers get some one to take the attention of the little ones while they would slip off. The baby would cry when it knew its mother was gone. The little ones are thus taught deception before

From long experience I think the best way is to tell them you are going, but them where you are going. It seems to satisfy the child, and it will tell others mamma has gone to such a place, but she will come back as soon as she can Mothers make a great mistake when they do not live close to their little ones, and when they begin to talk it is time to begin to teach them their letters. They will learn easier then than at any other time.

It is a very easy task for a mother to point to the letter A and say, "This is A for apple, this is B for baby, this is C for cat, and this is D for dog." Get it once fixed in the child's mind, and it never forgets. I taught all my children in the second reader when they were

4 years old. The professor at our academy once said to me: "There are but two families who patronize my school that teach

than any teacher. She can make a play of teaching by spelling words on blocks that have letters on them. Some of my children became so anxious to learn the alphabet that they would ask me the mine when they do so much work mornings and evenings and mine don't do anything?" I said: "I think it is the work that helps them. I let them help me, and it does them good. After they work at some light work an hour or more they will sit quiet and study their lessons much better than when they do not work. And I think it is of as much importance for childen to learn to work close to your little children, for of such

made acquaintances will show up to a woman (the men would go, of course), and that she will be pestered to death by requests for invitations by people who have pretended not to know her. If she takes the advice of an old stager, she will turn a deaf ear to all such importunities and ignore them

completely. The second ball she gives will be more crowded than the first, and so o ad infinitum.

It is intimated that Mrs. Gould has a society press agent. Banish the thought! What she should have, if she hasn't already-and I think she has, judging from the recent horse show-is a committee of "Little Brothers of the Rich," a guild of impecunious dudes of good family and position. who are of inestimable value to rich

Once on a golden afternoon, With radiant faces and hearts in tune, Two fond lovers, in dreaming mood, Threaded a rural solitude. Wholly happy, they only knew That the earth was bright, and the sky wa

blue; That light and beauty and joy and song Charmed the way as they passed along. The air was fragrant with woodland scents, The squirrel frisked on the roadside fence, And hovering near them, "Chee, chee, chink? Queried the curious bobolink, Pausing and peering with sidelong head, As saucily questioning all they said, While the oxeye danced on its slender stem, And all glad nature rejoiced with them.

Over the odorous fields were strown Wilting windrows of grass new mown, And rosy billows of clover bloom Surged in the sunshine and breathed perfame Swinging low on a slender limb, The sparrow warbled his wedding hymn, And balancing on a blackberry brier The bobolink sang, with his heart on fire: "Chink! If you wish to kiss her, do! Do it, do it, you coward, you! Kiss her! Kiss, kiss her! Who will see?

Fluttering lightly from brink to brink, followed the garrulous bebolink, Rallying loudly with mirthful din The pair who lingered unseen within. And when from the friendly bridge at last Into the road beyond they passed Again beside them the tempter went, Keeping the thread of his argument: 'Kiss her! Kiss her! Chink-a-chee-chee! I'll not mention it! Don't mind me!
I'll be sentinel. I can see
All around from this tall birch tree!" But, ah! they noted, nor deemed it strange, In his rollicking chorus a trifling changed, 'Do it, do it!" with might and main

LONDON, Jan. 10 .- Henry De Windt, the traveler and journalist, refutes the statements of George Kennan in regard to Siberian prison life. He gives a surprisingly attractive picture of the prisoners in Siberia. Describing a typical political prison, that at Akatu, in the Nertchinsk mining district, he says that the prisoners are confined in roomy, well-lighted and warmed cells, decorated with jugs filled with flowers that had been picked by the prisoners while en .route to their work in the mines, a mile distant.

The convicts march to their work daily, moking and singing choruses. They have three good meals daily and are supplied WEYMOUTH LANDING-W. E. Cun-with an unlimited quantity of beer at dinner. Only three of the prisoners were chains, which weighed seven pounds, and these were removed during their work in BOSTON-Old Colony News Stand after the mines. The condition of the mines is quite as good and the labor less than in English mines. The men sleep on mattresses and pillows. There is no work done on Sundays and saints' days, and concerts and plays are given.

A Few Examples. Mr. De Windt gives the following instances to show the cheerful existence of even the most desperate convicts: Gottze, the leader of the Yakutsk prison mutiny in 1889, lives in a large, well-lighted cell. He is supplied with writing materials and receives parcels of Russian, French, German and English books. His wife of man's nature. lives in the village, and is allowed to see

him weekly. Slavinsky, one of the heads of internal nihilism, who was implicated in nearly all the recent explosions, is in similar quarters. He also receives books, and has his own medicine chest. Emillanoff, who was implicated in the

murder of Czar Alexander II, now lives at liberty at Kharovsk Kaloujin. An ex-officer of the navy, who attempted to blow up the czar's yacht, serves in a bank and has a circulating library.

Topic For the Week Beginning Jan. 13. Comment by Rev. S. H. Doyle. Topic.-Soul hunger and soul food.-Ps.

In this psalm the psalmist pours out the longing of his soul for the communion of the sanctuary and points out the blessedness of those who dwell therein. fainteth-for the courts of the Lord; my heart and my flesh cry out for the living God."

This is only an expression of a universal feeling possessed by mankind. Men the world over have soul hunger. Their hearts and their flesh cry out for the living God. There is indelibly stamped upon the heart of man the belief in a supreme Being above and beyond himself, and there is an earnest longing in every soul to come into the proper relation to this Being. This is evidenced by the fact that all nations have believed in a God and have had some way by which they thought they could approach their God.

This soul hunger is an evidence that there must be such a Being. If not, whence came this universal belief in Copeland street. Scientific test free. 23 if Henry L Kincaide & Co. God, and this universal longing after God, and this universal attempt to worship God in some way? We can only explain it in one way, and that is that there must be a God that meets this idea and want. To perform its work in life the eye must have rays of light, and we have the rays of light; the ear must have waves of sound, and we have sound waves. The human soul craves and demands a supreme Being over and above it, and is it possible that while the eyes have light and the ours sound there is nothing to satisfy this intense craving of the human soul for God? Such a thing is not possible. There must be something to satisfy this need

of man's nature. And there is something, and that omething is Jesus Christ, the bread of life, of whom, if we eat, we shall never hunger, and of whom, if we drink, we shall never thirst. There is a God to satisfy this longing of the soul, and Christ, the Son of God, pointsus to Him. We may not understand just how Christ satisfies this soul bunger, but this should not worry us. We do not know just how and just when bread becomes life to the body, and yet we know it and eat it. So we know Christ can satisfy this "taste and see that He is good," for He Himself has said: "I am the living bread, which came down from heaven If any man eat of this bread, he shall live forever" (John vi, 51).

Home Missions and Christian Endeaver. In the report of the executive committee of the American Missionary as sociation mention is made in several places of the work of Congregational Christian Endeavorers in connection with home missions. In the work of the Congregationalists with the poor people of the mountains of eastern Tennesse and Kentucky a large portion of the time and strength has been spent in sys tematic Christian Endeavor work Many societies have been established and great good will be accomplished, as these societies will doubtless develop the possibilities of their neighborhoo until a church is the result.

Many Christian Endeavor societies have been organized by the Indians who have gone out from the Indian schools under the control of the Congregation alists, and in this work the Indians are exceedingly zealous. The committee also notable increase in the contributions of Congregational Endeavorers to home missionary work and declares that the spread of these societies in the various departments of that work is a mark and means of great progress. -Golden Rule

Impressions Last,

Said a venerable old gentle-man, therefore be careful of the first impression. On en-tering a strange house one gets his first impression from the hall. If this looks bare the impression is bad. The hall should be furnished; not of course with bric-a-brac and rocking chairs, but appropri rocking chairs, but appropri-ately; that is, with a simple, solid oak hall stand. They are rich and handsome, very convenient, fully furnish the hall and wear a constant air of welcome. Our prices, \$7.75 to \$22.50.

> Led Lorenzo Gabrusso to Commit a Dastardly Deed.

NEW HAVEN, Jan. 11 .- Raphael Delgrego, an Italian, aged 20 years, was murdered last evening by Lorenzo Gabrusso, another Italian. Gabrusso and a friend were playing a game of pool in the saloon WOLLASTON-Ross' news stand and and store of Amorilla & Delgrego at 54 Hill street.

ATLANTIC - Brancheid's News Agency They became engaged in a quarrel, and young Delgrego, the bartender and clerk separated the men and put Gabrusso out of the place. Gabrusso attempted to enter, but Delgrego placed his hand against his SOUTH QUINCY-Peter Haverly and by breast and told him he could not enter the store. Gabrusso then drew a long knife from his belt and plunged it into Delgrego's breast near the heart. Pulling it out, he ran down Hill street and

> Has Not Been Seen Since. The bleeding youth was removed to his room above the store and the police and Dr. Mailhouse notified. The physician could do nothing for the wounded man, and notified Coroner Mix and Medical Examiner White. Before they arrived and within one hour from the time he was stabbed Delgrego died.

The murderer is about 25 years old, 5ft. 7in. in height, dark complexion, black curly hair, weighs 157 pounds, wore a sack coat and dark trousers. He was bare headed. The police of the surrounding towns have been notified.

The murderer was of an ugly dispos tion, and about a month ago assaulted a fellow-countryman with a razor, for which he served a term of one month in jail. The murdered man is highly spoken of in the Italian colony.

Women In Bondage.

Miss Floride Cummingham, a mem ber of the World's fair board of lady managers from South Carolina, made fine address at Asheville, N. C., Nov 15. She declared the serfs of Russia and the negroes of the south were free, but woman alone remained in bondage. The women do not aspire so much to sit in legislative halls as they do to vote for clean men to hold offices. Under existing circumstances, she thought, the women who were most admired by men were those who were most dependent, and it is this class of women that is opposed to woman's suffrage. She be sought the men of North Carolina to wake up and closed with a recommendation that North Carolina should send a delegate to the convention to be held in Atlanta in February, 1895. This closed the meeting, and those who heard went home thinking more probheard went home. frage than they had ever done before.

No debutante now considers her toi let table complete without the expensive and fashionable addition of a bonbon basket or box for fancy candies. The most elaborate ones are made of solid silver and have a monogram handsome ly engraved upon the lid. Very pretty ones may be made, however, of little fancy shaped wicker baskets (those shaped like hampers are the prettiest) Some have covers; others do not. They should be gilded, or, better still, painted with white enamel both inside and out When dry, trim them with loops of rib bon. When filled with candies or nuts these make very acceptable little gifts. -New York Telegram.

Wearing Jewels.

One interested in social customs and who has watched New York women for a generation or more must have been struck by the fact that New Yorkers have learned when and where and how to wear jewels. One may occasionally see diamonds worn during a round of morning shopping, but such wearers are conspicuous, and a woman who would appear at a hotel breakfast with her fingers covered with expensive rings would at once lose caste, no matter what MAGAZINE | would at once lose caste, no matter what her personal recommendations might be -New York Press.

The draft of the bill giving married women full control over the products of their personal industry has been approved by the committee of the French chambers. M. Premier Seddon Explains New Zealand's Samoan Offer.

EUROPEAN POWERS TURNED DOWN

For Making Inoffensive Men Gun Practice Targets.

WELLINGTON, N. Z., Jan. 12.-Premier Seddon, yesterday, in a speech in regard to Samoa, said that New Zealand's offer to administer the affairs of Samoa unitedly was approved by the Australian colonies The offer, he added, was made in a friendly spirit to all the powers concerned.

It was made with the knowledge of the United States, which country, the speaker claimed, was indifferent, and with the knowledge of the Germans, who had not advanced the colonization of Samoa. In fact their interest was growing less every year. The Germans of Australia, the premier insisted, were not averse to and did not consider the administration of Samoa by New Zealand to be detrimental to the interests of the fatherland.

Continuing, the premer said that action of two of the greatest European powers in using men-of-war to settle trumpery disoutes between a handful of natives was blot on our boasted civilization. It reflected upon "the traditions of our rac to find ranges for gun practice on unof fending savages, where a handful of policemen ashore could have stopped the

fighting.

Mr. Seddon also said that he regretted that Lord Rosebery had recently ridi culed the report that New Zealand had made an offer respecting Samoa. The offer was officially made in a constitu tional manner, and if ridicule was to b heaped upon New Zealand in order to conciliate Germany it would not tend to strengthen the bonds binding the colonie o the mother country.

New Zealand and the other colonies, he continued, had no wish to interfere with imperial interests or to complicate matters between Great Britain and foreign na tions, but it was of great importance to the colonies that the Pacific islands should be peopled with British subjects, and that they should not be made the "dumping ground of the criminal classes of Europe as in the case of New Caledonia."

publishes the following from its Constan tinople correspondent: There is no doubt about the essential facts of the Armenian outrages. The official reports from con-suls at Van, Erzeroun, Sivas and Diarbe kir have not been published yet, but they confirm the most horrible statements. In addition to the reports of Armenians and the Catholic and Protestant missionaries in Sassoun, we have testimony o Turkish regulars who took part in the outrages, and who, since their return, have boasted freely in public places of their deeds. For instance, one boasted that he had ripped open 20 pregnant women, while another declared that he took part in the

massacre of girls and women in a church,

their blood running in a stream from be-

neath the door. They state that such things are done with the suitan's full approval. Hundreds of these statements agreed on the essen-tial points. The features of the situation, which constitute the gravest possible danger, is that these men were rewarded, and Turkish officials everywhere understand that the sultan will reward them for similar treatment of the Armenians.

ALTERED NOTES.

The Charge Against the President of a Pennsylvania Savings Bank.

NEW YORK, Jan. 12 - William W. Wes ton, president of the Homesdale (Pa.) sav on an indictment charging him with having aided and abetted in the alteration of certain notes. The complainant is H. E. Simmons, a wealthy New Jersey contractor, who does business in this city. Simmons was at the head of a party

who wanted to buy a quantity of whisky before a high tariff was placed on that commodity. D. J. Kellam suggested the transaction, and four notes of \$6000 each were made. Kellam is now in the Tombs on a charge somewhat similar to the one against Weston. Kellam introduced Weston to Simmons

as a good man to purchase the notes. These were turned over to Weston and Kellam, who failed to dispose of them. Mr. Simmons then learned that the notes The Quincy & Boston street railway has were being offered for 75 per cent of their 12th to 13th and on the 17th to 18th. - cost money; that singing books had to be purchased a large piece of property on face value. so matter where you go, will show you how many, many people ought to be taking Carlsbad Sprudel Salt!

There's the thin, peaked face that tells of perverted nutrition. There's the fat, puffy face of flatulent obesity. There's the otherwise pretty face that's marred by skin disorders and eruptions; the yellow, haggard face of the dyspeptic; the dull, drawn faces of sufferers from stomach and liver and kidney

All these people need the Carlsbad Sprudel Salt. It goes to the root of the whole matter. It purifies the blood, dissolves obstructions, clears the system, and cures permanently, in a natural way, every derangement of the stomach, bowels, liver and kidneys. Beware of the many imitations sold as "improved or "artificial" Carlsbad Salt. These generally consist only of ordinary Seidlitz Powder and Glauber Salt, sold by unscrupulous dealers upon the reputation

of the Genuine Carlsbad Salt. The only genuine imported Carlsbad Salt has the signature of "EISNER & MENDELSON Co., Agts, New York," on every bottle.

SHEDS AND QUARRIES.

The Ledger Reporter Among the Granite Manufacturers.

It is said by some that if the bill of prices was settled, there would be no idle stonecutters the first of next month. Thomas & Miller have a number of nandsome granite monuments set up in

Swingle & Falconer are running their full complement of men, and only wish

that they had more room.

Milne & Chalmers are fairly busy for this time of the year, and are turning out some nice work in their polishing sheds. Swithin Bros. do not know what it is to have business quiet. They have agents on the road all the time, and the quality of the work turned out by them is a lasting

advertisement. When the new spur track is built from South Quincy to the quarties off Granite street the firms in that vicinity will enjoy transportation facilities equaled by none. Richards & Trowbridge are turning out some handsome new designs.

E. F. Carr has probab'y cut more monuments for the battlefield at Gettysburg than any other granite firm in the world, and it is no kind of a year when they do not cut one or more for this famous battlefield. F. Barnicoat is always a busy man and is

constantly turning out statues for all parts of the country. He is now busy at work upon a number, among which is another of those massive pieces of statuary, the

It is queer how different dealers feel about business. Some are continually crying down business, saying when asked, "I don't know how much longer I can hold out." It makes no difference whether business is good, bad or indifferent, their cry is always the same. Other dealers look cheerful and say they cannot complain as

they are getting their share of work. If all people were like the Shakers the granite dealers wou'd not have many monuments to cut. These people are peculiar in many things and one of them is the burying of the dead. The colony at Enfield have quite a large cemetery which is situated some hundred yards from their buildings and is enclosed in a circle of thrifty pine trees. The graves are in a row and at the head instead of a granite marker there is nothing but a piece of board upon which is painted a number. By consulting the record book in the office one may get some idea whose remains they are, and then again he may not, for the chances are that one outside of the family would not be permitted to make many investigations

Many of the granite dealers report that they have a number of orders on hand and that the outlook is good, but one great eason why more work is not now being done is the want of stock which cold weather makes it difficult to get.

HIDEOUS WASTE OF MONEY.

Testimonials For the Czar's Funeral That Were Costly and Useless.

There has certainly been a hideous waste of money in providing official testimonials of sorrow for the czar's funeral. The queen's wreath, which was of "enormous size," was sent from Windser to St. Petersburg in charge of Lord Carrington, the expenses of whose mission will have to be paid by the foreign office. -Frances Sargent Osgood. Shoulder to Shoulder With Men. A well known minister of Somerville recently said that he could not under-

stand why women did not take up the study of architecture. "A female architect," said he, "would be sure to put a closet somewhere near the kitchen sink, and thus save a thousand steps in a would have put closets in every room in the house and every one in a convenient place. Here is a line of work which is specially adapted to women, OLD COLONY SYSTEM. for they are naturally careful in details are generally artistic and could "learn the business" as well as a man. One of the most successful women in Boston is a dentist. A few years ago she graduated at the head of her class, and the only woman in it, and now she has a practice which gives her an income up in the thousands.

Druggists who will say anything on the subject are obliged to admit that women are admirably fitted to that work, and already there are about 300 successful female druggists in the United States. Of course there are many kinds of work for which a woman is totally unfitted. CHANGE HASN'T COME

Business World Waits In Vain For the Anticipated Revival.

ALL LINES SEEM TO HESITATE.

Decreased Demand For Cotton and Woolen Goods.

NEW YORK, Jan. 12.-R. G. Dun & Co.'s weekly review of trade says: Neither the beginning of the new year nor the failure of the currency bill has brought any material change to business as yet.

The idea that business would suddenly take a new start after the holidays had rather less foundation even than usual, but the hope of strong revival a little later s still cherished by many. The currency bill, with its possibilities of vicious amendments, was a source of apprehension to ome, but with that out of the way, the deficiency of treasury receipts remains, and exports of gold do not cease. Exchanges through principal clearing houses are 2.5 per cent larger than last year, but 24.2 per cent less than in 1893. There has not been much time for change in the industries, but differences observed

that stocks of different kinds of goods have been accumulating in consequence of past increase in production Low prices of iron at Pittsburg have checked business at the west, and are at tributed by some to the idea of purchasers that the recent reductions in wages and cost of materials must be followed by still lower prices. But the main fact is that consumption is below expectation.

since the new year began are not in the

direction of higher prices or larger demand.

There are more indications than of late

Shoe Business Unsettled. In the boot and shoe manufacture, in creasing disposition to restrict orders, where any advance in prices is asked, un settles the business, for while some manufacturers have orders for six weeks or more, most of them require further orders to run more than about two weeks. The uestion whether prices now demanded for leather are too high for healthy trade may be determined only after some em-

The cotton manufacture reports decreased demand, with print cloths down to 2.62 cents, printed staples much demoralized and lower, and wide sheetings generally reduced about 71/2 per cent. Many quotations of cotton goods are the lowest on record, the week's trade being quite unsatisfactory.

Trade in woolens hesitates because o large distribution from warehouse under new duties, but little change appears in prices, and heavy woolens are expected to open at about last year's quotations. The lemand for dress goods has been remark ably satisfactory until within two weeks, but has fallen off. Sales of wool, 5,236,715 pounds, against 5,805,500 two years ag indicates hopefulness among manufactur

The Grain Market.

Corn has risen 13% cents, and though receipts are but little over half of last year's the practical disappearance of the experi demand, then large, counts for about a much. Little attention is paid to the gov ernment report that the yield was only 1,213,000,000 bushels, and the advanced estimate for wheat, 469 267 416 bushels was treated as equally unimportant. As receipts of wheat have fallen to

1,305,704 bushels, against 1,818,582 last year, and Atlantic exports have become larger than a year ago, the advance of 11/4 cents in price is not surprising. Cotton is so low that scarcely any reason

is needed for a fractional recovery, but with 7,000,000 bales already in sight and the stocks abroad enormous, there is little to cause much recovery.

Failures this week are 420 in the United States, against 474 last year, and 54 in Canada, against 57 last year. Over the Border.

Bradstreet's says: Montreal advices report improving demand for teas and some other groceries and a firm demand for leather, but results of the past year's bills at that center are disappointing, few concerns having added to their capital, and many others have barely held their own, owing to the falling off of business, which corresponding decreases are in expenses.

Toronto reports a better wholesale business in some lines in the earlier portion of the week, seasonable weather having stimulated the demand for residual death; also portraits of his family and contemporaries and pictures of famous battle-fields; in all nearly fight for success she stands shoulder to the week, seasonable weather having stimulated the demand for goods and fabrics. At Halifax business is quiet in Begins in November and runs through eight all lines, and mercantile collections are only fair for the season.

BAY STATE LEGISLATURE.

But Little Business Transacted - Ward Option In Liquor Licenses. Boston, Jan. 12. - Both branches of the general court adjourned after less than half an hour spent in the consideration of

a few minor bills and petitions. In the house, Speaker Meyer being ill, Mr. Preveaux was called upon to preside. Included in the new business introduced in the house were bills making state election day a legal holiday and every Saturday a legal half-holiday; providing that where mortgaged property is insured by the mortgagee and is afterward destroyed, the insurance money, after the payment of charges, shall be applied toward payment of the debt of the mortgagor; providing that foreign corporations engaged in selling or negotiating bonds and mortgages shall be subject to the same laws as domestic corporations; providing that in the trial of criminal cases, where more persons than one are tried to-gether, the commonwealth shall have as many peremptory challenges as all of the defendants together; that a bushel of onions shall weigh 52 pounds.

A petition was received from the Boston and Lowell R 'road company for author ity to lease the Peterboro railroad. Mr. Mellen got his order for Saturday essions referred to the committee on rules In the senate the house amendment to

the report of the committee on rules, taking the Nashua reservoir matter from the committee on metropolitan affairs and giving it to the water committee, was as signed to next Wednesday.

A petition will be presented to the legislature in a short time praying that a law shall be enacted so that the various wards of the city of Boston will have the privilege of local option in the matter of licensing sa loons. It is believed that such a law would prove the key to a "Greater Boston," since many of the towns have expressed their objection to becoming a part of Boston on account of its license policy

Editorial Comment.

A Very Successful Beginning at South Quincy Yesterday.

In the First Presbyterian church on Water street, the union evangelistic meetings were begun Sunday, under the leadership of Mr. Lawrence B. Greenwood, the singing evangelist. Services were held at 10 30 A. M., 3.30 and 7 P. M., and the congregations mounted up from 200 to 400, and to 500-many extra chairs having to be put in at the evening service. The interest increased in greater ratio; and that the whole city is interested was evidenced by the presence in the afternoon of people from every section, from Atlantic to West Quincy. Especially gratifying was the large representation from West Quincy, both afternoon and evening; for it demon. Number Sixteen of a Series of Sketches strated that the third and fourth wards can be successfully worked in unison, according to the plan adopted.

In the morning the evangelist spoke forth the necessity of enduement of be, than himself. lievers with the Holy Spirit in order to prepare them for effectual service. And as the fruit of the spirit is love, the evidence that He is in possession of any soul is the manifestation by that soul of love toward God and man.

At the afternoon service Christ's first cleansing of the temple was used as the basis for a powerful plea for the cleansing of the church. The various forms of love of the world were depicted as cords of the scourge which must be applied to worldly professors of Christianity. "Come out from among them and be ye separate," saith the Lord."

In the evening the text was " Not as the world giveth, give I unto you." (John 14: 27.) What the world gives and what God gives were contrasted—the disappointments of the latter. At the close of the discourse, which was given without any seeking for effect, without exaggeration or sensationalism, those who could witness to the peace of God in their hearts were asked to rise; and a number of others who wished to accept Christ as their Saviour, and thus to obtain that peace which passeth understanding, also rose to

Then followed a most effectual aftermained. Those who wished for remembrance in the prayers one after another arose until nearly the whole company had himself a home on the corner of Arlington in a subdued voice, free from all excitement and from all attempt to excite others appealed to those who wished to accept Jesus as their Saviour to stand up in confession of Him. > WASHINGTON, Jan. 14 .- The prospect is that the time of the senate will be divided this week between the discussion of the income tax based on the urgent deficiency bill and the continuation of the debate on the Nicaragua bill.

Senator Cockrell, chairman of the com nittee on appropriations, is very hopeful ATLANTIC - Brancheid's News Agency of being able to dispose of the income tax question by the time the week shall be alf gone, and if he should succeed in this, Senator Morgan, who is in charge of the Nicaragua bill, thinks there will be no SOUTH QUINCY-Peter Haverly and by difficulty in securing a vote on the cana bill before the close of the week, thus leaving the way clear for the bankruptcy and territorial admission and other bills, as well as the other appropriation bills.

Chairman Cockrell does not regard se riously the prospect of a prolonged discus-sion of the income tax question. There will be several speeches, which, while based on the deficiency bill, will be di rected to the discussion of the genera financial questions. There is no disposition on the part of the appropriations committee to curtail these speeches, but there has come to be some talk of night sessions in case they get to be too numerous, or if the disposition to filibuster should appear to be more pronounced than now appears

probable. Senator Gorman will probably find oportunity to make the speech which he in tended to make Saturday. So far as known there are only three more general speeche to be made on the Nicaragua bill, but it is probable that others will be announced Senator Turpie will speak again on the bill, and Senators Vest and White have expressed a desire to be heard before the vote shall be taken. Saturday will be given up to eulogies on the character of the late Senator Vance.

The Week In the House. There is no definite program before the ouse this week. There is a bare possibility that a new currency bill will be thrown into the arena of debate, but it is only a possibility. The consensus of opinion eems to be that any proposed currency legislation, to be successful, must be initiated at the other end of the Capitol.

Today is District of Columbia day, and morrow the house probably will take up he consideration of the Indian appropris ion that was reported Saturday, which is the only appropriation bill on the calendar. If the sundry civil appropriation bil the most important of the appropriation bills) is not reported before the Indian bill is disposed of, the committee on rules tect herself from insult? Unfortunately there who at the critical stage of the tariff legislation took that matter in hand and har monized the different elements so as to bring definite results out of a decidedly one will advise, "Treat them with silent contempt." Well, that is the only bill, and he comes to the front this time. chaotic condition, is the author of the new promiser and harmonizer.

There has been objection made to the ills prepared by Senators Vest and Mc Pherson, on the ground, in the case of the Vest bill, that it leans too much toward silver, and in the case of the McPherson bill that it is too exclusively in the inter est of bonds. Senator Jones realizes tha silver and bonds are the two antagonizing elements in this question, and his for themselves of the publicity of this has been to prepare a measure which while it will not be all that the friends of either cause would naturally demand, will in the end secure the support of both el

He has been in consultation with many of the leaders of both these contendin lements in the senate, and it is understood that his bill, as outlined to them, has received very favorable endorsemer retribution, a man or woman of the from the representatives of all the conflict affronting kind would be required to ing interests. It is also understood that adhere to at least a courteous way of the terms of the bill are not unfamiliar to leaders in the house. Furthermore, it is probable that it has been brought to the attention of the proper authorities in the executive branch of the government.

Its Provisions. The bill will first provide for the isnance of 21/2 per cent bonds to the amount of \$500,000,000, which are to be paid in gold and are to be used both for the purpose of meeting the current expenses of the gov ernment and the redemption of United States and treasury notes.

The bill will also provide for the issunce of bank notes to take the place of the treasury notes in such way as not to proluce a contraction of the currency Another provision is that the national banks shall be allowed to issue up to their par value, and the tax on national bank irculation is fixed at 1/4 of 1 per cent. In the interest of silver, the bill provides for its unlimited coinage under the ndition that the holder of silver bullion may take it to the mint and have it coined

THE LATE MRS. ASTOR.

Out Off In the Flower of Her Youth, She Died In a Strange Rand. Had Mrs. William Waldorf Astor lived and died in New York, her natural and proper home, her death would

have been reckoned little short of a general calamity. As her husband saw fit to expatriate himself and cultivate an indifference, if not a positive hostility, to everything American, except the huge income he derives from his native soil, Mrs. Astor's death will cause a slight sensation

in England and a faraway feeling of regret in New York. Mamie Paul was scarcely fitted to be the wife of the cold, proud, sensitive man who was head of the greatest fam-

ily and fortune in American. She was an extremely simple and unaffected girl, who cared as little as possible for pomp and ceremony and still less for gewgaws and jewels.

She would have made an admirable

wife for a business man of moderate

means and would have adorned a cottage with more grace and interest than he displayed in presiding over the splendors of Cliveden. She was forced by her husband into a foolish quarrel with the other branch of the Astor family, and after that was just

as willing to live abroad as among her Her married life could not have been disappointment, though, for she had four charming children and was a most

loving and devoted mother. Cut off in the flower of her youth and beauty and dying in a strange land, her short career may serve as a lesson on the mutability of fate to those young women who cried their eyes out with envy and disappointment when her engagement to Willie Astor was announced.

The Astor family certainly deserves all the commiseration it should receive, for it has been getting some pretty hard and undeserved knocks of late. - Cholly Knickerbocker in New York Recorder.

WOMEN IN BRITISH POLITICS.

They Are Conducting a Three Cornered Campaign For the Premiership. The influence of women in the high places of British politics has not been

conspicuous in this generation. This fact adds interest to the particularly warm feminine campaign which has been waged ever since Tory minds became convinced of the probability of an early return of the Conservative party to powof Napoleon, showing him from youth to death; also portraits of his family and contemporaries and pictures of famous battle-fields; in all nearly most brilliant women in Great Britain are the leaders of rival hosts which with in the higher circles of Tory society are keenly pressing the claims of their respective champions.

These ladies are the Duchess of Devonshire, the Marchioness of Salisbury Miss Balfour. It is not an exaggeration to say that the ambition for the party's leadership of the three men whose names these ladies bear has been allowed to rest in their hands as far as seeking support within the party is concerned. It is no vulgar political canvass, but rivalry none the less genuine and important. Those who know the three women credit the Duchess of Devonshire with greater skill and cleverness in political affairs than her husband or indeed most of the other party leaders, but most people agree that her present task is beyond her powers.

The situation most favors Miss Bal four. The ardor with which she is championing her brother's cause is exciting a good deal of admiration, albeit she succeeded somewhat in offending her aunt, the Marchioness of Salisbury, by the warmth of her advocacy. It must 30 Lafayette Place. New York. be admitted that Mr. Balfour's following within the party is now consider ably stronger than Lord Salisbury's .-London Letter.

> Perfect House Unearthed Near Pompeii. A valuable discovery has been made at Pianella-Setteimini, near Pompeii, on the property of a certain Vincent de Prosco. A house has been unearthed which was covered at the time the city was buried, and it is said to be in a more perfect condition than any building yet discovered. It contains several large apartments and three bathrooms, with the basins in sculptured marble, and with leaden pipes ornamented with bronze faucets. The three rooms correspond, says a writer in describing the discovery, to the "calidarium, tepidarium and frigidarium which were always to be found in ancient houses of the first class. In consequence of the eruption of Vesuvius in A. D. 79 the Pompeiian houses brought to light heretofore have been roofless almost without exception. Fortunately, however, that on the property of M. de Prosco is perfect, and ar chæologists are happy over the fact. The roof measures almost 44 feet in length."-Rome Letter.

Number of Postage Stamps Used. Two hundred million 2 cent postage stamps that are reported as worthless by postmasters throughout the country have been called in by the postmaster general and will be destroyed. Although 200,000,000 seems to be an enormous number, it is really trifling compared with the number of stamps used by the American people each year and would last less than 20 days. It requires about 12,000,000 stamps a day to conduct the correspondence of our population, or a total of 4,880,000,000 for the year. There is not as much letter writing these times as there was when the country was more prosperous, but a decided increase has been noticeable during the last two months. The weight of the mails is an accurate barometer of busipess affairs. - Indianapolis Sentinel.

Senators Jones and Teller had a confer ence in the former's committee room, in which an effort was made to adjust the differences existing between the friends of silver and to reconcile them to the admin istration The talk between Senators Teller and

Jones did not result in any definite under standing. Mr. Jones said that he was no yet ready to put his bill in, and that he would talk with different senators to se if there was any prospect of getting it

through. "There will be no use," he said, "to put in a bill at all unless there is some probability of its acceptance by the conflicting elements. I have been seeing the repre ment about the senate, and until I shall have had an opportunity to compare their views, I cannot say whether I shall pre

Mr. Jones also said that while it was true that he had seen the president and had submitted a rough draft which he proposed to him, it was not a fact that the president had indicated his acceptance of the plan proposed. He said he had talke with the president for two hours on Fr day last, and that while the president ha indicated his desire that legislation shot be accomplished, and had encouraged him o go ahead, he had not said that the Jone bill would be acceptable in all respe He had not gathered the impression th the president was opposed to the bill, be that he would not be committed on an bill until he should become assured as whether it could pass congress.

The attempts of the Democrats to reac an agreement upon some definite plan solve the currency question seem to have been transferred from the house to senate for the time at least. One day as he was proceeding to a village he heard sounds of revelry, the a band of music. This merrymaking was a procession of children dressed in white, carrying in their midst a beautiful child crowned with roses in a ornamented with acacia and myrtle. This procession was in horor of Maya, the personification of spring, and took place to announce the entry of spring. In front of the little chariot some children danced and held in their hands tin platters for contributions, and, as may be imagined, all, or nearly all, the spectators dropped their coins into them.

Bartolo moved away in a desponding mood, saying to himself as he walked on: "Is this the justice of the world? There they are flinging their money into these platters just because these children come in procession to announce to them that it is the month of May, as castle. though they could not know it by looking in an almanac. A MIDNIGHT VISITOR.

Every Mother Should Be Prepared to Battle with Croup-The Best Remedy. (From the Providence, R. I., Telegram.)

What word carries more terror to a mother than croup, that insidious visitor who steals upon her children at night when who steals upon her children at night when drug stores are closed and physicians not within reach. Croup does its deadly work quick, and if not met at the outset with stringent methods is almost sure to prove a conqueror. Every mother should keep a remedy where she can reach it at the first ominous bark. It has been truly said that a bottle of Perry Davis' Pain-Killer on the a bottle of Perry Davis' Pain-Killer on the medicine shelf insures greater safety from such ills than would a doctor in your house, Pain-Killer was the chief remedy of our grandfathers and with all the advances of scirandaments and with all the advances of se-ence nothing has been found to take its place. For croup it is without an equal. An instance of this was yesterday cited to a reporter by Mrs. J. B. G. Hoskins, of No. 30 Marion Street, the wife of one of the 30 Marion Street, the wife of one of the sturdy wheelwrights of Providence, R. I.

"Nobody knows the anxiety, the torture of mind I have experienced because of croup. Hours of sleep I have lost while watching at the bedside of my boy, who has suffered almost a thousand deaths from croup in its worst form. I tried every remedy that kind friends could suggest. All failed me, and I was in despair. Pain-Killer, Spelly congressed the terrible disease. All failed me, and I was in despair. Pain-Killer finally conquered the terrible disease.

Women as Imitators. With the tailor made girl an east walk came in-a walk that did not have a suggestion of a stride, but still, as it was swinging, was perfectly feminine and easy. It was much prettier than the mincing steps attained by walking spontaneously it would have failed in its the ribbon. By the bye, it does seem that duty. The cabinet accepted the decision while women are talking so much about of the council while regretting the cabitheir rights they have left very few to net's defeat.

CABINET STEPS OUT.

Hopes of Enemies of the French Government Are Realized.

THE RESIGNATION OF BARTHOU

Furnished a Text For Accomplishing the Overthrow.

PARIS. Jan. 15.-The cabinet resigned yesterday, having been defeated in the chamber of deputies on the question of giving priority to an order of the day. Sunday evening M. Barthou, minister of public works, resigned his office for the reason that the council of state had de cided against him in the matter of guaranteeing the interest of the Southern rail-

It became generally known that Alexander Millerand, the Socialist deputy and editor-in-chief of The Petite Republique Francaise, would interpellate the government in regard to M. Barthou's resignation, and that the government would reply thereto. Consequently a large crowd gathered in the chamber to listen to the proceedings.

It was known that the position of the cabinet was not as secure as it might have been, and the enemies of the government had hopes that the debate yesterday would result in its overthrow. These hopes are realized.

The Ball Set Rolling.

M. Millerand, when his interpellation was in order, said that it was not M. Bar thou alone who had brought before the council of state the contentions existing between the state and the railroad con panies. But it was a whole cabinet which had been called upon for an explanation. The decision of the council of state, therefore, affected the entire cabinet, yet only one minister had taken the correct atti-

tude and had resigned. The ministry, according to M. Millerand, was also to blame for submitting a question to the council which purely be longed to the chamber of deputies to decide, and, amid interruptions, the speaker demanded an inquiry to see whether grounds existed for criminally prosecut-

ing M. Raynal, who was minister of pubworks in 1883. M. Millerand then submitted a resolution censuring the government for putting before the council of state a litigious ques tion, and for an inquiry into M. Raynal's

M. Raynal said that he agreed that ar inquiry should be opened in regard to his conduct, adding: "I am certain that I shall be able to confound those who are thirsting for scandals and hungering for calumnies

Dupuy's Argument.

Premier Dupuy declared that after M. Raynal's acceptance of an inquiry into his conduct as minister of public works in 1883 the government would not oppose it. As to the order of the day, he reminded the chamber that the question of the period during which the government's guarantee of interest remains in force (referring to the bonds of the Southern and Orleans Railroad companies) had already been raised and the chamber had recognized the competence of the council of state to deal with the question. A decision has been given, he added, and the chamber could not disregard it.

"The council of state has decided the principle in their case," insisted Dupuy, amid protests and shouts from the "The chamber," he continued. "must judge whether the government is apable of continuing in office. M. Barthou resigned because he regarded the deision as a personal slight. The government does not have the same reason for adopting that course. If it had resigned that this additional duty is to apply only

"M. Barthou considered that by his attitude, speeches and statements he was more concerned than his colleagues in the lecision of the council, and he resigned because the decision established a precedent from which the companies would desire to profit. He therefore declined to

Trying to Do Business.

M. Chapuis then submitted the following order of the day: "That the chamber, regretting the erroneous and dangerous interpretation placed by the government on the decision of the common council of state, pass to the order of the day."

M. Millerand's motion censuring the

government for putting before the council of state a litigious question, and calling Raynals as minister of public works in blown down, and a heavy arm of a gate 1883, was then carried by a vote of 253 to struck her.

Eleven orders of the day were then submitted, but priority was voted, by 293 to 231, for one by M. Pourquery de Boisserin, calling upon the government to vigorously defend the rights of the state as affected by the decision of the council of

M. Dupuy declared that, if this motio was adopted, the government would re sign. A scene of the utmost excitement followed. Numbers of deputies gathered in groups upon the floor of the chamber. to make guys of themselves for the ben- and the premier was surrounded by a crowd of persons, who eagerly plied him

> A vote was finally taken on M. Pourquery in favor to 264 against.

The Downfall.

After several speeches and declarations had been made, the chamber voted on a Bath, Me., is dead. proposal to grant priority to a motion made by Professor Emile Trelat (Rep.) which, of all the orders of the day, was the only one accepted by the government.
This order of the day declared that the governement adhered to the doctrine of the separation of powers and the non-interference of the chamber with the judicial functions of the council of state. Priority was refused to this motion by

a vote of 263 to 241. When the result of the vote was announced, the ministers left the chamber and proceeded to the palace of the Elysee, where they submitted their resignations to President Casimir-Perier.

After the departure of the ministers, the White iron cribs, the healthiest made by M. Krantz (Lib. Rep.), reserving beds on earth for a baby. No wooden corners, where disease germs can lork. BAY STATE LEGISLATURE The Tax Levy Is Not Likely to Run Higher

Than In 1894. Boston, Jan. 15.-Neither the senate nor the house sat for over an hour, both adjourning after the consideration of a few bills and petitions.

There is no especial significance in the figures of estimates printed in some of the papers, so far as they are an index of the probable cost of carrying on the govern ment, or rather of the amount which wil be called for the people to pay in taxes These figures are not the estimates of the auditor, but merely his statement of esti mates of heads of departments and of commissions. The estimates of the regular department call for amounts of about the same size as last year, but the wants of some of the outside bodies, such as the state fire marshal, the highway commis sion and the Metropolitan park commis sion, will undoubtedly increase the total considerably. But the cash on hand this year is larger than in 1894, there being \$240,000 received from the legacy tax; se that it is not probable that the tax call

this year will be greater than last.

Brooklyn Strikers Make Further Use city, a portion of which is in ruins. of Sticks and Stones.

A FEW CONFLICTS WITH POLICE.

Both Sides Claim Confidence of Ultimate Victory.

BROOKLYN, Jan. 16 .- The second day of the big trolley strike was not characterized by much excitement. They were many little clashes between the police and the strikers, but nothing of a serious nature in the way of a riot occurred.

Up to noon everything was compara-tively quiet. After that, however, the strikers let themselves out a trifle, and the police had some difficulty in keeping the great crowds under restraint. The necessity of patrolling so extensive a territory has become a matter of concern to the police officials, and it is thought now that outside aid may have to be called upon before the strike is ended.

The chief trouble of the day occurred at the Atlantic Avenue company's barns at Twenty-fourth street and Fifth avenue, This was about 2 o'clock in the afternoon, when an effort was made to run a car to the north side. Five thousand strikers and sympathizers had gathered at this point, and although the car was surrounded by a police guard it was found impossible to proceed until the mounted squad was ordered out.

SILVERITES' CHANCE.

They Can Get Nothing More Than the Jones Bill Offers.

By a Report In Favor of Judge Ricks' Impeachment.

WASHINGTON, Jan. 16.—There is abso lutely no change in the financial situation in the senate. The Jones compro mise bill, which has already been outlined and which was intended to conciliate every phase of the conflicting interests in that body, does not appear to satisfy either the Republicans or free silver advocates.

The free silver advocates object seriously to two features of the Jones bill-the pro posed short-time and issues which are to be paid in gold and the limiting of the coinage of silver to the product of the American mines. They assert that they will accept nothing but the free and unlimited coinage of silver.

They have been told, by both Republicans and conservative Democrats, that in insisting on carrying out their extreme views on the silver question they are making a fatal mistake.

If the silverites succeed in defeating any

remedial legislation at this session, they have been notified that in the Fifty-fourth congress they will never be able to secure anything nearly as favorable to the white metal as is contained in the proposed bill All measures of leading consequence are the result of compromise. It is now conceded on all sides that it must be partie ularly so with whatever legislation is formulated at this session for the reform of the currency and the relief of the country There are manifest reasons why that which is to be done should be done with the least possible delay.

It is thought that the speeches in the senate, especially those by Allison and Gorman, may exercise considerable influence in the direction of securing an effort on the part of sound money men of the two great parties to get together on measure that will remove the treas from existing embarrassments.

It is understood that Messrs. S and Allison incline in this direction, but a number of their political associates ap pear to be averse to taking any steps that will help the Democrats "out of the hole.

Congress was given a decided surprise by the house committee on the judiciary, which decided by a vote of 7 to 6 to report a resolution for the impeachment of Judge Augustus J. Ricks of Cleveland for mal feasance in office.

For Ricks' Impeachment.

Not for many years has a United States judge been called before the bar of the senate to defend his right to wear the ermine of office against criminal charges, and only three or four times in the histor, of the government has an impeachmen trial of a member of the federal judiciary been conducted.

Few members had looked into the charges prefered union of Cleveland, the accuser of Judge Ricks, that while sitting on the bench he paid to himself fees which he claimed he had previously earned as clerk of the cour and to which it is now asserted he was not

entitled. The number of years which have elapsed since the transaction, and the contention of the judge's friends that the proceeding was inspired by a ruling prejudicial to the interests of labor unions which he made Dover, Del., Jan. 16-In the house the recently, tended to lessen the interest which ordinarily would have been taken

> Congressional Doings. The senate gave the day to further speeches, in which the income tax served as a text for a wide range of discussion on the tariff, the currency and the Populist platform. Mr. Hill's proposition to amend the deficiency bill so that the income tax would be tested in the courts has appar ently started an inexhaustible flow of

speeches on public affairs in general. Mr. Cockrell has sought vainly to se cure a vote on the Hill amendment, so that the deficiency bill : ight move along to final passage. He hoped to secure action yesterday, but the speeches of Mr Call (Fla.) and Mr. Allen (Neb.) made

this impossible.

Mr. Allen took occasion to defend the Populist party against many charges made in and out of congress that it was a party of vagaries. It led to a very full discusion of all Populist doctrines and a com parison of them with the doctrines

other parties. The day in the house was devoted to the consideration of the Indian appropriation bills, but no progress was made before ad journment. General Grosvenor presented a reply to the memorial sent to the judi ciary committee, containing suppleme tary charges against Judge Ricks and in volving ex-Senator H. B. Payne and Judge Stevenson Burke. He asked for an investigation of the charges.

Editorial Comment.

IF PEOPLE think there is a diffuseness in branches taught in our public schools, what will they say next fall, when carpentry, molding, forging and machine shop work are added? Which of the ten branches required by law could well be omitted in the grammar grades? Certainly not reading, writing, spelling, grammar, geography or arithmetic, or good behavior. Drawing is essential, United States history important, and youth seems to be the proper time to begin with the temperance lectures. It cannot be because of this diffuseness that children are taken out of our Institute where a great many more branches are taught.

A REPORT of the Legislative Committee on Mercantile Affairs, inexpedient to extend the time of the Meeropolitan District Commission, would be acceptable at this time. The commission has found that annexation is out of the question, and that federation under a district charter has as many opponents as advocates. SUPT, HALL RESIGNS.

The City Loses a Valuable Addition to

It will be learned with regret that Mr. Frank E. Hall, superintendent of the The Daily News Market of Local Water Works, has tendered his resignation to the Board of Water Commissioners to take effect February 1, and that the resignation has been accepted.

Mr. Hall has been associated with the water interests of our city ever since the THE TICKER KEPT VERY BUSY, plant was instituted by the Quincy Water Co., by whom he was retained as superin-

When the city took possession of the A plant, the Water Commissioners realizing his worth retained his services.

Being a practical engineer, he has therefore been of great benefit to the city, and the position thus made vacant will be a hard one for the Commissioners to fill, if they seek to fill the position with a man as thoroughly acquainted with the business as stall its officers this evening. Mr. Hall.

Mr. Hall was out of town this morning and therefore could not be seen, but it is understood that he is to put in a system of water works somewhere on the Cape.

Mr. Cavanagh, one of the commissioners, when seen this morning said the board had taken no steps to fill Mr. Hall's position dar. and that they should be in no hurry about doing so, being satisfied to wait until they could give the subject careful attention. Mayor Hodges says that the resignation of

Mr. Hall was a complete surprise to him, as he had not received the slightest intination that he anticipated resigning.

However it is well known that for the past few weeks there have been many rumors about the city of the changes that were to take place in the water board, and the resignation of Mr. Hall will not be much of a surprise to many.

Boston, Jan. 16.-In the senate a vote for United States senator was taken with the following result: George F. Hoar had 34 votes, and John E. Russell had 4 votes, the former being declared elected on the part of the senate.

The following petitions were received in the senate: That one-half of the expense incurred by savings banks or trust companies in examining titles for mortgages of real estate and in executing and discharging the same shall be paid by the bank or trust company and one-half by the parties receiving the loan; for an amendment to public statutes to preven persons other than pilots from boarding vessels in Gloucester harbor before they are made fast to the wharf; for an additional appropriation of \$35,000 for repairs and improvements at the hospital cottages at Baldwinsville.

Among the petitions presented in the house was one that "full, sound value" be paid for tuberculous cattle killed by the order of the cattle commissioners. If the petitioners secure the legislation sought, tuberculous cattle, salable at the market value of sound kine, will be good property to have in one's possession.

In the house yesterday afternoon, bills

were introduced to exempt veteran soldiers and sailors from the payment of fees for certificates of authority to act as insurance brokers; permitting women to be appointed notaries public; to prevent the offensive use of buildings for advertising , left Tuesday night for Kentucky for his purposes; to permit the taking of shad and alewives below Bradford bridge between Haverhill and Bradford, and the sale o fish so caught, no gill net or sweep seine of certain dimensions to be used. again to expose a horrible scandal, which there is no law in England to suppress. It is the work of professional floggers of girls, boys and men. The establishment of the woman who advertises her services at terms from 5 shillings is described in Truth as the result of a call by prospective clients. The flogger showed what she frankly called the torture room. There is an iron bedstead, on which, she explained, the victim is extended across a pillow. down from the peg in the barn, where it had hung undisturbed during the summer. He was naturally greatly astonished to discover two patches of growing hair, one on either side, where it had been exposed to the light and air. The hair is of a bright bay color and is now fully an inch in length. Probably the most peculiar feature of the affair, however, is the fact that the hair has spread from the two patches until it has entirely covered the blanket with a fine A great deal of public mirth and oc- growth, varying in shade and color. FOOTBALLISMS.

The athletic student's sphere at present s the football.

He who coaches a football team never takes them driving. When the ball is up, there is no skating, notwithstanding the signal.

There is a distinction with a difference between football and the ball of the foot. The "half back," be it remembered, only feigns deformity for athletic purposes. Business men who take quick lunch ought to make good "rushers" on a team. There is something footballish about electric bells, because they are a "touch

CASIMIR-PERIER RESIGNS OFFICE.

Eloquent Appeals Failed to Alter His Intention.

PARIS, Jan. 16. - President Casimir-Perier has resigned. There was no suspirion here that the president contemplated resigning, and when the news spread to the clubs, cafes and boulevards there was the reatest excitement manifested.

An official note was issued at 11 o'clock last night announcing the resignation of the president, and forecasting the ideas he intends to develop in his farewell address to the chamber of deputies. The note says that in the eyes of the president Monday's sitting of the chamber and the vote which overthrew the cabinet were only secndary incidents of the struggle which is ng against the parliamentary

PRESIDENT CASIMIR-PERIER. M. Casimir-Perier had hoped that the p s'let to' the republic, who is deprived o mern of action, would have been exempted irom party politics, and that the political confidence of the Republicans would have accorded him power and authority. He had also hoped that those who, despite himself, had placed him in a ened to attack the mills. The riot act osition where he was unable to defend himself, would have undertaken the deense of the first magistrate.

Continuing, the note says that the president has requested the ministers to temporarily withdraw their resignations in rder to facilitate the necessary changes. Prime Minister Dupuy imparted the president's decision to the presidents of the senate and chamber of deputies, who his wife and two children, with several will forthwith call urgency sittings of those bodies.

The high character, experience, firmness nd integrity of the president inspired the onfidence of even the advanced Repub-

The long conference which M. Casimir-Perier had yesterday with M. Challemelcour, president of the senate, is now explained. He had already resolved to resign. M. Challemel-Lacour employed his most eloquence in a vain endeavor to persuade the president to reconsider his ecision. All the members of the cabinet. from Prime Minister Dupuy down, followed Lacour and exhausted every argument to induce M. Casimir-Perier not to

esign. Their effor's were without success. Decision Remained Unshaken. Prime Minister Dupuy again visited the palace of the Elysee later in the evening and was closeted with the president, urging every possible inducement and appealing to every patriotic sentiment in orler to get him to reconsider his determina-

tion. All was without avail. After him came M. Spuller, whose elo-quence will be remembered overcame on cruples to accepting the position of prime inister. All that the president would oncede to these appeals was to delay the publications of his intentions until night. As MM. Dupuy and Spuller were leaving ne palace of the Elysee together they met n the corridor the president's mother, who is 80 years old. They begged her to entreat her son to remain in office, and she promised that she would do her utost. It is stated that the interview between mother and son was very affecting. Nevertheless, at 9 o'clock, M. Casimirerier sent a short letter to M. Dupuy informing him that his decision was irrevocable, and begging him to notify the presidents of the senate and chamber of deputies and to announce the fact to Tne

Journal Official. M. Dupuy accepted the task impael upon him, and, as on the occasion of the death of M. Carnot, finds himself again confronted with the transmission of powers, involving difficulties of every description arising from the unexpected position

if affairs.

He seemed to be completely overwhelmed with the sense of his responsibilities, but speedily recovered, and with the energy, coolness and foresight that he displayed on the occasion of the assassination of M. C. who considered the constant of on of M. Carnot, proceeded to take the easures which the situation demanded.

Concerning a Successor. Following is the text of the articles of the constitution relating to the change in the presidency:

not in national assembly. He is appointed for seven years, and is eligible for re-election. Article 7 provides that in case of a vacation of the office through death or any

other cause, the national assembly shall proceed forthwith to elect a new president. In the interval the council of ministers is invested with executive power. The national assembly being merely an electoral college, all discussion therein is prohibited. The report of the resignation of the president became generally known at 11 o'clock last night, but was universally discredited, and a general movement was made towards the newspaper offices, with a view to learning the truth. Very soon

some of the papers exhibited lantern transparencies of the official note. Even then many persons refused to believe that the event was possible, and waited in and about the offices for further times that I could not stand up straight, but dispatches to be posted. Finally they became convinced that the president had really retired, and assembled in groups discussing the chances of those who were mentioned as likely to succed him.

Likely to Be Re-elected. The senate and chamber of deputies have been summoned to meet this evening to receive government communications. M. Dupuy will read the president's message in the chamber, and M. Guerin, minister of justice, will read it in the sen-

It is believed that the national assembly will meet tomorrow. Those best informed as to the political situation believe that Casimir-Perier will be re-elected by a large majority. It is expected that steps will be taken to bring about this result. If they fail, it is probable that the government parties will choose M. Dupuy as their candidate. The names of MM. Waldeck-Roussen, Challemel-Lacour and Spuller are also mentioned in connection with the office.

BROOKLYN'S STRIKE.

Compromise Measures Likely to Be quarters. Thick snow was falling at the Accepted by Both Sides.

Only Awaits the Sanction of the Railway Magnates.

BROOKLYN, Jan. 17.-It is generally believed here that the strike of the trolley car motormen and conductors will be settled amicably by tonight. From present to effect this. The members of the state board of mediation and arbitration were exceedingly busy throughout yesterday.

Interviews with the presidents of the railroads and the leaders of the strikers were had, and the result is that a compromise measure is under consideration by both sides. The terms of the probable ompromise have not yet been made public, but it is believed that both the com-panies and the strikers have made con-

THE SACRED CODFISH.

The Proposal to Take It Out of the State house In Boston Creates a Sensation. The Worcester Gazette says:

Charles Francis Adams recounts "Th Story of the Cod" in the Springfield Republican. In 1782 John Adams secured from Great Britain an eminent diplomatic victory after a wearisome contest -the right of fishery-and on March 17, 1784, John Rowe, a Boston member asked and received permission to hang the historic codfish on the wall of the chamber of representatives in the statehouse. Thirty years later another war with Great Britain occurred. John Quincy Adams was called on this time as a diplomat, and he, too, saved the codfish once more from British encroachments. The statehouse cod, which the sacrilegious are now threatening to store in the garret, is emblematic of commerce, war and diplomacy and tells of Milton's new granite quarries and in a few Massachusetts victories in all three The committee on challenging some years many men will find employment fields. After the peace of 1783 John Adams quartered the codfish in his coat of arms, and it is there now. This must was decided to challenge the Woodward County Commissioners it will be a great have been the origin of the phrase "codfish aristocracy," once in common use. It was commonly spoken in derision, but the pride of the Adamses in the codfish would seem entirely worthy. On this subject the New York Sun re

marks:

There is a proud and beautiful building in Boston. Bulfinch did it. It is a Parthenon surmounted by a gilded gashouse, and to those who love it it is the supreme architectural achievement of the world. Even the limited or prejudiced persons who deny its charm cannot forget the joy of its associations. To go to Boston, to view that dome with an eager eye and to perspire with The Acts relative to elections provide the pulchritude of it and the deeper regard with a certain amount of attachment. As a matter of fact, the dome is a hollow fraud. Mr. Bulfiuch, who has had the distinction of having an eminently parochial street named after him. was not lucky enough to have his designs carried out, and the statehouse with its feeling Dutch name, is not all n that case the members would be satis- that it might have been. They have been "fixing up" the statehouse. Evidently some idiot is in charge. The sacred codfish is not to be included among the treasures of the restored statehouse. The Law and Order people say it drinks too much. The A. P. A. says it has a Hibernian counte nance. All the same, it was the best in the state. It was the most venerable in stution there, except Harvard college and George Marden of Lowell. It gone. It has been torn down. It is nil. So falls the codfish aristocracy. So fades

ME HAD HEARD ENOUGH.

How Senator Palmer Fooled His C Friend, the Judge.

An old Republican judge from Illino on his way west from New York stopped over in Washington long enough t have, as he intended, a little fun with his old friend, Senator Palmer. The senator's committee room was rather full when the judge entered, and he felt a bit diffident. Still, after clasping the senator's hand in a grip of friendship, he said, with a grin:

'What do you think of the election?' "Hey?" the senator, with his hand behind his ear, replied. The judge, something surprised at this, to him, the first sign of deafness in his old friend, said in a louder tone: "I say, what do you think of the

Regarding the Political Crisis Which Has Overtaken France.

LIGHT ON RAILROAD SCANDALS

And the Character of Those Concerned Therein.

Paris, Jan. 17 .- The hundred days ended at Waterloo. It will not be M. Casimir-Perier's fault if the 202 days of his presidency do not end in the ruin of parliamentary government in France.

Paris awoke yesterday to learn that he had resigned. He is well meaning, but headlong and querulously touchy. He has been at sea since the death of his posom friend, M. Burdeau, to whose want of moral sense he was blind, and whose great talent he overrated.

He is, therefore, stamped as the author of a colossal act of knavery. Even the So-

In resigning, the president muddled an lready confused situation. The act of esignation was in bad form and disrespectful, though not intentionally so, of he presidential office and of a part of parliament. The circumstances connected with that event are deplorable. highest post has been deserted at the first

The wholesome precedent established by MacMahon, Grevy and Carnot in consulting in times of difficulty the presidents of both legislative houses was discarded. President Lacour of the senate was alone sent for, he having always rather encouraged than sought to allay M. Perier's ouchiness and angry ebullitions. Besideshe is ill-tempered and arrogant, and sympathizes with the reactionaries, the conequence of having been raised from nothing to the greatest positions. Hissplenetic temper chimed in with the impatience and irritability of Perier.

M. BRISSON.

M. Br'sson, who was ignored, is a man of firm principles, and a puritan in his life. His record is spotless. Perier had taken unbrage at Brisson's election to the presidency of the chamber of deputies after Burdeau's death, and regard d his re-election the other day as a slight to himself. Brisson having opposed the draconian laws which Perier esented to parliament when he was

Beginning of the Trouble. There was an accumulation of fancied slights. The first was the wrangle over the Widow Burdeau pension bill. Mme. lambent eyes, fine teeth and a lemon olored complexion. She was not left penniless by her husband. Far from it. Perier was behind Dupuy when he pro posed a public funeral at a cost of 20,000 francs and a pension to t e widow of 12,000 francs annually. This pension was pared down to 9000 francs, but the other 3000 francs were given to Burdeau's mother. The prime minister asked for the annuity o be continued to the three children, after her death, during their lives, but this was

refused. There has been an impression at the hamber that to avenge this slight Perier set on the minister of justice to have the blackmailers Canivet and Trocard artion for poisoning Ludwig Brandt, was rested, not so much to punish them as to find in their desks documents damning to many deputies in connection with the not evidence sufficient to warrant a con-

The Paris electors gave him a seat in parliament after he had been tried and severely sentenced, but the chamber of the legislature in joint convention de-refused in order to conciliate Perier to reclared John M. Thurston elected to the lease Richard from prison to take his seat in the chamber.

Since then the chamber has pushed its commodating spirit so far as to expel on NEW YORK, Jan. 17.-It is stated that insufficient pretexts two deputies who were personally inimical to Perier; namely, Juries, who in defending Richard at the assizes, delivered a philippic against the Perier family, in bad taste, but not priminal, and Rounet, who attacked the president in the socialist newspapers. Perier Stands by Raynal.

What made the cup of bitterness overbeads either iridescent, green, mauve flow was the vote for a committee to be or deep blue, sold in pairs, united by a named to inquire into Raynal's conduct in the matter of the railway convention, and to impeach him. These conventions involving the most gigantic scandals of all times, were signed by Raynal as min-ister of public works in the Ferry cabinet title of "The Federation of Women's in 1883, of which cabinet Perier was an under secretary of state. A syndicate of railway companies in

> were so drawn as to, in many cases, allow interest of 25 per cent on the capital subscribed. They allowed guarantees of in-terest on all the capital in shares and bonds, but were silent as to the date when the interest guarantees were to cease. As prime minister, Perier selected Ray person ordered police raids on the domion the score of the conventions, thus eeding a spirit of violence that culminated in Carnot's murder. Raynal is a co-religionist of Captain Dreyfus, who was recently sentenced to life imprisonment

where the president's mother, a semi-Jewess, was brought up.

The council of state, a high political and civil tribunal, has just decided that the interest guarantees expire in 1953, instead of 1914, as Raynal claimed to believe. By this means the state will lose 1,300,000 francs, independently of other crushing. conditions for the taxpayers, sanctioned in the convention, which establish a great railway monopoly for the next 60 years. At one sitting of the chamber in 1889 800,000 francs were spent in gaining three

Ferry had lived in a tenement house lodging up to 1883. He resided subse quently in a splendid house built for himself in the aristocratic district of Paris. I am acquainted with deputies who were poor before the conventions were voted, but who have since formed costly art col-

lections. Perier's choice of Raynal for limits as the interior was generally thought as tounding, but was considered to have been due to the liberality of the former to be hoodwinked. It is a colossal blunder for hoodwinked. It is a colossal blunder for Chicago.

Why then should he act as if the convention's cap fitted himself as well as Raynal?

Perier's Absurd Message. The presidential message was read in the chamber of deputies yesterday by M. Brisson. It was the most ill-judged state paper of which I have any recollection. It hits at the friends and foes of the author,

and is absurd throughout. M. Brisson has apparently the bes chance of being elected president, because he is a puritan and is wanted for the place, but he will not have a majority of the senate. M. Roubet is also mentioned in connection with the office. Dupuy has a fair chance, and will be supported by the railway companies' money. Faure, minister of marine, is also spoken of. M. Brisson is the best man. He is th soul of honor, an example of conjugal

fidelity, charitable and eloquent. Mme. Perier has been anxious for the resignation of her husband, she finding the palace a costly prison, and her children live there unattended. The whole family lived in a glass house, to be marks for missiles, and, while the objects of burn ing jealousy, were utterly wretched. EMILY CRAWFORD.

Olney Submits a Plan For Settling Differences by Arbitration.

COVERS WIDE RANGE OF GROUND.

Some Points In Favor of the Cause of Unionism.

WASHINGTON, Jan. 18.-A labor arbitra tion plan has been devised by Attorney General Olney, and was introduced yester day by Chairman McGann on the house committee on labor. It is intended as a substitute for the one framed by Labor Commissioner Wright a result of the labors of the Chicago strike commission. In several points the bill is far more reaching in its propositions than any that has been brought forward. The terms "railroad" and "employes" are defined in the bill, and the latter class includes those working on cars operated by the carrier under lease, making the carrier responsiployed directly by him.

The wages paid to employes, it is stipulated, shall be reasonable and just. In case of wage controversies, the chairman of the interstate commerce commission and the commissioners of labor are to ing to effect an amicable settlement, and if this mediation fails, the controversy may be submitted to a board of arbitra tion of which the chairman of the inter state commerce commission shall chairman, and which shall consist also one commissioner chosen by the em ployer and one by the labor or ganization to which the employes directly intrusted belong; or, if they belong to more than one, by that one which specially represents employes of the sam grade and class and engaged in service of the same nature as the employes in the controversy. Where two or more classes of employes are interested, their organiza-

1. The parties shall stipulate in writing that pending the arbitration the existing status shall not be changed.

2. That the award shall be final unless set aside for error of law apparent on the record.

3. That the parties shall faithfully execute it, and it may be enforced in equity so far as the powers of a court of equity permit. 4. Employe: dissatisfied with the award shall not quit work without three months' tice in writing.

5. The award shall be continued in force for

two years, and during that period no new arbitration between the same parties on the same subject shall be had. Allowance For Exceptions. After filing the award with the clerk of the United States circuit court of the district in which the difficulty occurred, 80 days shall be allowed for filing exceptions in matters of law, after which it shall go into effect, if no exceptions are taken. If they are taken, it goes int

force 10 days after their decision. If an agreement of arbitration shall b entered into by employes individually, in stead of organizations, the board shall n be created unless the chairman is satisf that they represent their associates. During that time it will be unlawful fo abet a strike or boycott or to leave their employment without giving 30 days' notice in writing, nor can they be dis-

charged without 30 days' notice, except for causes mentioned. Violations of this

provision are made a misdemeanor, punishable by \$1000 fine or one year's in prisonme Membership in incorporated labor or ganizations, it is provided, shall be ter minated by indulgence in lawlessness violence, destruction of property, intimidation or threats by members during strikes, but they are not to be held indi-

ASHES TO CURE CUTS.

Russian Physicians Revive an Old Cossacl Method of Treating Wounds.

Some of the best known physicians in Russia are strongly advocating the adoption in the government hospitals of an old Cossack custom of treating cuts and wounds with ashes. The Cossack peasantry have treated cases in this fashion from time immemorial, and Dr. Pashkoff, a Russian physician who has been studying the treatment, recently said in an interview in a Russian medical jour

"I strongly recommend the treating of severe cuts and wounds with ashes. Experiment has convinced me of the thorough efficacy of the treatment, and him, as also does one son Mr. Charles P. West Quincy, filed a petition in insolvency in addition it is cheap, takes little time to arrange and does away with bulky bandages, which have always been the bane of nurses and physicians. The best ashes are those resulting from the burning of some cotton stuff or linen, and only a very thin layer should be applied. If the wound has been made by some dirty instrument and there is danger of blood poisoning, it should be first washed thoroughly with a lotion. The ashes with the blood form a hard substance, under which the most severe cuts heal

with remarkable rapidity." Dr. Pashkoff has experimented with ashes on 28 cases of cuts, and only two in charge. It is extremely probable that the ashes treatment will be adopted in the St. Petersburg hospitals before

Now language can only be taught and learned in one way, the way the first father and mother taught, the way the first children learned, namely, by talking; therefore the teacher talks with the children, and requires them to talk to her. Why do foreign children so soon lose their accent? Because they hear good English at school childhood seek to copy it. Why do some children use more correct English than their parents? Because the training which their ears receive at school enables them to detect variations from correct language and to avoid them. Why are some

Granting the need for such essons, another question is naturally involved, "What shall teacher and children talk about?" They talk about many things. The very little children talk about their homes and their playthings and their pets. Gradually topics which are more directly educational are introduced and the children are taught to observe the wonders of the natural world, and to tell the results of their observation in good English. VERSAILLES, Jan. 18 .- Felix Faure, minister of marine in the present cabinet, was elected on the second ballot yesterday to be president of the French republic in succession to Casimir-Perier. Faure polled 430 votes to 361 votes polled by his nearest opponent, Henri Brisson, posident of the chamber of deputies. The Socialists protested violently when the result of the ballot was made known. In anticipation of the meeting of the

A large force of troops occupied the railroad stations and other points, guards were posted throughout the palace and the streets were lined with gendarmes. The crowds, however, were very orderly.

When the cabinet ministers reached the palace Premier Dupuy was heard to declare to several of his friends that he was not a presidential candidate. At that time there were only three candidates for the election to the presidency whose chances of securing the prize were seriously discussed. These were Waldeck-Rousseau, Brisson, and the "dark horse," Faure.

CHRISTIAN ENDEAVOR.

Topic For the Week Beginning Jan. 20 Comment by Rev. S. H. Doyle. TOPIC.—A Christian's problems and per-plexities.—I Kings iv, 29-34; Luke xi, 31; ii, 46, 47. (A question box meeting suggested.)

This life is largely made up of mys teries. There are problems and perplexities in every walk of life, and the Christian's life is no exception. God has revealed many precious things to us, and ague, with four bills, severally to ex- yet in the spiritual as well as in the material universe there are many things that have not been revealed. It could scarcely be otherwise. God is infinite. We are finite, and if God had revealed these things perhaps we would not have been able to comprehend or understand them. Christ practically said as much to Nicodemus when he questioned Him the voter's signature on the register's list. about the mysteries of the regeneration. The reference row which the appoint of the soul, for He said, "If I tell you of earthly things and ye cannot understand, how can you understand if I tell

you of heavenly things?" Still there is in the human mind an intense craving, so far as possible, to understand these problems and perplexiated its own securities. The city has ties, and there is nothing wrong in this preclosed with its sinking fund its own desire nor the attempt to satisfy it, but something may be wrong in the way we attempt to solve these problems. True wisdom comes from God in some way. Solomon was the wisest man who ever lived, and yet he obtained all his wisdom direct from God. But God has giv 'non-negotiable" the securities cannot be en us one even wiser than Solomon, even Jesus Christ, His own Son, and ew bonds. There was no opposition at His wisdom surpassed that of all men because He was God as well as man. Therefore Christ should be our final court of appeal in all the problems of life. When worried and perplexed, we should go to His word to see what He has to say upon the subject, and when He does not satisfy every desire or crav ing we should leave it all with Him and trust God for what has not been revealed. "The secret things belong unto the Lord our God, but the things that have been revealed belong unto us and to our children forever, that we may do all the works of this law."

The great lesson that these problems and perplexities should teach us is sim ple childlike trust in God. God knows what is best for us. He knew what to reveal for our good and what not to re veal. The secret things, the mysteries of life, belong to Him. Let us leave them with Him. The things that have been revealed belong to us. Let us live up to what has been revealed, and we may rest assured that if we do the day will come when we shall understand even the Christian problems and perplexities

With the instinct of despair, that love of life implanted in us all, she snatched at the grass and tall weeds within her reach. Her little fingers dug deep into the ground and staid her downward course. There she hung, suspended in

the air. Moments seemed ages until she heard a voice, which sounded very far off, saying in a firm, encouraging tone: "I am coming! Keep looking up!" Instinctively she obeyed. She never glanced down ward, but clung faster to her only chance of safety. Again the voice, this time nearer, spoke hopefully: "I am coming! Keep looking up!" In another moment two strong hands had seized her own in a firm clasp, and she felt herself drawn gently and cautiously upward. Then she was lifted into great

words were spoken. It started after the failure of an effort to

increase the pension of the widow of General Abner Doubleday and to pension another widow who had performed services as voluntary nurse during the rebellion. Both bills were blocked by the obstruction of Jones (Dem., Va.). Cooper (Dem., Ind.) resented this and turned on Jones savagely, and with much temper he charged him with lack of chivalry in as-

Jones absolutely denied that there was any foundation for the statement that he was fighting women. "All I am fighting for." said he, "is against the counterfeit bonds. Wheat has sagged off 1 cent again, with western receipts only about half last year's. The department's estimate of 460,-000,000 bushels, against less than 400,000,000 earlier in the season, points to a proba bility that the commercial estimates have been nearer the fact. Western receipts have fallen off of late, but no longer afford definite indication of the supply remaining, which some estimate as 50,000,000 smaller than a year ago, although the price does not answer to such reckonings Corn has declined 1% cents, in spite of the very low government estimate of yield, receipts being now larger than of wheat.

THE FIRST THING IN THE MORNING take a little Carlsbad Sprudel Salt in a glassfull of water. That will set you right and keep you right, if you're inclined to be bilious or dyspeptic or constipated.

People wonder, sometimes, why it is that the Carlsbad treatment. the world's remedy for habitual constipation, should be recommended for diarrhœa and such disorders, too. Simply, because it leads the stomach and bowels naturally into a healthy condition, whatever their derangements-it doesn't accomplish its results by harmful irritation, as most pills and purgatives do.

Beware of imitations sold as "improved" or "artificial" Carlsbad Salt.

The only genuine Carlsbad Salt, with all the properties of the Sprudel Spring solidified, has the seal of the city of Carlsbad and the signature of "EISNER & Mendelson Co., Agents, New York," on every bottle. All others are worthless imitations.

"She Made Home Happy."

"She made home happy!" These few words read Within a churchyard, written on a stone No name, no date, the simple words alone Told me the story of the unknown dead.

A marble column lifted high its head Close by, inscribed to one the world has

known. But, ah! that lonely grave with moss o'er grown ,
Thrilled me far more than his who armies led. "She made home happy!" Through the long

sad years
The mother toiled and never stopped to rest Until they crossed her hands upon her breast And closed her eyes, no longer dim with tears. The simple record that she left behind Was grander than the soldier's to my mind.

TWELVE NATIVES WERE KILLED.

Many Prominent Royalists of Hawaii Are Under Arrest.

Honolylu, Jan. 11.-There were no fresh developments in the threatened uprising here until last Sunday afternoon (Jan. 6), when Deputy Marshal Brown and a squad of police under Captain Parker left for Waikaikai with orders to search the premises of Henry Bertlemann, a prominent royalist, for arms and ammunition.

nclee, during which some 60 shots were text of the memorial is as follows:

The rebels surrounded the house again, firing into it repeatedly. Leaving one man to guard the prisoners, the officers returned the fire, but without effect, as it was dark and their assailants could not be seen. Realizing that their case was desperate and that word must be got to town at all hazards, it was decided that Brown and Barker should make a dash for their horses, which were tied near the house. This was done with success, and they were soon at the nearest telephone.

Volunteers to the Front. Within two minutes after receiving the telephone account of the fight, a detail of 32 men from the regulars stationed at the government headquarters were ordered out. The command was given to Lieutenant King. Volunteers were called for, and nearly every man in the barracks stepped to the front. As soon as they came within shooting distance of the scene of action the natives fired a parting volley and fled.

Soon after the deputy marshal came up, and the premises were thoroughly searched. The Japanese servant brought to light several pistols and revolvers. At daylight a large force of natives who had taken up a strong position on the said that the English judicial benche slope of Diamond Hill, attacked was theoretically perfect compared with King's forces. After standing fire about an hour and finding the natives had the advantage of numbers and position, ate, squared the magistracy, chloroformer King moved his forces to San Souci, a

pleasure resort with telephonic communications. Shortly after the telephone was ised Lieutenant Coyne and 25 more regulars were sent. The number of insurgents were variously estimated from 1 to 200. With Coyne's force was sent an 8-pound field piece. President Murray of the Citizens' Guard, with 25 mounted policemen went out into a road leading toward the insurgents. The first intimation that Murray's force had of an enemy was a shower of bullets which did no harm. Had the natives waited a little longer Murray's forces could have been annihi-

Situation at Brooklyn Grows Worse as the Days Go By.

Strikers' Side of the Case Given to the Public.

BROOKLYN, Jan. 21.-There has been no change in the condition of affairs in the Brooklyn trolley strike. No new lines have been opened, as President Lewis Campbell said yesterday that he had received no official notice from the railroad companies that they were about to open new lines, consequently the police were not notified by him to do so.

On Bergen street, where there was a great deal of disturbance on Saturday, nine cars were running yesterday mornng, and both along the line and at the stables of the company everything was very quiet. At the stables two companies of the Thirteenth regiment were guarding

the property of the company. From midnight Saturday night there were the usual number of minor disturbances likely to occur at such a time. A crowd on the corner of Fifth avenue and Twenty-fourth street grew so boisterous that the militia stationed at that point were compelled to charge upon them and drive them away.

This caused the stopping of three other cars. At the back of the lots is a 15-foot bluff. The crowd gathered there and threw stones at the cars, demolishing every pane of glass. The police charged, but the men made a determined stand, being led by a man named Gallagher. He was placed under arrest by Officer Staats. The strikersattempted a rescue, but two policemen went to Staats' assistance and marched the prisoner off. Several of the policemen were cut by flying stones and pieces of brick, but none seriously. The neighborhood is now patrolled by a strong force o police. In this instance cooking utensils and other household goods were hurled at the police from the windows of houses and boiling water was thrown from the upper floors. The police are investigating

Police Powerless. The presence of the military caused an enormous crowd to gather around the Bush street carhouse of the Court street line. The strikers were orderly enough until a green motorman became mixed up in a switch. He could not extricate his car and the crowd gathered around him and guyed him. Another car approaching the city had run through the crowd and hurt two men and a woman, who were taken away by strikers, and their names could not be obtained. The crowd began to throw stones at the car and smashed every window in it. The police charged, but were powerless to move the men, and one of the blue coats was hit on the head

with a stone. The line was blocked for half an hour. Great excitement ensued and volleys were thrown at the motorman and the police from the windows in houses on Court street. The police reserves were called out and the crowd was dispersed in several directions. The soldiers had to charge the crowd around the stable three times, but no one was injured.

At the Alabama stables of the Fulton street line of the Brooklyn Railroad company, the scene of the furious conflict Saturday night between the militia and strikers, there was a mob of 4000 yester-day. The military kept them well back from the railroad tracks, which were ob-structed from time to time with ash barrels and old iron staves. Ten cars were

WRECKED BY EARTHQUAKE. Persian Town of Kuchan Is Destroyed

For the Second Time. LONDON, Jan. 21. - A dispatch from

Teheran, the capital of Persia, states that the town of Kuchan, in the province of Khorasan, which was destroyed by an earthquake 14 months ago, and which was subsequently rebuilt, was again destroyed by an earthquake shock on Thursday last. There was, as on the previous occasion, great loss of life. One hundred women who were in a bathhouse were crushed to death by the falling building. The weather is intensely cold, and this increases the

sufferings of the survivors whose houses were destroyed. The dispatch adds that four distinct shocks were felt at Meshed within three what is it to be, and when. days. None of these shocks, however, was of sufficient strength to do any damage. Kuchan lies at the foot of the Shah-Ja-han-Kuh, a mountain 11,000 feet in height.

The town, which is about 80 miles northwest of Meshed, is 3300 feet above the level of the sea. It is, or was, an important place, being on the route to Shirvan. The population prior to the earthquake of Nov. 17, 1893, which destroyed every house in the place, was between 20,000 and 25,000. The official report of the disaster placed the number of persons killed at 12,000. Fifty thousand head of cattle perished in the valley, at the head of which Kuchan is situated. From Nov. 17 It was the first shock that destroyed the clocks, etc., will be promptly done.

The Evangelistic Meetings Extended to Other Parts of City.

Ledger and of Interest to Church Goers.

A good and great day was enjoyed in the West Quincy Methodist church on Sunday. Evangelist W. B. Greenwood spoke in the PATRONS IN QUINCY morning on the exceeding love of the Father for all his creatures, not desiring the death of any, but that all should come to him and live, and gave many effecting incidents which drew tears from the New York and Boston Despatch Express Co.

The Sunday School changed its programme for the day in sympathy with the religious feeling of the occasion.

In the evening Mr. C. N. Crittenton, founder of the "Florence missions," spoke on the words, "Go work today in my vineyard," and in response to his stirring appeal many took a stand to be christians, among them a man and wife, the others were young people.

In the after meeting, some said in answer to the question, "How long have you been given to service for Christ." Fif-QUINCY, Jan. 14, 1895.

WASHINGTON, Jan. 21.-This promises to e a busy and important week in the

The program arranged by the committee on rules before the departure of Speaker Crisp for Asheville, N. C. (where he expects to remain a week or more), contemplates the consideration of the public buildings on the calender, to be fol-lowed by the Indian appropriation bill (now under consideration), the sundry civil and the agricultural appropriation bills. The committee on rules, after much urging, decided to bring in a cloture rule secure a vote on the bill for a new pubic building at Chicago, to cost \$4,000,000. Two hours will be given today for the consideration of the measure, after which the vote will be taken. The improve ments for the New York public building are provided for in the sundry civil bill. The other public building bills, six in number, are as follows: Newport, Ky., \$100,000; Cumberland, Md., \$75 000; South Omaha, \$200,000; Paterson, N. J., \$250,000; Brookline, Mass., \$75,000, and Pottsville,

Pa., \$60,000. The program as arranged for the week may be subject to change, in case Mr. Springer, chairman of the committee on banking and currency, decides before the end of the week to bring forward his new measure. He has been in constant consultation with Secretary Carlisle for the past week, and is very sanguine that concessions can be made to the silver men which will induce them to withdraw their opposition.

Yesterday he expressed the opinion that he would bring forward the modified bill known to possess unrivalled me- this week, and that it will be passed. This diciral properties. The benefit opinion, however, is not generally shared by the Democratic leaders of the house, of the medical knowledge of ten centumost of whom do not hesitate to say that they believe all hope of currency legisla-

Senator Cockrell expects to ask to have the fortifications appropriation bill taken up as soon as the urgent deficiency bill is out of the way, and thinks there will be no difficulty in getting it through during the week.

The friends of the bankruptcy and the erritorial admission bills are growing anxious concerning the fate of these measures, and are beginning to be apprehen sive that time may not be left for their consideration if the Nicaragua bill be not soon disposed of.

The present prospect is against a revival of the financial currency question during the week, but much will depend upon the tion of the committee on finance at its neeting tomorrow, and also upon the attitude of the house of representatives.

OUR WINES AGAINST THE WORLD. California Will Have a Full Exhibit at the

Bordeaux Expositio The viticultural commissioners have decided to make an exhibit of California wines and brandies at the exposition which is to be held at Bordeaux from the 1st of May next until the 1st of No vember.

Secretary Scott received a cable dispatch last week from Bordeaux to the effect that the Societe Philomathique has accepted the terms offered by the viticultural commission, and that California wines and brandies will be accorded a full and complete representation at the forthcoming exhibition.

This is the first opportunity which has ever been accorded local wine growers and distillers to display their products in Bordeaux. During the last two years substantial recognition has been accorded California wines and brandies in various European centers. Gold medals have been awarded at the expositions in Genoa in 1892, in Dublin in 1892, in Antwerp in 1893 and in Lyons in 1894, but the California wine and brandy makers have never before had an opportunity of showing their best products to the winemakers of the world in the center of the greatest claret market in the world-Bordeaux. Secretary Scott of the viticultural commission said:

"California wines have already received splendid recognition from foreign experts. We intend to carry the battle right into the heart of the finest producing district of clarets in the world. Five years ago an effort to convince the bottlers of French wine that we had wines worthy of their recognition might have been hopeless. There are, however, in this state 100 or more men who have in view the production of the very highest types of wine, whether these types be of claret, Burgundy, Rhine wines or any other kind. These people know that we have an area of country suitable for winemaking as large and as varied as all of the countries of Europe outside of Russia.

"We want to put samples of all of our wines before the countries of the world, and we have never before had such an opportunity as is now presented in the Bordeaux exposition. We do not claim that we have the very best of everything, but we do want to show to all comers that we have at least as good wine as can be shown by any country. All that we ask is an equal and fair chance with any country, and I think it is fortunate for the state that the means exist for inviting such a comparison without any undue expense to the individual winemakers. The commission ntends to collect all of the samples. The samples will be sent on, and due eare will be taken that fair play is done to all concerned. All that we are waiting for is for complete particulars as to the expense. "-San Francisco Chroni-

BY RAIL TO THE YOSEMITE.

Five Hours by Electric Road In Place of Four Days by Stage.

Chicago capitalists, in conjunction with others in New York and California, may undertake an improvement in the Golden State in the shape of an electric road which will involve an expenditure of \$2,500,000. The projected road is to run from Merced, in the San their views on the Hawaiian problem, and, Joaquin valley. As planned it is to continne from that town into the heart of the Yosemite valley, a distance of 100 men interested, said recently that few things in connection with the project were definitely settled except the plan in a general way.

"The purpose," he said, "is to furnish modern transportation facilities into the Yosemite. At present visitors leave the railroad either at Merced or Raymond and travel by stage into the valley. It is a four days' journey for the round trip and a laborious mountain climb for animals, although the same distance could be traversed under some conditions in a few hours. Despite the discomforts of the trip, many people visit the region. By an electric road the. journey will be reduced to a five hours' ride in a comfortable car. It is proposed to equip the road for freight traffic in connection with passenger business. I know the carrying of freight by an electric road is an experiment, but it has been done, and we think it can be accomplished regularly, successfully and profitably."-Chicago Tribune.

Their Credentials.

The principal of a certain ladies' colege in Cambridge advertised for a porer, asking the candidates to apply by etter. One correspondent began with "My dear sir," and ended with "Love to all the family.'

Another, after stating his many qualifications, made the following admission: "I am a married man, but a Christian," and at the foot of his letter put, 'P. S.—Strick T. T."

A third, a woman, wrote in favor of her husband, saying he was specially well qualified to be a janitor in a school "because he had a sister who was married to a gentleman whose father had been a teacher."-London Tit-Bits.

MANNIX'S APPEAL FOR FIGHTERS.

A Chance For Americans to Show Their Bravery.

SAN FRANCISCO, Jan. 22.-E. M. Hatch minister of foreign affairs of the Hawaiian republic, sailed for Honolulu yesterday. He is rushing home to lend his assistance to his government. He deplores the con dition of affairs at Honolulu and declares that Hawaii has many important ques tions to deal with in his coming history. Incidentally it was learned from friends of the minister that the Japanese ques tion is becoming a serious one and that the provisional government has not only had the royalists to deal with, but it ha had to use force to suppress an uprising o Japanese laborers on the plantation

15 miles back of Honolulu. Several days before the revolt headed by Wilcox, 200 Japanese, on the planta tion named, made an attack on the over-seer, who was killed. Several white men were badly beaten by the rioters, and the police had to be called on for protection. "The Japanese, I fear," he said, "wil overrun the country. Editorial Comment.

THE DIFFERENCE in the teaching of today and the past, with particular reference to English and grammar, never occurred to us so forcibly as yesterday, in the conclusion of "Janus." The writer said: C. Seelye, Edward A. Spear, Martin H. "The children of today are taught to build. Garrity, Nahum A. Thayer, Samuel De The children of twenty-five years ago were taught to pull to pieces and give rules for Dyer, James C. White, John McAloon, so doing." These appear to be the facts. I gave what she had told me as near word for word as I could recall it and described her as the beautiful girl whom many New Yorkers would remember, not as the daughter of a revolutionist, but as a charming woman just out of schoo!

"The next morning I filed it, with a private message to the managing editor that it was to be used only on the eve of the outbreak.

"The day after I sent my story I called on her. She was expecting me. Her dress, her manner, betrayed it, and the greeting I received was even more cordial than that of our first meeting.

"She became more and more confidential each time I called, and it was plain to me that she was beginning to regard me as an ally. "It was the morning of the fourth

day after my arrival at Honduras that I found my fellow correspondents grouped together gravely discussing some question, seriousness marked on every face. " 'There's Harding now,' exclaimed Hewton, who represented two papers. I walked up to them. 'Have you dis-

at first, perhaps, in taking the Carlsbad Sprudel Salt regularly, is a decrease in weight. It is getting rid of all the unhealthy, unnatural flesh and tissue-if you have any. That is what makes it so valuable in cases of obesity.

But after that, or, if you are thin already, the firm, sound, healthy flesh that you need comes in a thoroughly natural way. Your digestive organs are put into perfect condition; your appetite is sharpened; there's no waste; the food that you take nourishes you.

No matter whether you're too stout or too thin-the Carlsbad Sprudel Salt brings you to the proper, healthy standard, either

LOOKING TOWARD REPUBLICAN AID

Be Losing Hope.

WASHINGTON, Jan. 22 .- An important meeting of the house appropriations committee was held yesterday, in which Secretary Carlisle took part, at the request of Chairman Sayers.

The conference was over the adoption of a policy by which the secretary hopes to put into circulation an increased volume of silver certificates of small denominations in place of treasury notes. The committee decided to strike from

ulation that for several years has been

Secretary Carlisle stated that it was his desire to get more silver certificates of small denominations into the hands of the people, but explained that other notes The committee dropped the provision mentioned.

Representative Sibley asked the secretary what objection there would be to a system of redeeming notes in gold and silver at the option of the secretary of the treasury instead of the holder.

"If that policy had been inaugurated at the beginning of the resumption," answered the secretary, "it would have worked beneficially, and no trouble would have arisen from it. But my predecessors have followed the policy of redeeming in gold or silver, at the option of the holders of paper, and any secretary who tried to change this policy and force silver on a man who wanted gold, or vice versa, particularly at such a critical period as we have been passing through, would have precipitated disastrous results."

Democrats Still Far Apart. Senator Vest, who is a leading member of the senate finance committee, said vesterday that he did not believe that the Democratic members of the committee would be able to agree on a financial scheme that would unite and harmonize their party either in the committee or in

the senate. Neither the Jones nor Pugh bills were Missouri senator thought it was useless for his party to make any attempt to agree upon a measure that would receive the support and co-operation of the Repub-

The meeting of the senate finance committee this evening will be an important one. If all the Democratic plans fail, then the Republican members of the committee cure the co-operation of enough Democrats to insure its adoption by the senate.

Hope Almost Abandoned It is understood that both the president and Secretary Carlisle have about reached the conclusion that no relief for the existing condition of affairs and the treasury can now be expected from their friends in congress, and they are therefore looking to the Republican leaders to help them out by passing a bond bill and providing for sufficient revenue to meet the demands

of the government. Senator Sherman and other Republican eaders have repeatedly offered to aid and assist the Democrats in this direction, but they, in every instance, have declined the offer. Senators Sherman, Allison and others fully understand that nothing can be done without Democratic aid and cooperation. The outlook, therefore, appears to be no better today than it was a week or 10 days ago.

Congressional Doings.

The senate again gave its attention to the Hawaiian question. Mr. Lodge added one more to the Earge number of Hawaiian were with Kelly in the foundry Sunday resolutions. It was less critical than those preceding it, congratulating the administration on sending a ship to Honolulu, favoring annexation and opposing any British occupation of Hawaiian soil. In a sharp debate Mr. Gray upheld the policy of the administration, and Mr. Frye gave notice that he would keep his Hawaiian question to the front until disposed of. The rest of the day was devoted mainly to the appropriation bills. It was determined to close the debate and take a vote on the long pending Nicaragua canal

bill next Friday. The house, operating under a special order, passed seven public building bills, including \$75,000 for one at Brockton, Mass. The appropriating clause in each bill was stricken out, and the appropria-

Beauty and Utility Happily Combined In This Design.

City plumbed houses, where there are servants, demand a housewife's constant vigilance to prevent the slow poison ing of her family in such ways as these. Extreme care should be used in cleansing all sinks and water pipes. NORTON WON'T YIELD.

A Point Blank Refusal to Settle Matters by Arbitration.

STRIKE CLAIMS ANOTHER VICTIM.

Thomas Carney Was Hurling Bricks at Soldiers.

BROOKLYN, Jan. 24.-Another abortive attempt was made on behalf of the strikers yesterday to induce the trolley officials to agree to submit differences to arbitration. The proposition which was submitted to President Norton of the Atlantic Avenue company was flatly refused by

The person selected by the strikers as arbitrator was William Richardson, secretary and treasurer of the American and New York State Street Railway association. They undoubtedly had the idea that he would be agreeable to the trolley company on account of his position.

The refusal indicates that the companies feel no abatement of confidence that they will win the fight. The success which the Atlantic Avenue company has met with in its efforts to operate its lines un doubtedly had its influence upon President Norton in this matter. That the strikers made the overture after having been several times repulsed in the same quarters may be regarded as indicating that they have lost confidence or are anxious for peace

Another Man Shot.

Another man was shot, probably fatally, by the militia yesterday. A tinroofer, named Thomas Carney, at work on a house on Hicks street, is said by the troops to have hurled bricks and other missiles at them. He denied this in a statement to the coroner after being shot. The bullet, which hit him in the thigh

and penetrated his abdomen, was without doubt aimed at him and was not a random shot. The militia describe his throwing missiles at them, their demand upon him to desist, and upon his failure to do so

The episode was almost similar to that of Tuesday which infuriated Master Work-man Connoily and which caused him to issue his second order to the linemen to quit work. This episode was probably responsible for the continued wavering of Master Workman Connolly in the matter work as usual repairing the damage done

during the night, Connelly denied that he had ordered them to strike. Later in the day, after the episode at Odd Fellows' hall, he declared again that the linemen were ordered on strike and would all be out by morning. There are no indications of the linemen quitting work. They are under contract with the companies from 30 to 90 days. In isolated cases crews have refused to take orders to repair wires which have been cut by strikers or their friends. As a class, they re-

Sketch of His Life.

Lord Randolph entered parliament for Woodstock in 1874. For a number of year he was a modest, unassuming member rarely taking part in debate and seldon giving evidence of more than ordinary ability. A marked change came over him after the death of Lord Beaconsfield. H suddenly developed qualities of audacit and eccentricity, along with fecundity of phrase and vigor of ideas, which lifted him to the front rank of Tory politicians, and led to the belief that the mantle of Disraeli had fallen upon him.

He served as secretary for India for sev gressive members of the Conservative party, and wild and ambitious scheme

A MODERN SCHOOLHOUSE.

Sanitation, Light and Ventilation Received Careful Attention.

[Copyright, 1895, by Palliser, Palliser & Co. Architects, 24 East 42d st., N. Y.] The essential features of a school building, given in the order of their impore, may be said to be as follows: Safety for the pupils in case of fire or panic, perfect sanitary provision, good light, convenient arrangement of classrooms, clos ets, etc., and a good exterior appearance. No plumbing is admitted in the school house design here illustrated. The water closets are placed in the back yard. Many adults do not know that insoluble terials of very small bulk-matches, for example-will obstruct the traps of mod ern plumbing. What then is to be expected of children? Bring up and educate a boy among those who know nothing of the refinements of life, away from the progressive examples of art and taste, in a tumble down, unplastered, ill heated and ventilated apartment, and he never can become with all the aid of books and teachers, a thoroughly cultivated and fitted for the duties of life as one who has enjoyed asso ciations of a higher order. A splendid Italian structure will be built, with one of the two courts in connection of a Pompelian sort, or like a garden planted with tropical trees and other growths, closed in for a winter gar den, covered in with iron and glass. All this construction will show an exterior of white masonry, with some colored marbles perfecting the color composition .- Ex

The Best Drinking Water.

Have a large cistern, with a filter. No water, unless of a very good spring, is so healthful for drinking as filtered cistern water. The best fashion is to divide the cemented cistern perpendicularly into two halves, the partition being the filter. Le the water run in on one side and the pump draw from the other. Both fuel and water should be obtainable without going from under shelter. Many a woman's life has been sacrificed by being forced to run while heated into the cold or rain for water or fuel.

FOREIGN INTERESTS AT CHE-FOO

America and Europe.

CHE-Foo, Jan. 24.-Advices from Wei Hai-Wei report that the Japanese have been repulsed with considerable loss. Foreigners are leaving and a panic prevails The telegraph station on Ching-Chang island between Che-Foo and Wei-Hai-Wei has been abandoned. Traffic between the two towns is interrupted.

Tung-Chow was bombarded by the Japanese vessels on Jan. 18 and 19. On the 21st, in answer to an appeal of mission transported to this place the women children and sick of the missionary fam lies. On the 22d a small force was landed here from the Yorktown to protect neutral citizens and property. This landing was and against the measure itself as a conin common with that from German, Brit ish and French vessels.

A dispatch from Kobe says that a direct Japanese steamship line, under government sanction, will be opened to Talien-Wan and Port Arthur. The port of Mokpho, in southern Corea, will be opened to foreign trade next May.

A further Japanese force has landed at Ning-Hai, between Che-Foo and Wei-Hai-Wei, the object being to surround the latter place. General Sung, with 2000 men, has gone to oppose the invaders.

Barbarism on Both Sides. A Scotch missionary named Young, writing from Tien-Tsin, mentions the fact that the Red Cross society's steamer went to Port Arthur after the capture of tha place by the Japanese in November last with surgeons and others, including the American consul, intending to bring 1000 Chinese wounded from Port Arthur to

The Times Is Right. LONDON, Jan. 24.-The Times, in an edi torial, expresses regret that the Turkish government has refused permission to a special correspondent of The Times, charged to investigate the Sassoun out rages, to enter Armenia. The paper adds: It is well known that such questions ar finally decided by the sultan himself. We had hoped from his knowledge of Euro pean modes of thought a different decision. Turkey has too few friends to afford to flout those desiring to give her fair play. The immoval decision to exclude our con respondent will be regarded as conclusive

Tricoupis Is Unpopular.

ENS. Jan. 24.—There is no that the position of Tricoupis, the prim minister, who, together with his cabinet, resigned on Tuesday, had become untenable. No majority could have shielded him from popular wrath. 4 \$4,000 Country Dwelling Constructed of Brick and Timber.

[Copyright, 1895, by Palliser, Palliser & Co. Architects, 24 East 42d st., N. Y.] To build well, and to do so at a low price, is always desirable, and to build artistic ally, imposingly, attractively, does not imply elaborate finish or profuse orna-ment. Sandpaper and decoration will never make an ill proportioned building attractive to an educated taste, while a rough exterior of harmonious lines and forms will pass current with those who have an eye to the artistic.

When one contemplates building and has put his thoughts and wishes into tangible form, the leading question asked is, How much will all this cost? For what this dwelling be erected in a good and

An old-established business, like an antique building or an ancient but sturdy tree, is a andmark-an "institution," so to speak -in any community where it exists.

There is more than an ordinary interest attaching to it. It is not simply a place for mere buying and selling, but it has an individuality of its own. When, in the progress of time, a change in its affairs seems impending, people ask, with more than simple curiosi y, what is it to be, and when.

This sort of kindly interest has been many times manifested, during recent days, he customers and friends, respecting the jewelry business at No. 154 Hancock street, Quincy It was established by John Holden in 1825, and passed into the hands of his son, John O. > WEIGHTS AND MEASURES. Housekeepers who do not have scales handy often desire some means of accurately determining the weights of different materials to be used in the kitchen. It is useful for them to know, therefore, that one quart of wheat flour, even with the edge of the cup, is almost exactly one pound; that a quart of butter is fourteen ounces; a quart of white sugar is two pounds; that ten medium eggs weigh a pound. A heaped teaspoonful of salt weighs an ounce. Eight tablespoonsful of any liquid makes a gill; four tablespoonsful make a wine glass; and sixteen spoonsful make a tumblerful. The ordinary tumbler holds generally half a pint.

The changes in the banking features o one-half shall be in legal tender greenbacks or Sherman notes. Representative Cox explains that this arrangement would relieve the treasury of the raids upon the outstanding notes, since It would dispose of \$200,000,000 of notes by using them to form the basis of banking and \$100,000,000 for reserves in banks. It is conceded that it might be necessary to empower the secretary to issue low rate bonds to protect the treasury against large withdrawals of gold.

Allison's Bill Favored.

The proposition of Senator Allison to authorize the secretary of the treasury to issue exchequer notes to run one, two and three years, bearing a low rate of interest, appears to meet with much favor on both sides of the chamber.

They would be simply in the nature of temporary device to assist the treasury in tiding over the present crisis, and afford a breathing spell until the operations of the new tariff law had been fairly tested as to its ability of producing sufficient revenue to meet the demands of the government. The free coinage senators on both sides of the chamber, it is understood, will not antagonize a measure of this sort. They have announced their determination to antagonize and defeat any proposition looking to the issue of bonds to run for a long period, redeemable in gold.

The advantage of exchequer notes, in the minds of these senators who are opnow the belief of those senators who understand the situation in the senate that the authorization of something like thes notes will be the only legislation that can In order that there should be harmony

The Republicans senators all agree that there is no time during this session for any extensive revision of the currency They are ready to support a bill author izing the issue of bonds to relieve the treasury requirements. But as the silver senators on both sides of the chamber will antagonize such a proposition, it is not deemed expedient, owing to the short tim that remains of the session, to attemp

such legislation. Senator Hill remarked yesterday that he thought it was possible for the senate to pass some kind of a bill that would bring relief to the treasury. It is said that he has been engaged for some time in pre paring such measure, but the nature of it nas not been disclosed to any one.

There has been a rumor about the Capi tol that President Cleveland 'ntends shortly to send a special message to can gress urging some kind of action on the currency question. It is said that he thinks well of the Sherman bill. If he should advise congress to pass some such measure as that he would receive the cordial support of nearly all the financiers in and out of congress.

THE FORUM will take up for discussion, during 1895, an unusually wide range of timely and important topics by the most eminent writers in the fields of Politics, Finance, Sociology, Literature, Religion, Art, and Science.

To read The Forum is to keep in touch with the best thought of the day.

To be without The Forum is to miss the best help to clear thinking.

A catalogue of the writers who have contributed articles to THE FORUM in the past would embrace practically every man of eminence in America, and me of those in Europe. A list of subjects treated would cover in the widest degree all topics of contemporaneous interest. THE FORUM is therefore of inestimable value to any one who desires to keep closely in touch with the best of current thought-

From the time the cars on the Greenat dusk, Greenpoint was a scene of petty rioting, varied by a little shooting from the crowd and a return of the complimen from the police. Every car run on the Crosstown line returned to the depot with windows smashed.

Policeman Connolly had his cheek opened by a blow from a stone, and Policeman Emil Wright's face was severely bruised by a chunk of coal. Only 10 policemen were available for duty in the district, and as no militiamen have bee drafted into the locality the rioters had

everything to themselves. The Greenpoint cars were the first t start, and had only gone two blocks from the depot when they were stoned. The continued their downtown trip to receive the same treatment in Williamsburg and on the uptown journey were the of jects for volleys of missiles from almo

every corner. Bonfires were lighted on the tracks which were blocked with ash barrels. At Manhattan avenue and Kent street the Crosstown cars were held up by the crowd and the windows smashed. Police of dered the crowd to disperse, but were answered by a volley of stones and lumps of coal. The officers used their clubs freel

Father O'Hare had an interview with the police and called on the strikers to return the cars to the depot in safety. Th strikers manned the cars and brought

them back to the depot. Father O'Hare then visited the strikers headquarters, where a meeting was being held, which he addressed, and at which the non-union men made speeches, prom-ising to keep off the cars in the future. They numbered 24. The strikers' com mittee said they would be sent to their

While this meeting was going on, the Crosstown cars had again been started. They were brought to a sudden halt at Manhattan and Greenpoint avenues, where a long iron pipe had been placed from the wire to the track, burning out the circuit for four blocks. The mol again collected and wrecked the cars Two shots were fired into a car. No ar-

rests were made. Troop A, with a patrol wagon, drove up at this juncture. The mounted men and police charged the crowd and drove i back, using their clubs and the flats o their sabers with telling effect. The crowd fled, but gathered again, and two more shots were fired into the car. The police returned the fire, and a man was seen to fall as if wounded. He was dragged away by his comrades, and his identity has not

been discovered. The mounted men and the patrolmer brought back the cars, and as it was be oming dark it was decided to run no ore. After the last car had returned t the depot, matters quieted down and Greenpoint resumed its usual aspect.

About a mile from the city of Boise, Idaho, great volumes of hot water gush out of several deep artesian wells. The water possesses no medicinal value, and heretofore has been used only for bathing. Now a six-inch pipe will be laid from the springs into the city, and the hot water will be conducted into nearly every business block and residence. The cost of heating with hot water, it is estimated, will be fifty per cent. less than coal, besides Boise will enjoy the reputation of being the only city in the world utilizing water heated by nature herself, for heating purposes. - Northwestern Magazine.

THE PATRIOT FOR \$2.

A Discount of Fifty Cents to be Allowed for Advance Payment.

The publishers of the Quincy PATRIOT announce today that a discount of fifty cents will be made to all paying their subscriptions in advance.

We do this, because we believe that all who pay cash for what they get, should have some advantage; and also as this plan is being more generally adopted by our coal dealers, and others. Some of our subscribers have waited two or three years before they have paid; and did not then hand us the cash, without going two or three times for it.

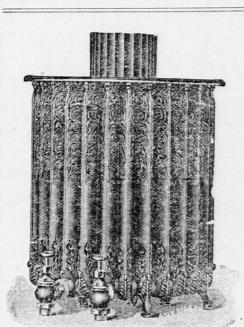

This new plan will give our patrons a chance to get their favorite weekly for two dollars a year, and have it delivered free by carrier or mail.

The subscription price of the DAILY LEDGER has been \$5 per year in advance, but has not been strictly enforced. Now that the paper is firmly established we propose to apply the same rule as to the PATRIOT. Bills will be made out for \$6 per year, and a discount of \$1 will be given for payment in advance, or during the first month of the year.

The combination rate for the QUINCY DAILY LEDGER and the QUINCY PATRIOT. strictly in advance, will continue at \$6 per

The Last Kiss.

I put by the half written poem, While the pen, idly trailed in my hand, Writes on, "Had I words to complete it, Who'd read it, or who'd understand?" But the little bare feet on the stairway. And the faint, smothered laugh in the hall, And the eerie low lisp on the silence Cry up to me over it all.

So I gather it up-where was broken The tear faced thread of my theme,
Telling how, as one night I sat writing,
A fairy broke in on my dream— A little, inquisitive fairy—
My own little girl, with the gold
Of the sun in her hair and the dewy

Blue eyes of the fairies of old.

'Twas the dear little girl that I scolded-"For it was a moment like this."

I said: "When she knew I was busy, To come romping in for a kiss! Come rowdying up from her mother And clamoring there at my knee For 'one 'ittle kiss for my dolly, And one 'ittle uzzer for me!'"

God pity the heart that repelled her And the cold hand that turned her away. And take from the lips that denied her This answerless prayer of today! Take, Lord, from my mem'ry forever That pitiful sob of despair,

And the patter and trip of the little bare feet,

And the one piercing cry on the stair!

A HALT IN BUSINESS.

A Variety of Impediments Tends to Make Outlook Gloomy.

SUMMARY OF THE INDUSTRIALS.

Cereals and Cotton Touching Bottom Prices.

NEW YORK, Jan. 26.-R. G. Dun & Co.'s weekly review of trade has this to say of the business outlook:

Events have not helped business this week. Industries have not yet found sufficient demand for their products to prevent further decline in prices, and this week the average for all commodities has again touched the lowest point ever

The number of hands employed does not increase, and a strike has cut off for more than a week about half the business of Brooklyn.

Congress has done nothing to replenish the treasury, and a variety of financial doctors, each offering his remedy, does not promise health for the patient. Another offer of bonds, under the old law and existing circumstances, might result unsatisfactorily.

At bottom, business hesitates because the future is clouded, and the consumin demand has not increased in January, a was expected. In the belief that it would, industries had enlarged production, and, until it does, the excess of the producing capacity constantly tends to depress prices

The Metal Markets. In iron and steel, weakness is seen Philadelphia, where bessemer iron is quoted at \$11.85 and plates at \$1.30, and at Pittsburg gray forge is quoted at \$9.15 and wire nails at 85 cents. A better demand appears for bars at Pittsburg, but at Chicago they are unexpectedly dull. No transactions in rails are reported, and in general the demand for finished products is considered disappointing. The anthracite coal traffic is again much disorganized. The minor metals are a shade stronger, but tinplates are a fraction lower with considerable busine

staggered by successive reductions in various lines, ginghams having been especially depressed, but the demand is still very narrow. Print cloths sold moderately at 21/2 cents, the lowest quotation or record, but have been lifted a shade by speculation. Even with cotton at almost the lowest point, sales to spinners are restricted.

Cotton barely escapes the lowest point on record, with receipts from plantations nearly 454,000 bales larger than at the same date last year, when the crop was over 9,000,000 bales and stocks of American here and abroad 300,000 bales.

GREENWOOD AND CRITTENTON.

The Former Going to Atlantic This Week —The Latter Has Said Farewell.

Sunday was a memorable day in several of the churches of our city. At the morning service in the Centre Congregational church Mr. Lawrence B. Greenwood presented the work of the Florence Crittenton Missions and Homes, to a large congregation. At Wollaston a union meeting was held in the Congregational church, which was crowded to its doors. Mr. Crittenton, the founder of the greatest rescue work on the continent for fallen women, gave the history of the movement, together with many interesting facts and figures. It is estimated that there are 232,-000 fallen women in this country. In N. Y. City alone 150 fill nameless graves every ballot with these candidates: month. They only live on average five years after they enter a life of shame. Their average age is only eighteen years, and frequently they are as young as twelve years. FOR SALE BY NEWSBOYS, Administration's Opponents Will Push and at the following places: the Hawaiian Question.

SPECIAL MESSAGE TO CONGRESS

May Govern Business In the House This Week.

WASHINGTON, Jan. 28 .- The week in the senate operal with the renewal of the discussion of the Hawaiian question, which promises to become the subject of several more very animated speeches before it shall be definitely and finally disposed of. The adoption of the Vest amendments and the Allen resolution, instead of discouraging the antagonists of the administration, has apparently had the effect of stirring them to even more strenuous and ronounced opposition. They express themselves as more hopeful of reversing the verdict of Saturday when the next vote shall have been reached, which will be on the final adoption of the substitute Senator Teller inaugurated the discussion for the week with a continuance of his speech begun Saturday.

The Hawaiian question will be confined to the two first hours of the daily sessions, and will at the expiration of this time give way to other subjects. The bankruptcy bill has been given the position of unfinished business, and will occupy attention for the greater part of the week. Senator George inaugurated the debate with a speech today. He expects the measure to encounter very pronounced oposition, and in this will not be disappointed, as a majority of the eastern and northern senators will be found to be

against the bill. When the bill is disposed of in whatever way, the senate will probably proceed to consider the pooling bill. If the threatened conflict between this and the territorial admission bills should occur, a maority of the Republican senators would upport the faction favorable to the taking up of the pooling bill, and would prob ably turn the tables in its favor.

There are no appropriation bills now be-fore the senate, but three of those r ainng unacted upon, viz., the District of Coumbia, the diplomatic and the postoffice bills, will be reported during the week, and it is Senator Cockrell's purpose to call them up immediately with a view to get-ting them out of the way as soon as possible. This he will do to the displacement of either the Hawaiian resolution or bankruptey bill.

House Forecast. The program in the house for the coming week will be subject to revision in ase President Cleveland sends a special nessage to congress calling for legislation o protect the gold reserve. If special legslation is demanded by Mr. Cleveland to neet the crisis, an effort undoubtedly will e made to comply with his wishes.

DE GIER'S DEATH

Deprives Russia of Services of One of the Though Brother Senators Dissent. World's Greatest Diplomats. St. Petersburg, Jan. 28.-The couse of the death of M. de Giers, the minister of foreign affairs, was angina pectoris, complicated with inflammation of the lungs.

Since the beginning of December his condition was alarming, but there were trans-itory rallies. He fell into a deep sleep early Saturday evening and passed away almost imperceptibly at 6 o'clock that night. It is not likely that the death of M. de Giers will involve any change of policy, all of his probable successors being in accord with the czar in his desire for

PREMIER DE GIERS.

Nicholas Carlovitch de Giers was born in 1820. He was of Swedish ancestry. At the age of 18 he entered the Asiatic department of the minister of foreign affairs at St. Petersburg. In 1841 he was attached to the Russian consulate in Moldavia. During the Hungarian campaign in 1848 he was employed as diplomatic official at the headquarters of the Russian ommander-in-chief.

In 1850 he was sent to Constantinople as first secretary of embassy. Subsequently, he served the czar in Roumania, Egypt, Wallachia and Moldavia, prior to his appointment in 1868 as ambassador extraordinary and minister plenipotentiary at

In 1869 he was made Russian minister to Berne, later to Stockholm, and in December, 1875, was appointed adjunct to the minister of foreign affairs and director of the Asiatic department, with a seat in the senate. In 1876, and again the year after, in the absence of Gortschakoff, he had total direction of foreign affairs of the empire. Since 1882 he has been at the head of the foreign department.

M. de Giers was one of the most accomplished diplomats of his time, concealing a magnificent knowledge of statecraft beneath an habitual manner of taciturnity.

LAWRENCE, Mass., Jan. 28.-Walter C. Wright, residing in Ordway block, shot his wife and then killed himself. They were married a year ago last May, it being Mrs. Wright's second marriage. She had by her former husband a boy, Charles, who is now 12. Mr. and Mrs. Wright lived only fairly happily together. He was jealous, thought she sought the company of other men, and it was this jealousy that led to the tragedy. A note was found in a pocket in Wright's clothes, upon which it was written that they had determined to die together and wished to be buried in one grave.

THE WEATHER FORECAST.

ALMANAC FOR MONDAY, JAN. 28. MR. PAGE'S SOFT SNAP.

That's What Senator Allen Thinks It Is, The crusade of Senator Allen, begun the other day, against the privileges granted to "one Page," who keeps a restaurant in the national capitol, will no doubt be appreciated along the shores of the Platte, however it may be on the left bank of the Potomac.

The Nebraska senator says that Mr Page occupies, free of rent, seven or eight of the best rooms in the splendid building, four being devoted to the dispensing of food to hungry senators; that the government, through the senate's contingent fund, pays for every stove and range in the kitchen and every other article of kitchen furniture. It pays for every pound of fuel used in Mr. Page's cooking, for all his lights, and even for all the ice, the latter alone to the tune of about \$300 a month. Last year, as Mr. Allen is informed, the ice bill was over \$3,000, and the government also paid for washing Mr. Page's rooms and cleaning his carpets. In look ing over the bills for 1892 Mr. Allen found a purchase on one day of 17 vards of axminster carpet and 106 vards of other carpet for the restaurant at government. In addition to the annua interest on that sum, represented in the permanent fixtures, the government pays, it appears, "fully \$700 a month" for what is consumed in the form of ice. fuel, lights and so on, or about \$8,000 a year.

As to the prices which Mr. Page was able to fix, with such concessions, the Populist senator had little to say:

"I have no fault whatever to find with his prices, although I see beefsteak costs a dollar and some odd cents there, while the same quality of steak in my section of the country can be bought and cooked for 25 or 30 cents. It goes up to \$4 with truffles. I do not know what truffles are but an ordinary porterhouse beefsteak

with truffles costs \$4." Of course Mr. Allen's resolution of nquiry on this subject did not meet with general approval. Mr. Hale, premising that Mr. Page was a citizen of Maine, said that Mr. Allen had found a mare's nest; that, instead of being ; mine of wealth, the restaurant vielded so little profit, with its restricted patronage, that it had always been hard to get a good man to conduct it. Mr. Hawley and Mr. Manderson took about the same view of the affair, and altogether the chief practical use of Mr. Allen's reearches may come hereafter in Ne braska when he tells there the story of the ice, the axminster and the truffles. -New York Sun.

THE MASTERS.

The Sale of High Priced Pictures Not Se Great Last Year as In 1893.

The official record of last year's picture sales shows that the season at Christie's London rooms was a dull one. Only 20 pictures were sold for \$7,000 and upward compared with 26 in 1893. There was much talk about the sale of Reynold's "Lady Betty Delme," which was supposed to have brought \$55,500, but it appears that the picture was really bought in. Lord Carlingfo Joshua's famous picture of "The La collectors of internal revenue. They be- dies Waldegrave" for \$70,000 privately. lieve that the greater the amount realized | The Dutch pictures realized the best prices in 1893, but in 1894 the earlier British masters took the first place.

The highest price of the year, \$32,000, was paid for a Raphael. Next came a Constable for \$31,000. A Gainsborough cost \$3,935 in 1870, and a Reynolds bought in 1876 for \$4,915, now realized \$23,200 Modern works declined in many cases. A Rossetti sold for \$2 155 which cost \$4,315 in 1892. A Faed fell from \$4,900 in 1888 to \$3,410. Two works by Leighton, which realized \$3,050 and \$2,835 in 1892, sold for \$1,650 each.

Wales Doffed His Hat.

Captain James Oliver of the clipper Louisiana, which arrived here yesterday. tells this story: "When the Louisiana was lying at Dublin, the Prince of Wales was the guest of the lord mayor of the Irish capital. The mayor suggested to Wales that it would be interesting for him to visit the Louisiana and see just what an old time American clipper ship looked like. Captain Oliver was notified ton took charge, and took the money that that the prince would like to come few days Captain Lawton jumped over- prince to tip his hat to him. This the prince never does, by the way. When the party came aboard, the boy appeared party followed suit, to the great delight of the captain's son, who, in this way, made good his boast."- Philadelphia Record.

The Price of a Peerage.

The statement that "it is the inten tion of Lord Rosebery to create no more peers' may be taken at a very low valuation. In the first place, if he had formed any such intention, he would hardly be likely to make it public, be cause, in the second place, any such anlisle, it is understood, will very soon select nouncement would have a disastron effect upon the party war chest. It is rather brutal perhaps to talk about the 'price of a peerage," but it is a fact that nearly every peer created in recent times for political services has contributzant, cartoonist on The Evening World, ed at least £10,000 to the funds of his

strike had been declared off, there were very lively times in the vicinity of Ridgewood last evening. About 4 o'clock two cars which were started on the Union avenue line that runs to Greenpoint were attacked by a mob at the junction of Knickerbocker and

Myrtle avenues. The stones flew thick and fast, and both crews jumped from the cars and sought safety in flight. Only three of the four men returned after the police had dispersed the crowd, and the ourth man, a conductor, has not been heard of since. Captain Kitzer and a mounted squad of

police dashed into the crowd, but the mob appeared to be made up of stubborn material. Captain Kitzer gave the word to fire, and the police shot over the heads of the crowd, which fled in terror when the revolvers rang out.

Rescued by the Police.

Earlier in the afternoon Sergeant Suton and half a dozen policemen raided Odd Fellows' hall, which is the headquarters of the strikers, and rescued five non-union men who were held prisoners there. Things quieted down somewhat by

No Surrender, Says Connelly. Master Workman Connelly, when seen at Mugges Hall last night, was in a very indignant state of mind. He complained that false statements had been made in regard to the strike being called off and strikers deserting the union. "The strike has not been called off," said Mr. Connelly, warmly. "There will be no surrender on the part of the men, no matter what may happen. The statement that our men are deserting is as absurd as it is untrue. I heard that two men did go back, and that number, I imagine, is all that the companies will get. There was never less reason for our men to desert than now.

Disagreement Has Stirred Up a Lively Row Among Denver Churchmen.

DENVER, Jan. 29 .- The Andover theo logical controversy is being fought over in Denver. Rev. Dr. John P. Coyle, who came from North Adams, Mass., to accept the pastorate of the First Congrega onal church, is the cause of the commo tion. Dr. Coyle's answer to questions asked him at his examination, preparatory to his installation, plainly showed that h did not accept the doctrine of the divinity of Christ in the full inspiration of the Scriptures, but, nevertheless, the council voted in favor of his installation.

Now, Rev. Addison Blanchard, who stoutly fought against a vote favorable to the new pastor, proposes to present the matter to his church with a suggestion that it withdraw from fellowship with the Congregational society. Rev. Myron Reed, whom Dr. Coyle was

called to succeed, resigned his pastorate on account of a storm raised by his calling Christ an anarchist. The fact that Dr. Coyle at his examination said Christ was the supreme anarchist has excited much comment both in and outside the church of which he is pastor.

Editorial Comment.

PRESIDENT BASS has certainly recognized the minority in his appointments Three of the eight chairmen are Democrats. Councilman Adams is chairman of be most important committee, that of Finance, and Councilman Rice is chairman of the Committee on Sewers, from which much is expected this year. We find Councilman Bryant at the head of the Street com mittee, and Councilman Johnson is chairman of the Committee on Fire Department and Police, and Councilman Bigelow will head the State House committee. Councilman Shackley will continue as chairman of the Committee on Public Buildings for which he is well fitted. The other chairmen are Messrs. Lamb, and Grindell on Ordinances and Health.

For Single-Headed Commissions Savings Bank Extra Dividends. Boston, Jan. 29.—The most importan

item of interest at the state house was the introduction in the house of three bills making single-headed commissions of the railroad, harbor and land, and gas and electric light boards. A petition was received for an act pro-

viding that once in every term of five years, if the net profits accumulated by savings banks over and above the guar anty fund and dividends amount to 1 per cent of the deposits which have remained in the bank a year preceding, such ne profits shall be divided among the de positors whose deposits have remained therein for one year at least then next preceding, in proportion to the amount of dividends which have been declared or their deposits during the three years next preceding.

Petitions were presented for an act pro viding for insurance against loss or dam age caused by leakage or breakage of sprinklers; that the wharves and docks of Boston be placed under public control that the state board of health be instructed to investigate the sanitary condition of the Neponset meadows,

Bills were introduced providing that no life insurance company shall enter into a contract of life insurance without having previously made a medical examination of the insured; establishing the salary of the clerk of the Boston board of police at \$3000 A Republican steering committee has been appointed by members of the house.

It consists of Prevaux of Amesbury, chair man; Bailey of Arlington, secretary, and Hibbard of Boston, Jones of Melrose, Ban croft of Clinton, Porter of North Attleboro, Howe of Marlboro and White of Sandwich. Mr. Darling offered an order in the sen

ate-which was laid over-authorizing the committee on mercantile affairs to inquire into the reasons of our manufacturers of textile fabrics seeking to extend their business outside the state.

From Turks' Point of View. LONDON, Jan. 29 .- The statement is made at the Turkish embassy that the government of Turkey considers that so long as the Armenian commission has not made its report, it would not be advisable to allow reporters to visit the scenes of the recent events, as it is thought that information they might collect would throw no further light on the sub ject, but would interfere with the work o the commission and complicate matters.

President Suggests Means For Replenishing the Gold Reserve.

SPRINGER COMES TO THE RESCUE

President's Ideas.

WASHINGTON, Jan. 29.-President Clevehis former recommendations are insufficient to meet the present conditions. The

He refers to the constant drain of gold standing for which gold may be de-While he desires to see silver recognized to such an extent as will be consistent with financial safety, he is unvilling that gold should be entirely banished from the currency and finances. In his opinion the secretary of the treas-

ury should be authorized to issue bonds for the purpose of maintaining a suffi-cient gold reserve and for the redemption of legal tender notes and treasury notes issued for the purchase of silver un-der the law of 1890. The principal and inerest of these bonds should be payable in gold, otherwise it might be difficult to dispose of them. He suggests that the deinations of the bonds be \$20 and \$50 and their multiples: the interest not to exceed 3 per cent. He sees no reason why the bonds should not be payable in 50 years. He recommends that national bank notes under \$10 be cancelled and that sil-

hould be paid in gold. The president concludes by confessing ais reluctance to issue bonds if the results will be no better than the late issues, and expresses his determination to leave nothing undone which will improve the situation or check the suspicion of a disability

President Cleveland remarked yesterday to a Democratic senator who called at the executive mansion that he had determined to make one more appeal to congress conerning the gravity of the financial situ-

He did not know whether it would do any good or have any effect, but it would place the responsibility where it belongs. In his December message, he said, he directed the attention of congress to the importance and urgency of legislation in the irection proposed by his special message mmunicated yesterday.

No stronger appeal could have been nade than was contained in the annual message sent to congress on the first day perfectly and palpably plain that the only way under present conditions by which the gold reserve, when dangerously depleted, can be replenished, is through the sssue and sale of the bonds of the government for gold.

There has been no change in the situa ion, so far as congress is concerned, since hat message was delivered, except an apparent determination not to pass any remedial legislation to relieve the condition of the treasury. Now the situation has become critical. But, judging from the conversation of the extreme silver advocates in the senate and house, the appeal again made by the president in behalf of prompt action in the matter is not likely couraging. The road runs along, at the to have much weight or influence with

CLEVELAND'S MESSAGE

Was the Principal Feature of Yesterday

In Senate and House. WASHINGTON, Jan. 29 .- The reading of President Cleveland's message formed the most interesting feature of yesterday's session of the senate. It was presented shortly after noon, and there was very promptly a filling up of empty chairs by senators who were not on hand when the senate met. The president's views and recommendations were listened to with close attention, and when the reading of With a Bill Embodying the the message was concluded it was sent to the finance committee.

Most of the day was taken up by the passage of the house bill (with senate amendments) disapproving an agreement with the southern Ute Indians, providing land, in his message to congress, says that his former recommendations are insuffi- allotting lands in severalty to those deserving them, and to remove others from a emergency is so threatening that he asks such prompt and effective action as will confining them to the western part of it restore confidence and avert business dis- and to several townships in New Mexico. The matter of the location of these In-dians has long been a vexatious one, diffiand says that 500,000,000 notes are out- cult of settlement by the Indian committees of both houses. Yesterday's action bids fair to result in the final settlement

The interest in the house centered in the president's message, which was read immediately after the body convened, There was a slight skirmish over its reference and that of the administration bill, which Mr. Springer introduced, but both were referred to the committee on bank-ing and currency, Mr. Wilson having waived jurisdiction of the bond feature of the message, which could have gone to the ways and means committee.

Members were busy discussing the message and bill throughout the session and gave little attention to the debate on the bill to repeal the discriminative duty of sugar imported from bounty paying countries. At the conclusion of the debate yesterday, Mr. Wilson attempted to effect an arrangement for a vote after two hours of debate today, but Mr. Grosvenor (Rep., O.) objected. Despite the objection, Mr. Wilson stated his purpose to try to secure a vote at the end of that time.

Chase Suspects Graffam.

PORTLAND, Me., Jan. 29.-In the Gorham murder trial yesterday afternoon the government rested its case and the defense was begun. Attorney Chase, in the opening argument, said the respondent fully and emphatically denies the charge against him, and that not a juror on the panel could, under oath, declare the state had proven beyond a reasonable doubt the guilt of James Lewis. Mr. Chase said that the man who, above all others, had the opportunity to kill Coburn, was Edward Graffam. James Lewis, the respondent, had a fainting spell. He did not lose consciousness, but was assisted out of the courtroom. When he returned five minutes later he was smiling.

Proceedings Kept Secret.

CITY OF MEXICO, Jan. 29.-The president and cabinet were in secret session all day and until a late hour last night, but declined to divulge anything as to the of the session. He then said that it was nature of the conference. The only thing known positively is that nothing has yet been done officially as to formulating Mexico's answer to the last note from Guatemala. The government arsenal here is still working day and night.

COMPACT AND WELL ARRANGED. Plan For a Home That Is Adapted For

Many Wants and Locations. [Coyright, 1895, by Palliser, Palliser & Co. Architects, 24 East 42d st., N. Y.] A difference of opinion has and probably always will exist about the materials of which a house should be constructed. We use in this country three leading varieties-wood, brick and stone. Wood is the cheapest, and if very nice points are considered is probably the healthiest, cer-

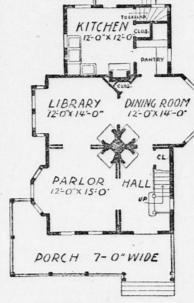

superior qualities for ventilation. Our stone and brick houses, with slate and metal roofs, furnace heated and airtight, lack essential qualities for health, while a frame house, which admits the air more freely, even if it take an extra cord or two of wood or an extra supply of coal, has a more healthy atmosphere.

Frame houses are good houses and will outlast the lifetime of the builder, and no matter how strong and substantial a house may be built it usually passes into strangers' hands at the owner's death.

The great charm of a country home in pleasant weather is its surroundings, and these should always be neatly kept. Roll and cut the lawn regularly; keep the roads and walks in smooth and handsome order; have fine trees and give them abundant room to grow, and thin out whenever they become crowded. Do not have any more lawn or roadway or walks than can be kept in unexceptional order. Whatever is done do well. Better a city lot in fine orde than a 100 acre slovenly farm.

good taste be kept in view throughout A country dwelling should always be conspicuous object in its full characte and outline from one or more prominen points of observation. Consequently a plantations of tree or shrubbery in its im mediate vicinity should be considered as aids to show off the house and its append ages instead of becoming the pri disposition should be such as to create a perfect and agreeable whole when seen in connection with the house itself. rounding landscape to view in its mos attractive features from the various parts of the dwelling. A single tree of grand and stately dimensions will frequently give greater effect than the most studied plantations.

The cottage illustrated in this article has a compact and well arranged plan and a simple but picturesque exterior. Examining the floor plans, we find there are eight rooms and a bath. The first story contains a fair sized parlor, with a bay window on the side. There is nothing more pleasing than a bay window properly placed in a room, especially it the parlor. It breaks the boxy and unwel come appearance of the room and always looks well from the outside. At the rear of the parlor is the library, connected by

SECOND STORY. sliding doors. To the right and connects with the library is the dining room, which is also approached from the hall. It will be noticed that the kitchen is very cleverly danned, with all the modern conven ences within reach. Among other things may be mentioned the large stair or hall, the open fireplaces and wide verandas. The second story contains four bedroom and a bath. There are also spacious closets

provided for the sleeping rooms.

The materials of outside walls are: Cellar, brick or stone; first and second story, clapboards; gables and roofs, shingle. Heights of stories: Cellar, 7 feet; first story, 9 feet 6 inches; second story, 9 feet. The cost of this house, including all modern improvements, is \$2,600 and in many

localities can be built for less. If a private house is built without the services of an architect, it is the general and candid acknowledgment afterward that a great mistake had been made and how many things could have been improved by the employment of a skilled man.

QUESTION OF INDEMNITY

WASHINGTON, Jan. 80. - Senor Romere the Mexican minister, and Senor Arriago the Guatemalan minister, called at the state department yesterday afternoon and entered upon a discussion of the troubles between their respective countries with Secretary Gresham.

In such cases the ministers are usually charged with power by their govern ments to offer and receive suggestion looking to a settlement of disputed ques tions, subject, of course, to the approval of the home governments, but in this case both officials have denied that the matter is in their hands, so the inference is that to advise their governments to show a upon Wei-Hai-Wei in two divisions of 19 spirit of mutual concession.

Parish Sociable.

The Unitarian parish sociable last evening was a pleasant break in the quiet of Quincy social life. There were violin and piano music during the evening. The ladies' parlor with crackling wood fire, softly shaded lamps, daintily laid supper tables and improvised waitresses, presented a cozy and home-like scene. Contrary to the old cold custom of our Unitarian friends, a social spirit actually reigned, and men, and women especially, instead of cuddling in a corner with their special chums, talked glibly with distant church sign the arbitration agreement. members. Now that the social ball in this church is set rolling, let the church reach out kind hands to many less prosperous citizens to whom a glimpse of this chapel sociability would be a refreshing break in perhaps weary lives.

Stiffening In Dresses. Considering the amount of stiffening sold in Paris and elsewhere, it is hard

to believe that a few of the best French dressmakers do not make use of it at all Nevertheless such is the fact. Probably the marked antipathy shown by Felix and one or two others to anything in the shape of crinoline has preserved us from being steel ridden many a time in the course of the last ten years and will doubtless prevent the present taste for stiffening from making more progress. My opinion is, says a foreign correspondent, that we have arrived at a turning point, and that stiffening will not be carried any further than it is now, manage to give a skirt its proper shape and prevent its falling in about the feet? > The empress of Japan is said to enjoy the largest washing of any royal or ple beian personage in the round world. She is a very petite and winsome little lady. It does not take much to cover her, to be sure, but a Japanese queen must change that covering many, many times a day, and her raiment must be of delicate, cobwebby, lacey silk, satin, crape or crepe de chine. Even if she never wears the same article twice she has it cleaned, washed, perfumed and either packed way in her wardrobe, presented to her ladies in waiting or her beloved female retainers. At one time during the last summer season, when her maids were busy putting away summer robes and bringing to light autumn ones, she had over 2,000 silk kamonas sent to her royal laundry and cleansing department of the imperial household. Senate Finance Committee Cannot

Reach an Agreement.

By the House Banking and Currency Committee.

WASHINGTON, Jan. 30.-The proceedings of the session of the senate finance com mittee yesterday were based upon a bill

which had been prepared by Senator Voor-This bill provided simply for the issucarriers.

ATLANTIC — Brancheid's News Agency to be used for the purpose of making good the reserve and of meeting the revenue deficiency bill. When the afternoon ses sion opened, he had added a clause provid

ing for the free coinage of silver. There was a motion to strike out the silver provision, which was lost on a tie vote of 5 to 5, all the Republican members and Senator McPherson (Dem.) voting for the motion and all the Democrats opposing it. There was also a tie vote on a motion to substitute the Springer bill for the Voorhees bill. A vote was then taken on the proposition as a whole, and it was lost by a vote of 7 to 8, Senators Vest and White, as well as McPherson, voting with

the Republicans. The committee adjourned without agree ing upon any definite time of meeting, and some of the Republican members said afterward that they saw no reason for any more meetings, as it had been made evident that it would be impossible to accomplish anything in the committee. There was a full attendance of the committee, except that Senator Jones of Nevada was absent. It was his absence that caused the tie vote. If he had been pres ent, his vote would have been cast with

the silver Democrats. The Banking and Currency Committee adopted an amendment to the administration bill to reduce the tax on bank circulation to 1/4 of 1 per cent yearly, payable

Several amendments were defeated. It was voted to strike out section 5 of the ad ministration bill providing for the pay-

ment of customs duties in gold. When the committee adjourned the two amendments were pending. One offered by Mr. Russell (Rep., Conn.) stipulates that the retirement and cancellation of legal tenders for each month shall not be greater than the increase in amount of national bank notes under the operation of the plan. This amendment was carried when first offered, and then there was a successful motion to reconsider and post-

pone action for a day.
Mr. Walker (Rep., Mass.) stands sponsor for the other pending amendment, which is to require one-half of the reserve funds of banks to be held in gold coin or gold certificates, the other half in silver coin or silver certificates. Ten per cent of the re-serve is to be held in this stipulated form on July 1, 1895, 20 per cent at the end of three months, the change being made a the rate of 10 per cent a quarter until com pleted. The discussion on this amend ment hinged on the point whether forcing the banks to secure gold for deposits would not cause a greater demand upon the treasury for gold than the raids which

are now in progress. Several amendments were proposed which failed. Most important of their number was one to substitute the word 'coin' for "gold" in the provision for payment of the bonds, which commanded four votes, its opponents numbering six. Another unsuccessful amendment was one to give the secretary of the treasury discretion to fix the rate of interest on the bonds and to make them payable after

various short terms. Considered by Congress.

President Cleveland's financial message has again started the eddies and currents of sentiment on the financial question in the senate. While this has not crystallized Into definite action, several incidents occurred in the senate yesterday which indi-

cate the general tendencies. Mr. Manderson (Rep., Neb.) presented a compromise plan. The senator empha-sized the need of concession and compromise in a vigorous speech, urging senators to give and take in order that some common ground for meeting the financial emergency might be secured. In replynificant declaration that no such compre

mise legislation could be effected at this session of congress. Among the measures passed during the day were those for the incorporation of the National Association of Florists and for the sale of interchangeable mileage tickets to commercial travelers, known as the commercial travelers' bill. Most of the

day was given to the bankruptcy bill. Work In the House. A special order was invoked in the house to bring to a vote on the bill to repeal the KINGSTON, N. Y., Jan. 30.-Rowland 1-10 cent differential duty imposed by the new tariff law on sugars imported from bounty paying countries, and it was passed without amendment by a vote of 239 to 31 A series of amendments-two looking to retaliatiation in case Germany refused to

admit our meat products after the repeal of the differential; one to repeal the 1/2 cent differential on refined sugar; one to provide that this act should not be construed to mean that the United States sur rendered the right under treaties containing favored nation clauses to affect bounties by the imposition of equivalent differential duties, and one to place all sugar, raw and refined, on the free list-were

lost by practically party votes. The debate touched quite extensively on the treasury situation and the remedies to be applied. Mr. Dingley made a long statement of the receipts and expenditures to show that the treasury was suffering from lack of revenue, and that the first duty of the government was to increase

the receipts.

Mr. Reed took a similar view of the sit uation, which was controverted by Mr. Wilson. The attempts to amend the bill by repealing the other portions of the sugar duties were opposed by Mr. Wilson on the ground that if the bill was leaded down with amendments it would surely

meet its doom in the senate. Boston Wool Market. Boston, Jan. 30. - The wool market has maintained a steady tone during the past week, though the demand cannot be called ac-tive. PROGRESS OF WOMAN SUFFRAGE. The Cause Has Advanced Twenty Years In

The Past Twelve Months. The past year has been one momen tous in results to the advocates of equal suffrage. A brief recapitulation is sufficient to show that the cause has ad vanced 20 years in the past 12 months through practical illustration of the workings of political equality. In less progressive localities the question has been discussed and public interest aroused, which is the first step toward actual

In November, 1893, the women of at all the elections for all candidates. in several districts than had ever been elected before and ordained the retirement of others who, they claimed, did not represent the best social and political elements and were prejudicial to the best interests of the colony. Having been qualified to vote, they disbanded their franchise league and organized the Political Educational league and have devoted their time to a careful study of colonial politics. One amusing feature of the year in New Zealand has been a stormy debate in parliament as to their eligibility to membership in that important body. The women themselves had expressed no desire for such advancement, but the honorable members, anticipating this finally, were looking the inevitable in the face.

The example of New Zealand proving old soldiers were introduced to Mrs. Grant so salutary, the enfranchisement of women was also discussed in both the and to each she gave a cordial handshake parliament of Victoria and New South Wales, in both of which colonies it will probably be adopted during the present year. In the Hawaiian republic the representative women of Honolulu, headed by Mrs. Whitney, the wife of the editor of The Pacific Advertiser; Mrs. W. O. Hall and Mrs. W. C. Wilder, wife of the vice president, and ably counseled Keegan case returned from Scituate last by the Hon. Lorin C. Thurston, made an appeal for the franchise under the constitution. The forces of conservatism were too strong to be overcome at once, but they secured a provision for the extension of the franchise in the future by popular vote instead of by an amendment of the constitution.

In the United States a year of unpred edented activity among women was in troduced by the citizens of New York, headed by Mrs. Stanton and Miss An thony, to have the word "male" stricken from the constitution. While the main purpose was defeated, the contest was of incalculable benefit in enlightening the forces. More than 500,000 names of representative men and women were appended to the petition submitted to the constitutional convention. Women of social influence and of the highest culture and position opened their houses for suffrage meetings, in which they personally participated. Permanent organizations, of which these women are still the leaders, are continuing the work of agitation and education, which they will not relinquish until they have en tirely accomplished what they have

pledged themselves to do. In Wyoming and North Dakota wom en superintendents of public instruction were elected. The campaign in Colo rado was a revolution againt the old es tablished political methods. The wom en carried on the most brilliant meetings everywhere, organized clubs, and by precept and example induced the ment of the entire vote of the state. They elected as their own representatives West elected as their own representatives Mrs. lowed suit until the figures are down to A J. Peavey, state superintendent of public instruction, and Mesdames Klock and Cressingham members of the gen

> In Illinois each party nominated a woman candidate for university trustee, to vote. The women were thoroughly organized, having the co-operation of their respective state central commit tees, and were furnished with headquarters and others facilities for carrying on their work. Meetings were held that were largely attended, the most notable of which was that in Central Music hall on the evening of Oct. 10. Nearly 50, 000 women registered and voted in spite of discouraging and confusing legal complications. As in New York, the greatest interest was shown among the educated classes, women of position and culture taking a profound interest in the campaign, working and voting for their chosen candidate. The Republican can didate was elected by something like 151,000 majority, and the event was selebrated by one of the most brilliant

banquets ever given in Chicago. The vote upon the suffrage amendment in Kansas was in the negative, but this, as in New York, is only a temporary defeat. In Nebraska also there was much interest, clubs being formed for political discussion and work which must result in future good. In view of all these facts it can no longer be asserted that women do not want to vote, and that they would not vote if they could. Wherever they have been permitted to take part in practical politics-in New Zealand, New York, Colorado or Illinois -a marked and unmistakable change for the better has been brought about. With the present rapid change in public opinion their enfranchisement throughout the whole civilized world is a matter of but a few years. - Chicago Inter Ocean

Strong exhibitions of emotion are seldom said to be special features of the Scotch character. Indeed, the intensely practical traits of these people are universally entertained, and the term "Canny Scot" has

become proverbial. However true the reported lack of enthusiasm may be on ordinary occasions, there is one period of the year that utterly belies its general application. As the birthday anniversary of their favorite poet Burns approaches, they throw off all native reserve, and celebrate it with glowing fervor.

Few names in history command such Hayes of Lynn so thoroughly in his op enduring tributes of affection as Robert Burns. Miss Dawes' Degree.

Miss Elizabeth A. S. Dawes has gained the degree of D. Lit. at London university. This degree has never previously been won by a woman. Miss Dawes is a daughter of the Rev. J. S. Dawes, formerly of Surbiton, and a granddaughter of the well known Professor Blasius of the University of Halle. She was educated at Girton, where she won high distinction.

The thesis which has gained for Miss Dawes her doctor's degree was on "The Pronunciation of the Greek Aspirates." She is indeed a Greek scholar of high accomplishments. For a year she was professor of Greek at one of the most important educational establishments in Baltimore, and for the last three years she has been successfully conducting classes in her own school at Lindores, Weybridge. Curiously enough, it was the elder sister of this accomplished lady, Miss Mary E. Dawes, who was the first woman to take the degree of M. A. at London university.-London Star.

SENATORS ARGUING.

Looking Toward a Solution of the Financial Question.

HOUSE MAKES SOME PROGRESS.

Many Amendments to the Administration Bill.

WASHINGTON, Jan. 31.-The session of the senate yesterday was unusually eventful in giving expression to the intense feeling which has been aroused by the financial question and to the apparent elessness of arriving at a solution Mr. Sherman of Ohio spoke for the first

time since the new phases of the financial situation were presented. He urged the senate to take the subject from the finance committee, where the task of framing a bill, he declared, was hopeless, by reason Mr. Sherman arraigned the advocates of

free silver for pushing their demands to the point of paralyzing legislation. He asserted that the present emergency could readily be met by issuing bonds of such simple and convenient form that they would be taken by the people as well as by the banks, thus bringing the great labor savings in the savings banks to the rescue of the government.

Mr. Vest lent a personal interest to the debate by declaring that the president was seeking to make congress accessory to the wielding of the single gold standard on the people. The senator asserted with dramatic emphasis that he had thus far held his peace, but there must now be a separating of the ways between him and the president

Mr. Stewart (Pop, Nev.) declared that no real emergency existed, and that all the trouble that had arisen was due to administration discrimination in favor of

gold against silver. Mr. Hill (Dem., N. Y.) said the first duty of the senate was to ascertain what was wanted by the administration. With that purpose in view and in order that congress could stand fairly before the country and the administration could deal fairly with congress and congress with it, he introduced a resolution directing the secretary of the treasury to inform the senate whether it is necessary or desirable that legislation should be had authorizing the issuing of bonds, treasury notes or other securities to realize moneys for the pur-pose of paying current deficiencies in the revenues, and if so, the nature and sub-stantial details of such legislation. Mr. Hill desired that the resolution be considered immediately, but Mr. Allen (Pop., Neb.) objected, and it went over.

This ended the financial discussion and

the senate began the consideration of rou-The Outlook For Financial Legislation, o far as the senate is concerned, con-

tinues dismally opaque. The developments in the senate finance committee were not of a character to inspire hope. It was thought by the Republican mem bers of the committee that either the Sher man or Allison scheme, the latter providing for exchequer notes, would receive favorable consideration when all other propositions failed, by obtaining a sufficient number of Democrats to secure fa-

committed. in alluding to the action of the committee, emarked that the result showed that they could not agree upon any proposition looking to the relief of the treasury; that all that could now be done was to await the action of the house and consider such a measure as it might see fit to pass.

The friends of silver in the committee will not accept any bond scheme without some recognition of that metal, while the six days the child died from starvation. THE FORUM will take up for discussion, during 1895, an unusually wide range of timely and important topics by the most eminent writers in the fields of Politics, Finance, Sociology, Literature, Religion, Art, and Science.

o read The Forum is to keep in touch with the best thought of the day.

To be without The Forum is to miss 汝 the best help to clear thinking.

A catalogue of the writers who have contributed articles to THE FORUM in the past would embrace practically every man of eminence in America, and most of those in Europe. A list of subjects treated would cover in the widest degree all topics of contemporaneous interest. THE FORUM is therefore of inestimable value to any one who desires to keep closely in touch with the best of current thought-
